DISCLAIMER

The information in this presentation by **Algoz Digital Asset Capital Ltd.** (the "Fund") is not an offer of units in an investment fund or a solicitation of an offer to buy any such units. Units may be offered to selected investors only by the means of an offering memorandum and related subscription materials ("Offering Documents"). Units of the Fund are not registered with any regulatory authority, are offered pursuant to exemptions from such registration, and are subject to significant restrictions. The Fund's investment manager is AK Jensen Investment Management Ltd., a Financial Conduct Authority (FCA) regulated entity. TriplEdge Ltd., an unregulated entity. is providing services to the Fund.

Any investment in any strategy, including the strategy provided herein, pertains a high degree of risk. Investmentt in crypto assets are more speculative in nature in comparison to investment in traditional assets and involve substantial risk of loss. All investors are advised to fully understand all risks associated with any kind of investment they choose to pursue. Unless specifically noted otherwise, all return figures in this presentation are based on paper trade (back test results). We make no representation or warranties that an investor will, or is likely to, achieve profits similar to those presented herein, nor do we provide any guarantee that the investment objectives will be achieved. There is no guarantee that systems, indicators, or signals will result in profits or will not result in loss. Past performance is not necessarily indicative of future results.

The benchmark figures in this presentation were secured from public sources which are believed to be reliable by the Fund . We make no representation as to the accuracy of such information. *Barclay Hedge Cryptocurrency Traders Index* is the leading benchmark for cryptocurrency funds' performance data, representing over 45 leading crypto funds. *Standard & Poor's Dow Jones index (S&P 500)*, is regarded as the principle investment vehicle for exposure to the U.S. equities market, making the S&P 500 the ideal representation & benchmark of comparing traditional equity investments to alternative investments. *Comex's Gold Dec 20 (GC=F) Index* offers global gold price discovery and is used in this presentation as a benchmark due to shared characteristics of these alternative investment options as store of value. The *Yahoo Finance Bitcoin USD (BTC-USD) Index* follows the price of Bitcoin, which, since its invention in 2008, has been the top crypto asset and the representation of the decentralized economy. Bitcoin pricing, setting the tone for the entire industry, is a metric commonly used by digital asset investors to measure the performance of their portfolios and trading strategies.

The Fund is not obligated to update, modify, or amend this presentation or to notify a reader thereof in the event that any projection or estimate set forth herein, changes and subsequently becomes inaccurate.

For information purposes only. Potential investors should inform themselves of the possible tax consequences, legal requirements and any foreign exchange restrictions or exchange control requirements which they might encounter under the laws of the countries of their citizenship, residence or domicile and which might be relevant to the subscription, holding, conversion, & redemption. This document shall not be construed as an offering or solicitation to invest in the strategy, or as a legal, tax or investment recommendation. Only our Fund's formal agreements shall be binding as the official documentation when considering an engagement with the Fund. This document is strictly confidential and may not be reproduced or redistributed in whole or in part nor may its contents be disclosed to third parties without the written consent of the Fund.

WINNING STRATEGY IN VOLATILE MARKETS

POSITION TRADING STRATEGY PERFORMANCE BREAKDOWN

MARCH 12, 2020

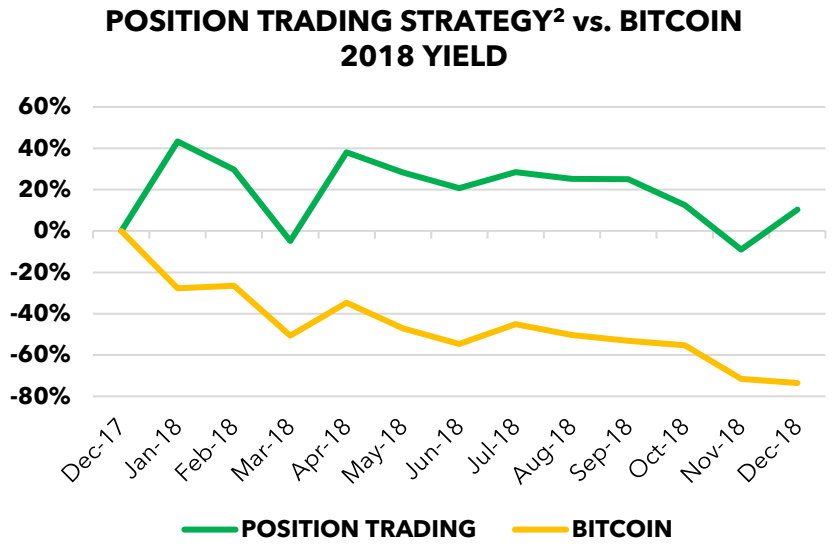
Bitcoin lost 37% of its value in a single day. The largest one-day drop in Bitcoin's price since 2013 was triggered by the World Health Organization's (WHO) announcement of COVID-19 becoming a pandemic (i.e. a global health crisis).

The **Position Trading strategy declined by 37.1%** on the 12th but was able to recoup the loss with strong April and May results standing at **20%** and **21%** respectively, compared to **34%** and **9%** by Bitcoin.

2018

Coming out of the ICO boom of 2017, Bitcoin's value stood at **$14,112** on the 1st day of 2018. With a sharp annual decline of **71.3%**, Bitcoin's value on January 1st, 2019 was **$3,746**.

In comparison, Algoz's Position Trading strategy concluded 2018 with a positive return value of **10.2%**. The Cryptocurrency Traders Index[1] reported **62.6%** annual loss for 2018.



[1] The BarclayHedge Cryptocurrency Traders Index represents the average monthly return of the crypto hedge funds constituent in the index. As of March 2021, BarclayHedge houses 59 cryptocurrency funds in its database.

[2] Position Trading results presented in the graph are based on Algoz's backtest.
