142 Employees Across **8** Global Offices

1,000+ Investors in **40+** Countries

EXTENSIVE MARKET EXPERIENCE

20 Secondary Funds / **10** Co-Investment Pools

$55 Billion in Total Capitalization

600+	3,500+	500+	1,800+	800+
Secondary Transactions	Secondary Interests	Primary Commitments	Funds Invested	Sponsor Relationships

SECONDARY PERFORMANCE

$38 Billion Invested

$42 Billion Distributed

$24 Billion Reported Value

$7.4 Billion Purchase Discount

$17 Billion Syndicated to Co-Investors

21.4% / 17.3% Gross / Net IRR

1.7x / 1.6x Gross / Net Multiple

Lexington's Secondary Funds have outperformed the S&P 500 by 820 bps since inception

Performance represents the Lexington Secondary Funds as of 12/31/21 based upon underlying GP values as of 9/30/21. Investment activity reflects transactions IC approved as of 3/31/22. Includes data from transactions that are not fully closed which remain subject to interim activity and pending allocations through date of closing. There can be no assurances that a pending or committed deal will be consummated. Public Market Index returns are calculated using a "public market equivalent approach" outlined in the endnotes. To be read in conjunction with the endnotes. Past performance is not indicative of future results.

Deep and Experienced Team

ESG at Lexington

- Lexington believes that consideration of ESG principles is essential in anticipating and mitigating risk and can create lasting value for our limited partners, enhance long-term investment performance, and create alignment with our investors, employees, and GPs
- We are committed to strong ESG policies and practices:
  - ✓ ESG Policy and Steering Committee since 2011
  - ✓ Signatory to the Principles for Responsible Investment ("PRI") since 2014
  - ✓ Collaborate with diverse portfolio of sponsors on ESG best practices
  - ✓ Strong, long-term alignment of interest with investors

PRI Principles for Responsible Investment

Signatory since 2014

- Lexington's cross-functional Steering Committee oversees the Firm's ESG initiatives:
  - Secondaries: Pål Ristvedt (IC Co-Chair); John Rudge (IC Member); Taylor Robinson
  - CIP: John Loverro (IC Member); Lutz Fuhrmann
  - Tom Giannetti, CFO; Erica Castle, Investor Relations; Deepa Thimmapaya, Legal & Compliance

STEPS TAKEN TO DEVELOP LEXINGTON'S ESG APPROACH

- Formally integrated ESG factors into the firm's secondary and co-investment policies and procedures
- Developed survey for underlying sponsors about ESG implementation
- Curated extensive library of ESG research and participated in industry networks
- Enhanced Lexington's transparency and reporting on ESG issues, including through an annual ESG Report
- Implemented training on ESG risks and opportunities

To be read in conjunction with the endnotes.

Diversity, Equity, and Inclusion ("DEI")

- Lexington believes a talented workforce possessing diverse experiences, skills, and perspectives promotes enhanced decision-making, continued strong performance for our LPs, and a rich culture
- We strive to strengthen Lexington's core values by attracting, retaining, and advancing diverse talent and engaging with the communities in which we live and work
- 40% of Lexington's professionals are diverse
  - 29% of Lexington's professionals are women
  - 23% of U.S. professionals are ethnically diverse
- Jennifer Kheng, Bart Osman, and Victor Wu lead Lexington's DEI effort

Diversity, Equity, and Inclusion Pillars

DEI COMMITMENTS	
Sponsors for Educational Opportunity SEO	Educational and career programs for young people from traditionally underserved areas; Sponsor *Alternative Investments Fellowship Program*
TOIGO Bringing Diversity to Life	Foster career advancement, increased leadership, and inclusion of underrepresented talent; Fund scholarships / summer internships; sponsor annual gala
ilpa Institutional Limited Partners Association	Bring together LPs and GPs who share a commitment to advancing DEI in the PE industry Signatory of *Diversity in Action* initiative
Additional Non-Profit Organizations	Support grassroots involvement of Lexington employees in local non-profit organizations Provide matching funds for Lexington employees who commit time and resources to benefit organizations aligned with our DEI mission

Diverse employees includes women and ethnic minorities. Ethnic minorities based on the ILPA Team Diversity Template and reflects U.S. employees only.

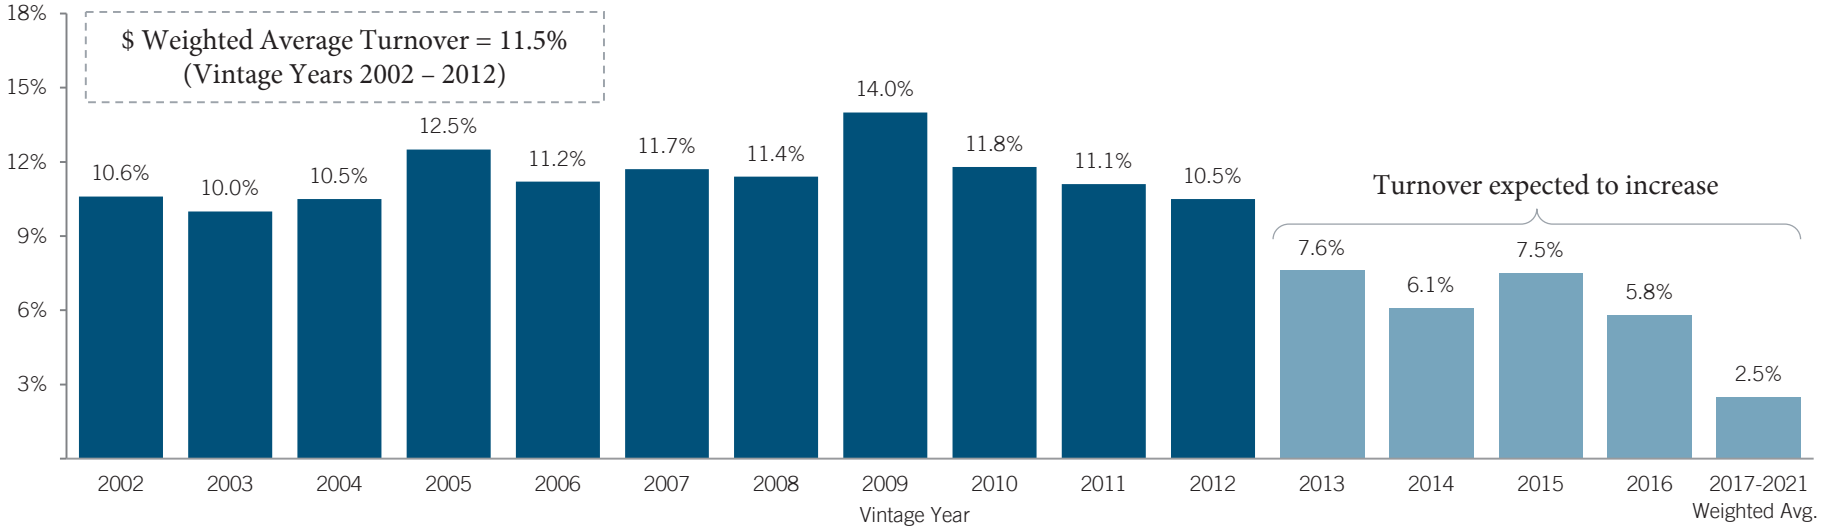
Earlier vintage years converted to USD using respective year-end spot rates. Lexington average age based on market value plus unfunded at acquisition for transactions as of 12/31/21.

Turnover Drives Secondary Market Growth

TURNOVER: GLOBAL SECONDARY TRANSACTIONS AS % OF PRIMARY COMMITMENTS



SECONDARY MARKET OPPORTUNITY: LEXINGTON'S 2022 – 2026 PROJECTION

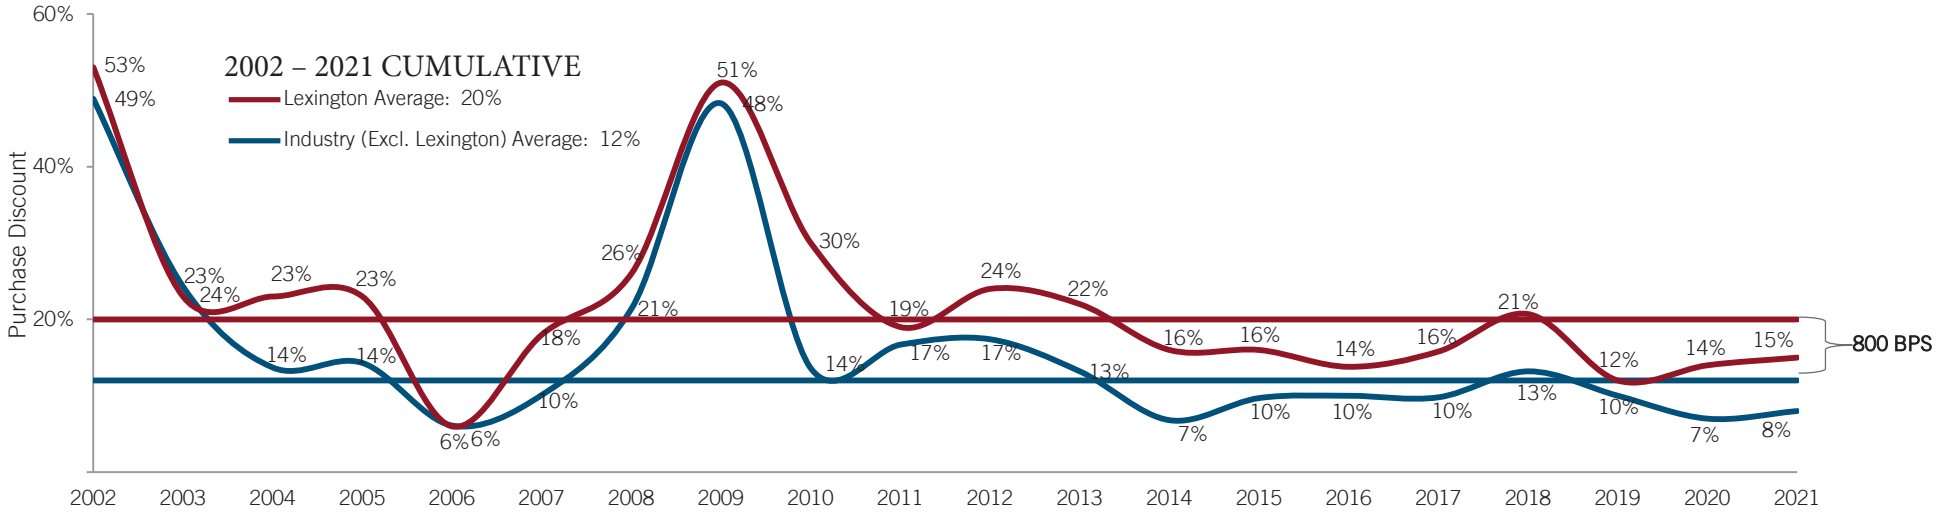
ITEM	AMOUNT	RATIONALE
Capital committed to global private investment funds	$4,665 billion	2015 – 2021 cumulative capital
Turnover rate	10% – 12%	Industry $ weighted average
5-year projection: global private investment funds	$467 – $560 billion	10% – 12% x $4,665 billion
5-year projection: incremental secondary opportunity	$20 – $25 billion	Lexington estimates
5-year projection: industry annual average	$97 – $117 billion	

Source: Lexington estimates as of 12/31/21. There can be no assurances regarding the investment opportunities available to Lexington, or that projections will prove to be accurate. To be read in conjunction with the endnotes.

Historical Trends in Discounts

- Industry discounts remained stable in 2021 despite an increased share of GP-led deals, which generally trade around par, implying increasing discounts for traditional partnership transactions
- Near-term market volatility has had an impact on pricing, creating opportunities to negotiate attractive purchase discounts
- While market discount remained relatively flat from 2020 to 2021, Lexington's discount increased to 15%, and our spread vs. the market is increasing in H1 2022
- Lexington's average discount of 20% from 2002 – 2021 exceeds estimated industry average by 800 bps

WEIGHTED PURCHASE DISCOUNT TO MARKET VALUE



GLOBAL SECONDARY FUND PURCHASE DISCOUNT %

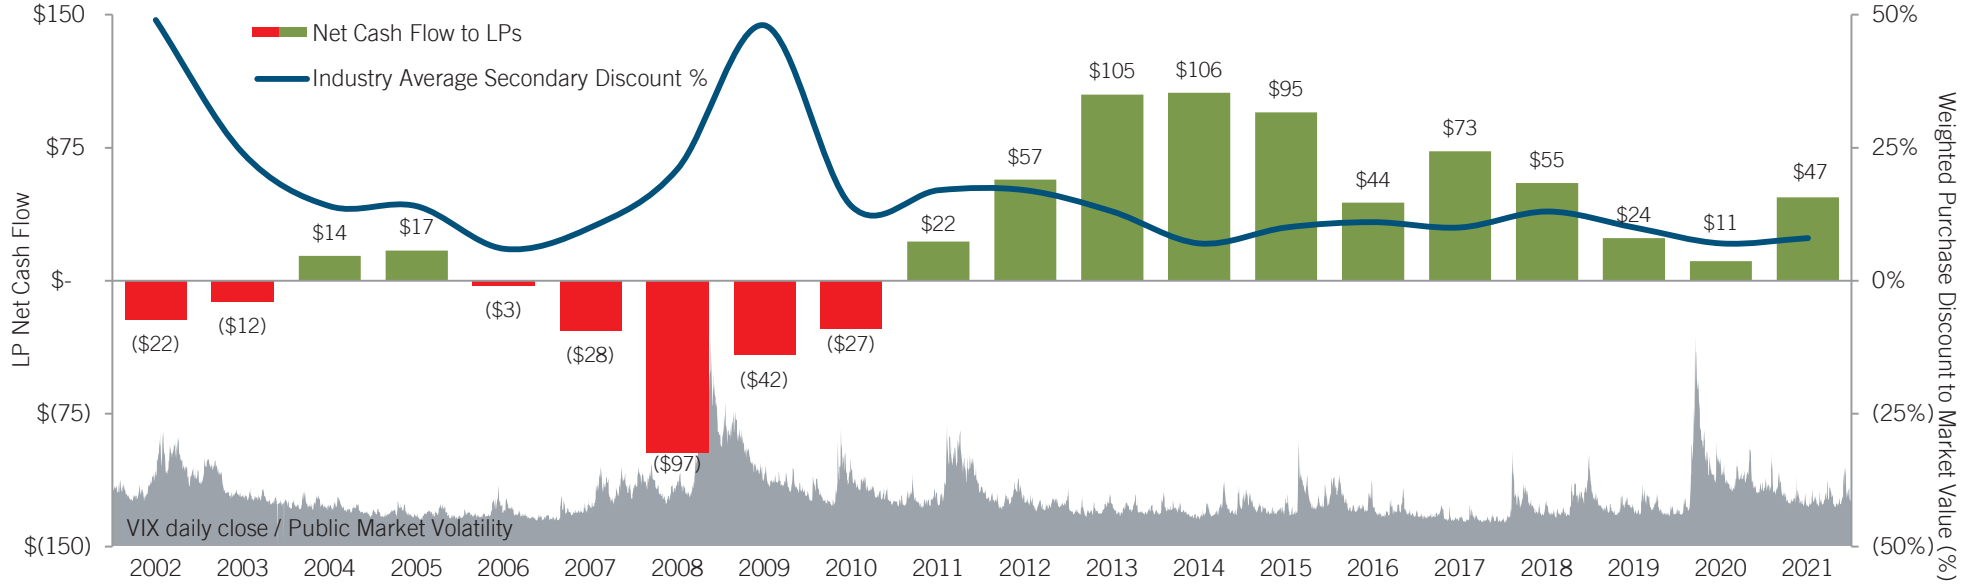
Source: Lexington estimates (database includes over 48,000 private equity and alternative interests). Lexington average discount includes the Lexington Secondary Funds and separate vehicles. LCP IX purchase discount reflects transactions that are IC approved as of 3/31/22 and includes data from transactions that are not fully closed. There can be no assurances that a pending or committed deal will be consummated. To be read in conjunction with the endnotes, including the description of "Discount." No assurance can be given as to the purchase discounts for any future investments made by Lexington funds.

Private Equity Portfolio Rebalancing

- Private equity has generated a record ten consecutive years of net distributions to limited partners
- This positive liquidity environment has created challenges for investors interested in maintaining or increasing allocations
- Sponsors have noted this increased interest and raised larger successor funds more quickly
- Re-up pressures and PE overallocations have spurred the resurgence of LP portfolio sales
- Secondary transaction volume is expected to remain high as LPs engage in portfolio rebalancing exercises buoyed by unrealized performance

LIMITED PARTNER CASH FLOW & NAV: U.S. & EUROPE
($ billions)



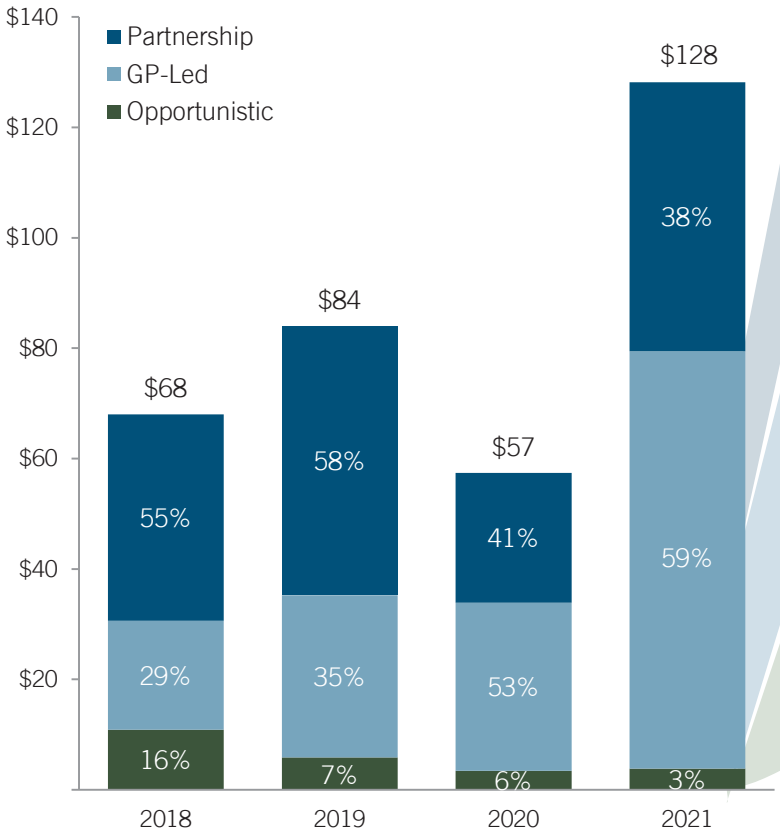
Dry Powder / NAV Ratio	1.86	1.48	1.18	1.31	1.40	1.35	1.68	1.35	1.00	0.91	0.83	0.96	1.02	1.17	1.27	1.37	1.48	1.35	1.29	1.05

Sources: Cambridge Associates Benchmark Calculator, Preqin. "Net Cash Flow to LPs" defined as distributions less contributions. To be read in conjunction with the endnotes, including the description of "Discount."

Current Secondary Market Outlook

- Lexington evaluates a range of transaction types including partnership acquisitions, GP-led transactions such as continuation funds, tender offers, strip sales, and spin-outs, and opportunistic transactions including direct secondaries

GLOBAL SECONDARY MARKET:
TRANSACTION TYPE
(% of Annual Volume / $ billions)



PARTNERSHIP

- Strong secondary market pricing drives rebound in portfolio management activity
- PE overallocations and re-up pressures spur resurgence of LP portfolio sales
- Buyout remains dominant strategy, with increasing appetite for growth and venture
- **LEXINGTON VIEW: Focus on quality and consistent portfolio construction**

GP-LED

- Sponsors continue to take advantage of strong buyer appetite
- Single and multi-asset continuation funds represented majority of GP-led volume in 2021 (51% of total market volume)
- Increasing prevalence of secondary vehicles pursuing GP-led only strategy
- **LEXINGTON VIEW: Pursue selectively where our criteria can be met**

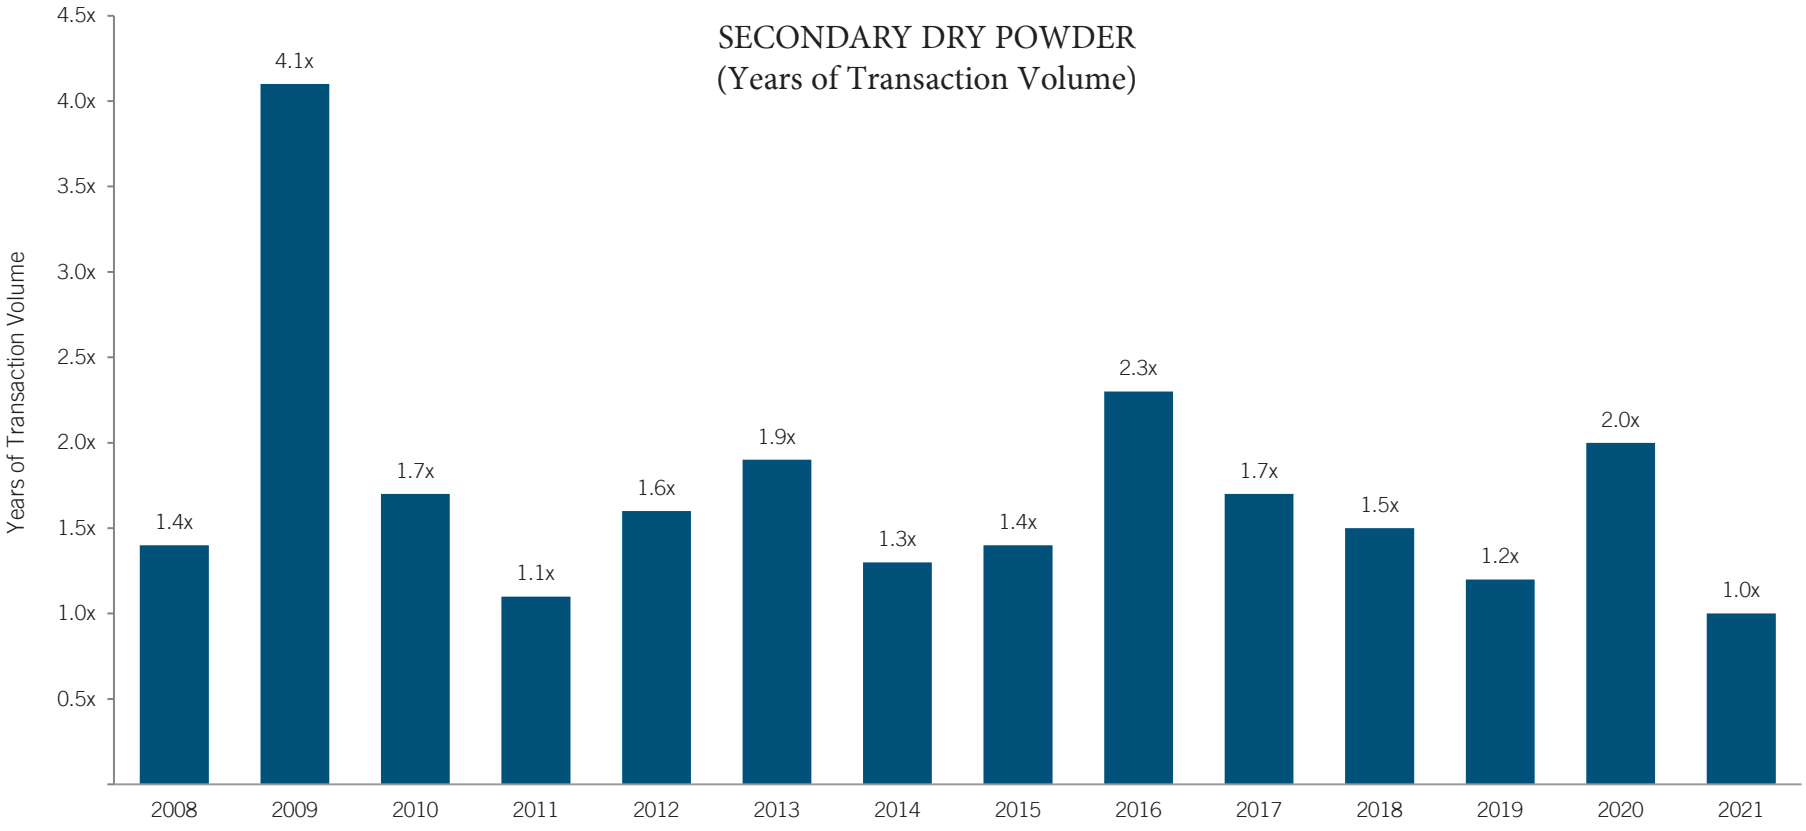
OPPORTUNISTIC

- Continued deal flow in direct secondary investments
- Equity co-investment opportunities
- Hedge funds with significant private equity holdings
- **LEXINGTON VIEW: Cautiously pursue select transactions**

Source: Lexington estimates. Global Secondary Market Volume excludes secondary transactions involving real estate partnerships and royalty payments and reflects sale price plus unfunded commitments. To be read in conjunction with the endnotes.

Secondary Dry Powder

- Secondaries supply and demand characteristics have remained attractive, and within historical norms
- Secondary manager dry powder in 2021 was estimated at $133 billion, representing 1.0 years of available buyer capital



Sources: Lexington estimates (secondary transaction volume), Preqin (dry powder). Years of transaction volume is based on end of year dry powder divided by preceding year deal volume. Bottoms up dry powder analysis excludes dry powder for dedicated infrastructure and real estate secondary funds. Additional secondary capital raised is dependent on fundraising conditions over the near to medium-term. There can be no assurance that historical trends will continue.

Differentiated Approach to Partnership Deals

- Lexington has extensive experience sourcing, analyzing, and closing attractive partnership acquisitions, committing to invest approximately $28 billion across 340+ partnership transactions
- Rigorous bottoms-up due diligence process focuses on buying high-quality assets managed by reputable GPs with strong track records, without the use of deal-level leverage
- Lexington's competitive advantages include:
  - ✓ Global Platform with Tenured Team
  - ✓ Extensive Fund Information Database
  - ✓ Strong, Long-Term GP Relationships
  - ✓ Ability to Move Quickly and Secure Transfer Consents
  - ✓ Large Discretionary Capital Base with Syndication Capability
  - ✓ Structuring Expertise
  - ✓ Proven Execution Experience Known to Intermediaries
  - ✓ Reputation as Reliable Counterparty

GP-Led Deals Through Lexington's Lens

- We defined our key GP-led transaction criteria many years ago and have remained consistent in our approach, committing to invest approximately $10 billion across 50+ GP-led transactions
- An increasing number of GP-led transactions now have the characteristics we seek: high quality, alignment, favorable transaction structure, and economics
- As a result, we are evaluating a high volume of GP-led deals, selectively considering deals where fundamentals and process dynamics fit our criteria

DEAL FUNDAMENTALS

- ✓ High-quality GP with established track record
- ✓ Meaningful value appreciation potential
- ✓ Negotiated transaction terms and structure
- ✓ Attractive risk-adjusted return profile
- ✓ Meaningful GP incentive/alignment

PROCESS DYNAMICS

- ✓ Long-standing and trusted relationship
- ✓ Differentiated information and GP access
- ✓ Fair pricing for Lexington, existing LPs, and GP
- ✓ Large deal size with ability to syndicate
- ✓ True liquidity option with status quo/roll option for LPs

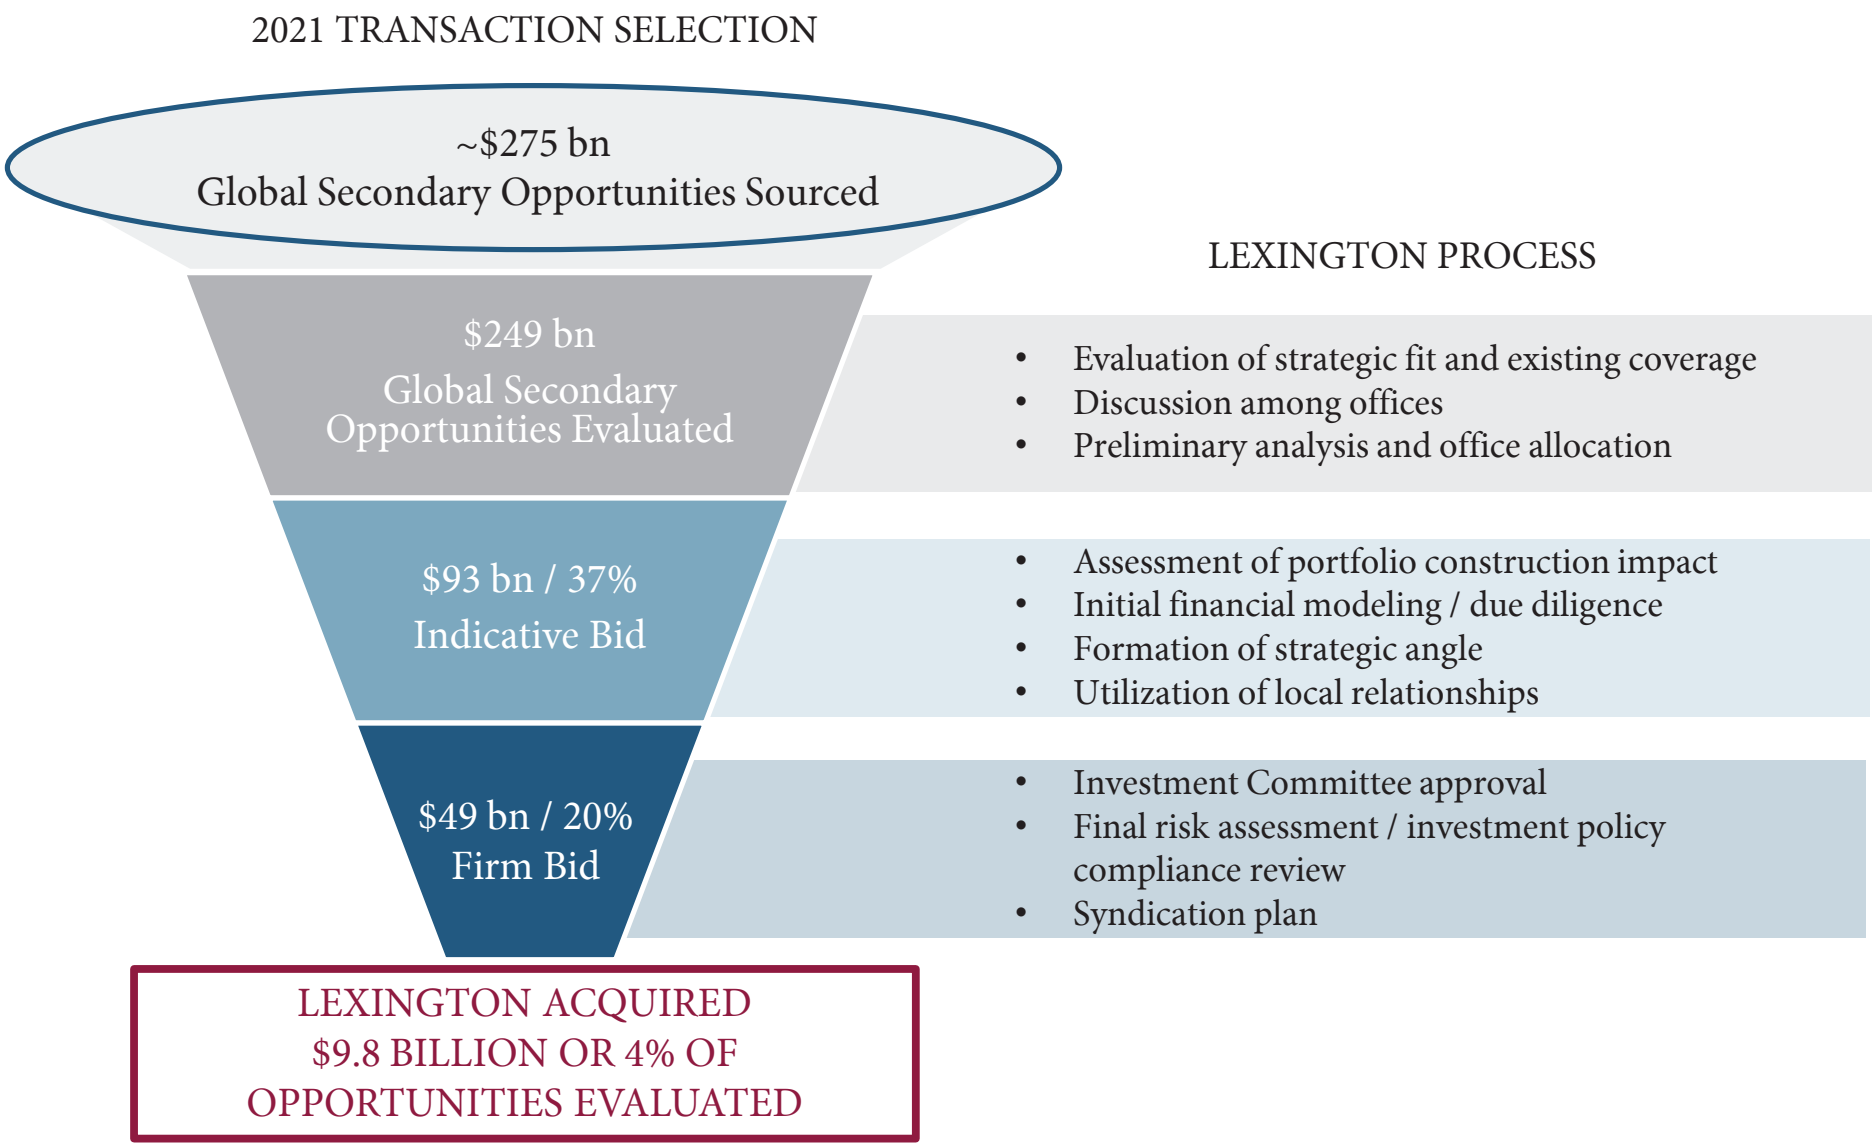
Lexington Secondary Investment Strategy

Consistent Portfolio Construction Delivers Results

	TRANSACTION TYPE	SECTOR DIVERSIFICATION	INVESTMENT PACING (CUMULATIVE % COMMITTED)	12/31/21 PERFORMANCE (GROSS / NET)
LCP VII (2010)				IRR: 19.6% / 15.1% Multiple: 1.9x / 1.7x Net DPI: 148%
LCP VIII (2014)				IRR: 19.3% / 20.0% Multiple: 1.8x / 1.7x Net DPI: 86%
LCP IX (2018)				IRR: 45.2% / NM[1] Multiple: 1.6x / 1.6x Net DPI: 19%

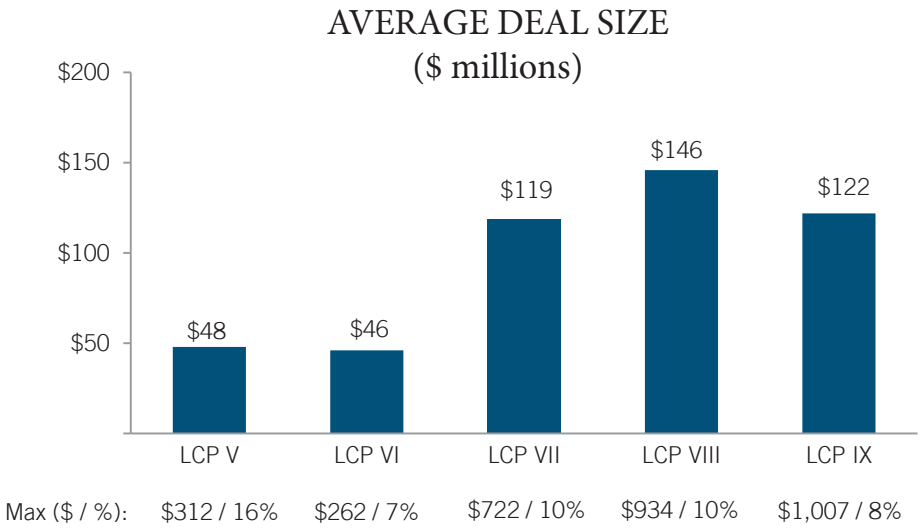
[1] LCP IX's 12/31/21 Net IRR is 82.5%, but Lexington does not consider that figure to be meaningful due to the use of a revolving credit facility. Based on net purchase price plus unfunded at acquisition. LCP IX diversification and pacing reflect transactions IC approved as of 3/31/22 and include data from transactions that are not fully closed. There can be no assurances that a pending or committed deal will be consummated. Other includes Infrastructure, Credit, and Energy. LCP IX's portfolio diversification is subject to change over time, and the figures above are not indicative of the portfolio diversification of any other Lexington fund. Past performance is not indicative of future results. To be read in conjunction with the endnotes, which provide important information regarding the calculation of IRRs and Multiples, including the impact of credit facility usage.

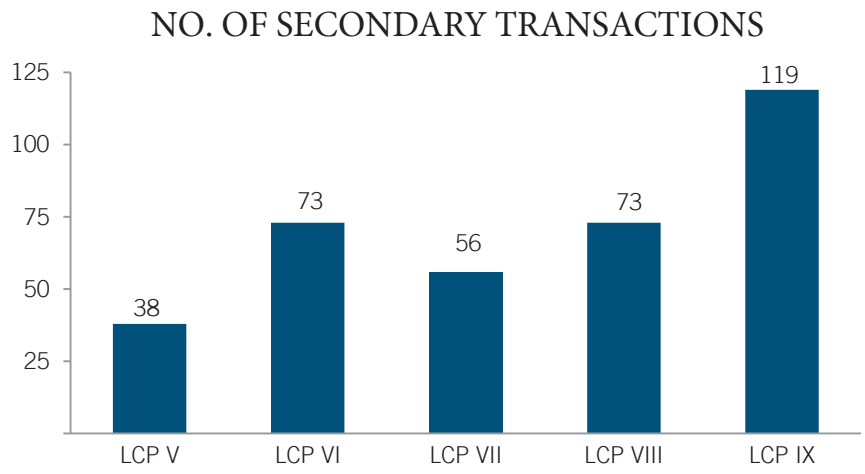
Broad, Flexible Investment Strategy

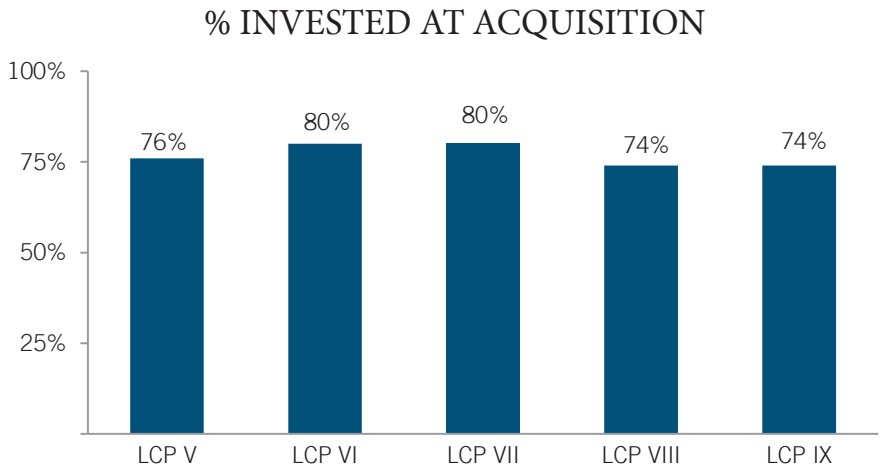


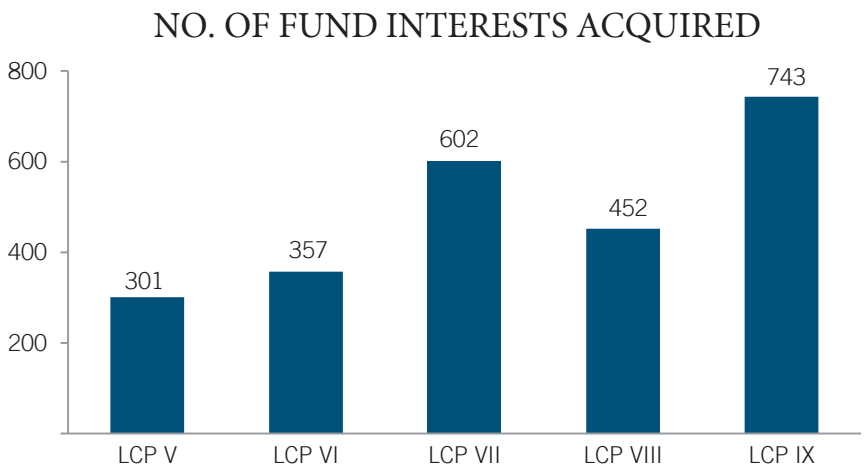
Based on market value plus unfunded at acquisition. Lexington Acquired represents transactions committed as of 12/31/21. Includes discretionary co-invest accounts and syndications to co-investors. Process bullets represent Lexington's typical secondary investment process.

Consistent Global Secondary Investment Strategy



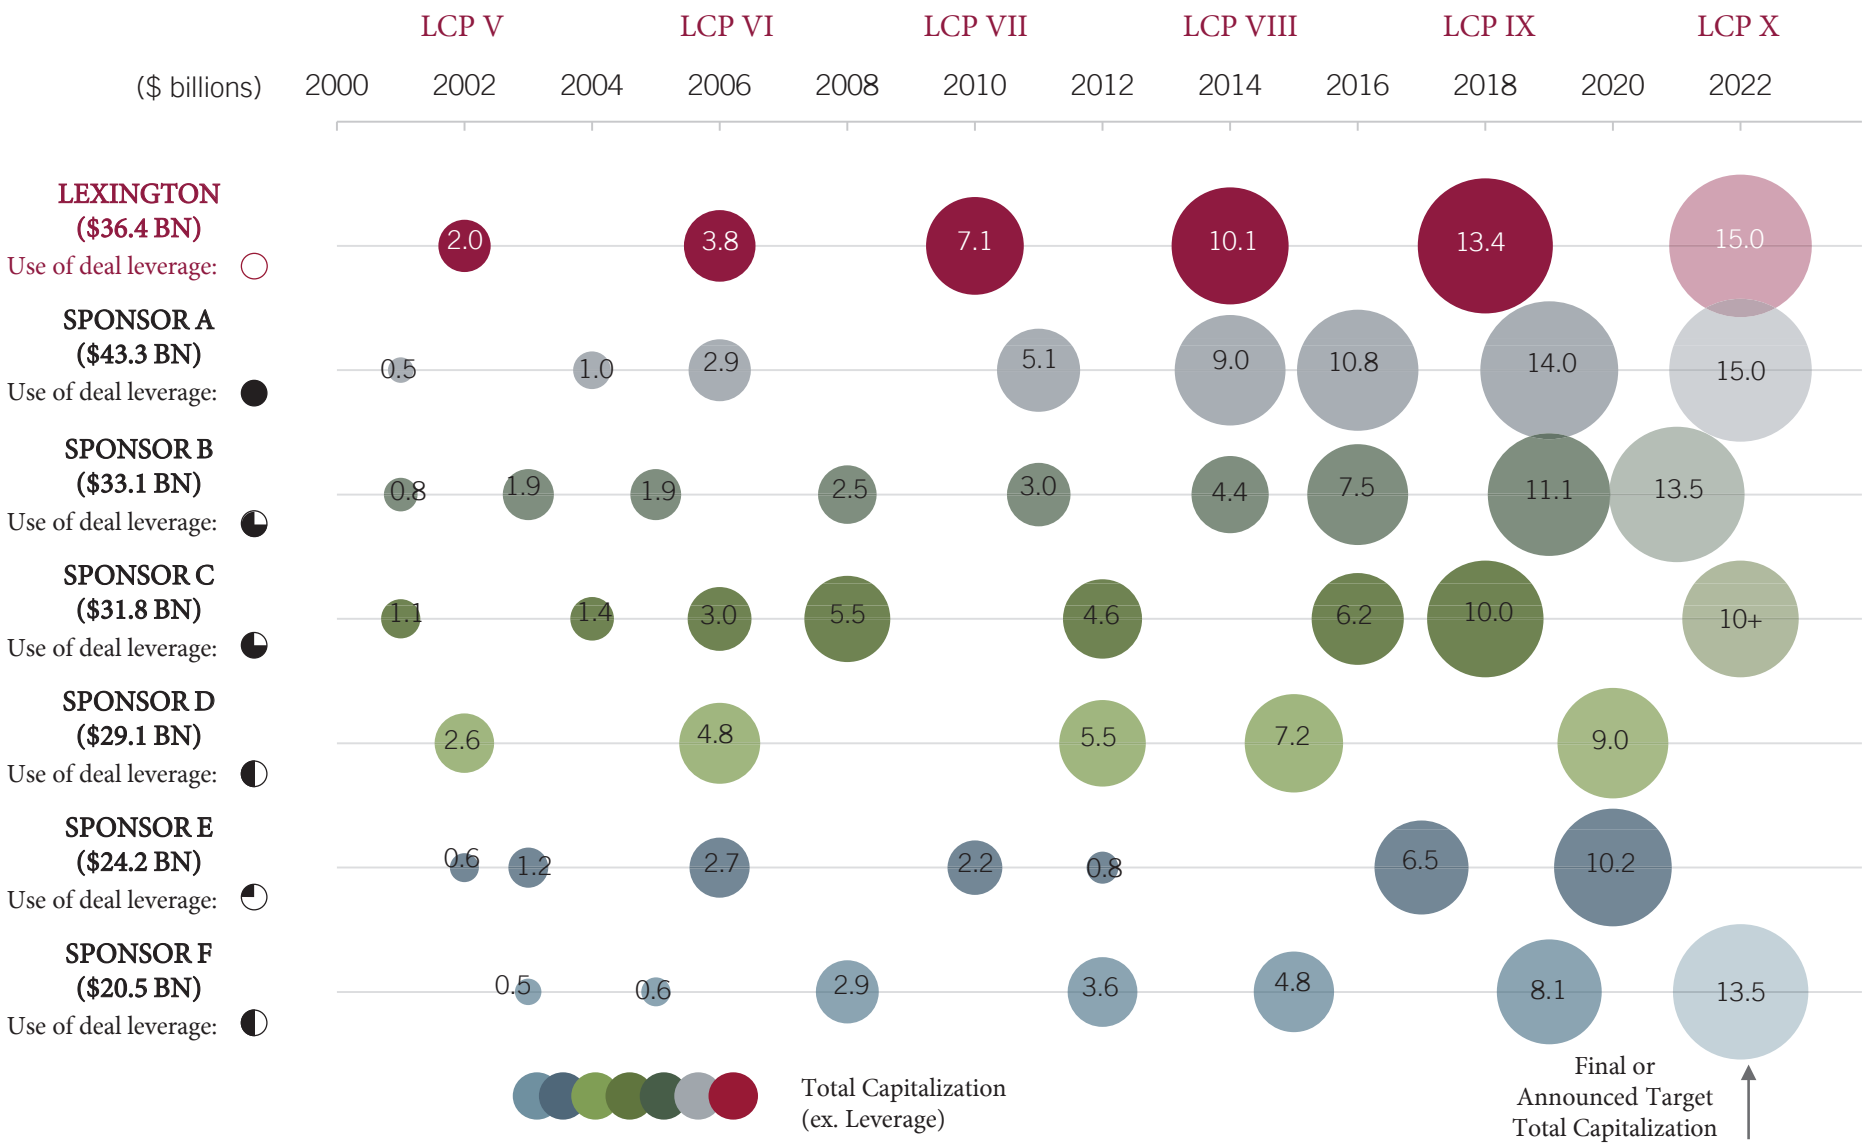






Based on purchase price plus unfunded at acquisition. LCP IX-related information reflects transactions that are IC approved as of 3/31/22 and includes data from transactions that are not fully closed. There can be no assurances that a pending or committed deal will be consummated. Max ($ / %) represent amount committed by respective fund and % of total fund size.

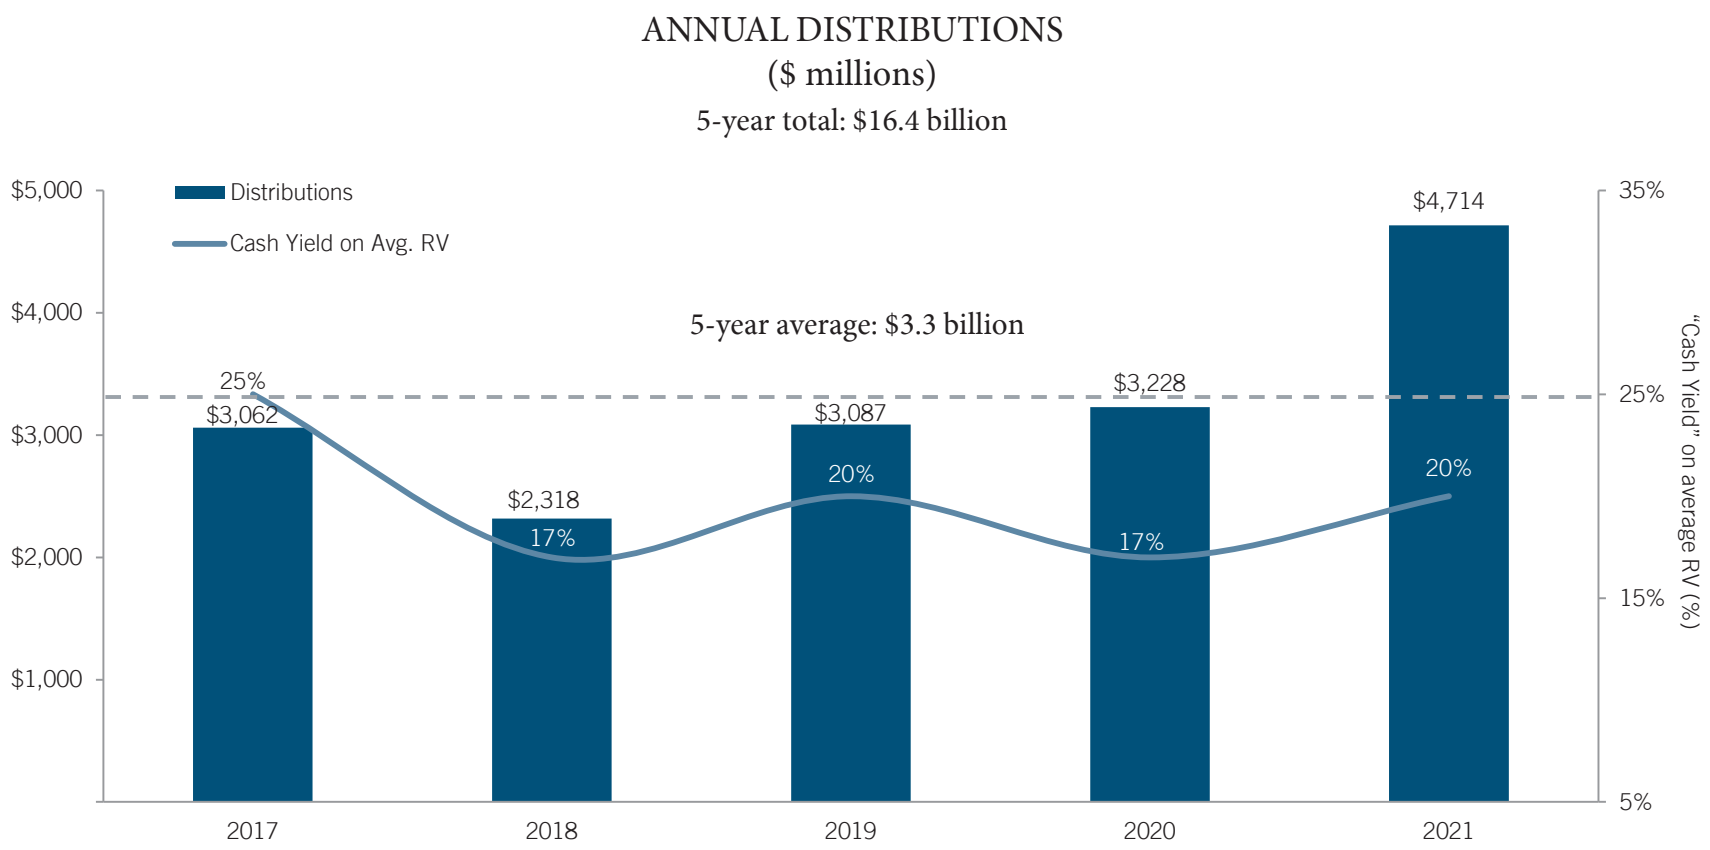
Consistent and Disciplined Commitment Pace



Sources: Preqin and Lexington research. Anonymized sponsors are selected dedicated secondary managers that Lexington encounters frequently in market, and are not necessarily the largest dedicated secondary managers or the managers most directly comparable to Lexington. Circles represent funds raised. Data excludes co-investment vehicles. Sponsors' target total capitalizations have been obtained from public sources. While Lexington believes its sources of sponsor information to be reliable, no representations are made as to the accuracy or completeness of the sponsor information herein. There can be no assurance that historical trends will continue or that Lexington or any Lexington fund will compare favorably to any third-party sponsor or fund. "Use of deal leverage" refers to asset-level leverage and does not refer to fund-level credit facilities.

Focus on Liquidity

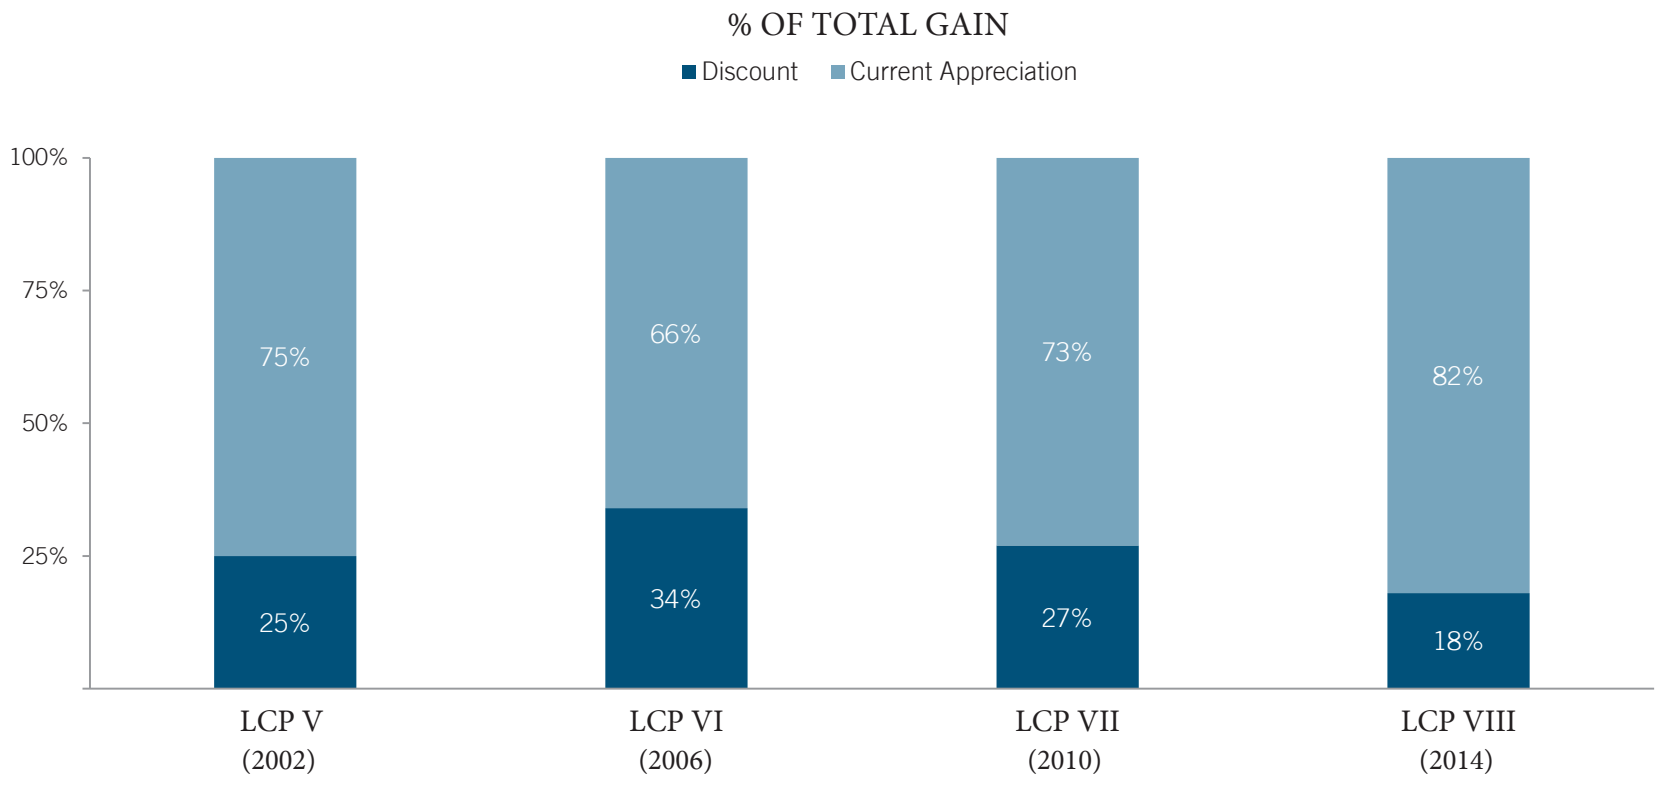
- Lexington's secondary funds have consistently made significant distributions despite market volatility
- Distributed a total of $4.7 billion to investors in 2021, representing an annual cash yield of 20% on average Reported Value
- As of March 2022, LCP IX has distributed $2.0 billion to investors, or 27% of contributed capital



Data includes distributions to the Lexington secondary funds' separate vehicles and discretionary co-invest accounts, except for the LCP IX bullet which includes distributions to LCP IX investors only. Cash yield on Average Reported Value reflects fund distributions divided by the average Reported Value as of 12/31 of the respective year. 12/31/21 Reported Value is based on underlying GP values as of 9/30/21, the latest available. To be read in conjunction with the endnotes. Past performance is not indicative of future results, and there can be no assurance that historical trends will continue.

Return Attribution: Discount and Appreciation

- In the mature global secondary funds (LCP V-VIII), purchase discount represents approximately 25%-35% of gross portfolio gain with the remaining 65%-75% attributable to asset appreciation
- Lexington adheres to a rigorous and disciplined investment process focused on identifying and acquiring high-quality assets that are poised for future growth, which generally have remaining lives of 5 – 7 years at purchase



Performance as of 12/31/21 based on underlying GP values as of 9/30/21. Past performance is not indicative of future results. LCP IX is not included in the chart above because Lexington believes the fund is too early in its life cycle for the relevant data to be considered meaningful. To be read in conjunction with the endnotes.

Projected Performance of Global Secondary Funds

- In advance of LCP X fundraising, Lexington prepared the following projections based on information as of September 2020, which are included here for informational purposes as Lexington's overall expectations have not changed materially since that time
- As shown below, certain funds' performance as of 12/31/21 exceeded their projected lifetime performance

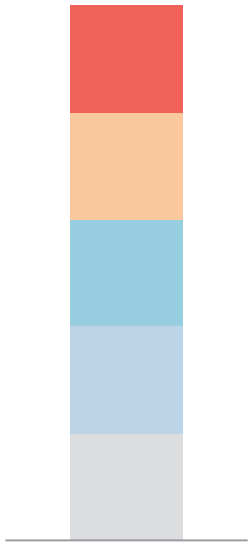
PROJECTED LIFETIME GROSS AND NET MULTIPLE: LCP V–IX

	LCP V (2002)	LCP VI (2006)	LCP VII (2010)	LCP VIII (2014)	LCP IX (2018)
Gross / Net Multiple as of 12/31/21	1.9x / 1.7x	1.5x / 1.4x	1.9x / 1.7x	1.8x / 1.7x	1.6x / 1.6x

The fund-level projections above are provided for discussion purposes only and should not be relied upon as a guarantee, promise, forecast or representation as to the actual future performance of any fund. There can be no assurance that Lexington will achieve results in line with its projections, which are based on assumptions that may not materialize. Projections for LCP IX include assumptions with respect to (i) investments that were approved by the investment committee, but had not yet been signed, representing approximately 1% of LCP IX's aggregate capital commitments in the case of this clause (i), (ii) investments that had been signed but had not yet closed, had only partially closed, or closed after September 2020, representing approximately 11% of LCP IX's aggregate capital commitments in the case of this clause (ii), and (iii) the investment of LCP IX's remaining available capital (although no specific investments had been identified for purposes of these assumptions), representing approximately 27% of LCP IX's aggregate capital commitments, in the case of this clause (iii). Accordingly, investors should attach correspondingly qualified consideration to the projections, and in particular those for LCP IX. To be read in conjunction with the endnotes, including the description of "Projected Returns." Performance as of 12/31/21 is based on underlying GP values as of 9/30/21.

Lexington's Approach to Financing and Structuring

- Lexington believes use of fund-level credit facilities and deal structuring have enabled the firm to achieve enhanced returns in the current secondary market environment, at lower levels of risk than other available financing models
  - Subscription line financing allows efficient and flexible management of cash flows to enhance value
  - Working capital nature of credit facility enables Lexington to achieve deal-level recycling targets
- To date, Lexington has chosen not to use third-party NAV-based, SPV-level, or asset-level leverage
- Investment team evaluates each transaction on an unlevered and unstructured basis



RISK SPECTRUM	DESCRIPTION	COST
SPV-Level & NAV-Based Leverage	• Loan collateralized by assets; no recourse to buyer fund • Enables investment in deals with low unstructured returns	• L+350-650+
Internal Deal Structuring	• Use of deferred purchase price and recycling for capital calls	• None
Fund-Level Facility	• Delay of LP capital calls	• L+150-200
Fund-Level Bridge Facility / Credit Line	• Short-term bridging of capital calls • Improves working capital management	• L+150-200

SPV-Level Leverage Cost: Estimate based on Lexington's own recent pricing data and conversations with lenders. Risk assessment broadly defined by the potential impact of leverage, interest costs, and amortization requirements on LP returns. "LTV" reflects expected loan-to-value ratio. To be read in conjunction with the endnotes.

Early and Consistent Cash Returns

- Due to early and consistent cash returns, investors in Lexington's secondary funds have peaked, on average, at approximately 50% drawn on their commitments, net of distributions
- On average, maximum cash at work occurs within years 3 – 5 and return of capital occurs within years 5 – 7
- Compares favorably to maximum cash at work of approximately 65% – 70% typically observed for primary funds
- LCP VIII and LCP IX utilize fund-level revolving credit facilities that allow these funds to benefit from redeployment of proceeds at the fund level which should enhance returns
- Shorter duration investment strategy providing near-term discretionary cash flow

	LCP V	LCP VI	LCP VII	LCP VIII	LCP IX
Multiple on Max. Cash at Work	2.5x	1.6x	2.4x	2.2x	NM
Net Multiple	1.7x	1.4x	1.7x	1.7x	1.6x

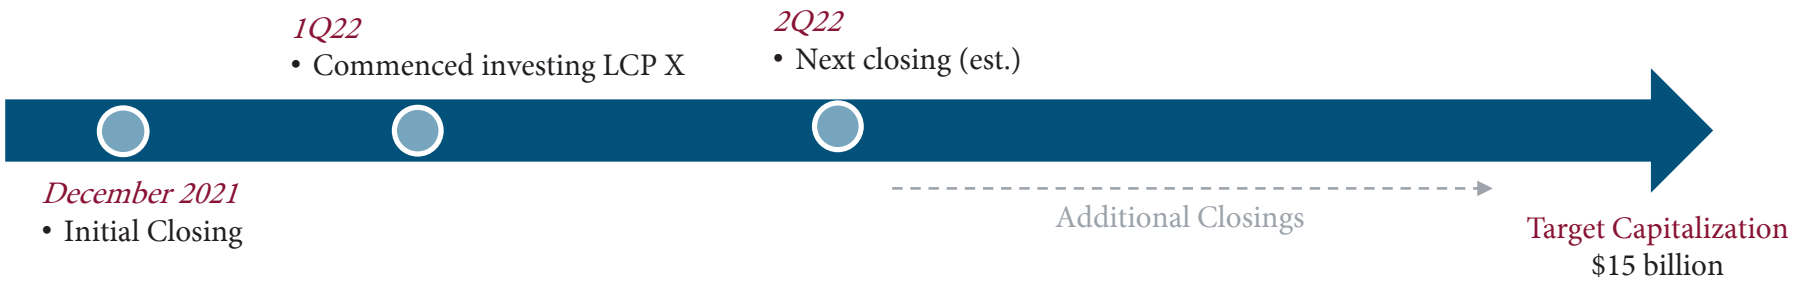
Performance as of 12/31/21 based on underlying GP values as of 9/30/21. Past performance is not indicative future results and there can be no assurance that any Lexington fund will achieve results similar to those described herein. To be read in conjunction with the endnotes, which contain additional information, including on the calculation of Maximum Cash at Work and Multiple on Max. Cash at Work.

Lexington Capital Partners X

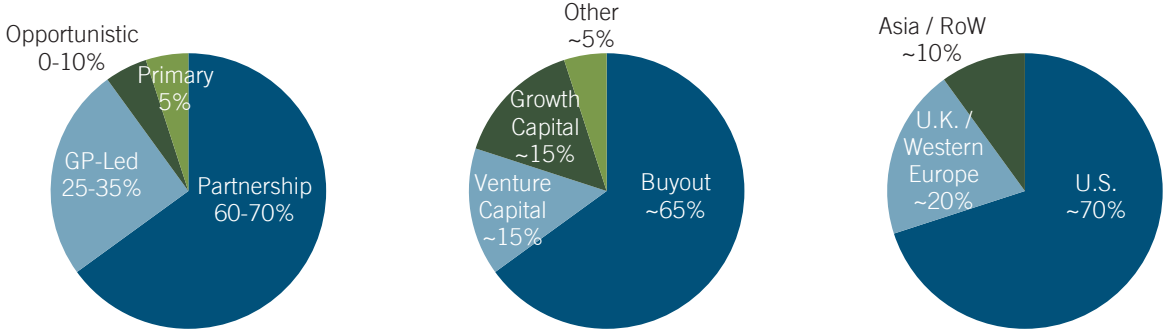
LCP X Update and Fundraising Timeline

- LCP X has commenced its investment program, committing to invest $4.6 billion in 16 secondary transactions to acquire 117 interests managed by 50 sponsors
  - Negotiated purchase price discount of 20% to Market Value; 71% invested at time of purchase, in aggregate
  - $2.2 billion revolving credit facility being utilized
- Secondary market opportunity continues to grow: $100 billion+ estimated annual opportunity over next five years
- Lexington competitively well-positioned; currently reviewing a medium-term pipeline of $84 billion of secondary opportunities
- LCP X offers investors an attractive and counter-cyclical strategy within their private equity allocations

LCP X FUNDRAISING TIMELINE



ILLUSTRATIVE TRANSACTION TYPE, SECTOR & GEOGRAPHIC BREAKDOWN



Investment activity reflects transactions that are IC approved as of 3/31/22. The amount of capital committed by LCP X to pending or committed transactions remains subject to interim activity and pending allocations through date of closing. There can be no assurances that a pending or committed deal will be consummated, or in the manner currently expected. To be read in conjunction with the endnotes. Illustrative portfolio breakdown is based on the global private investment funds acquired by Lexington's global secondary funds. Other includes Credit, Energy, and Infrastructure. There can be no assurances regarding the investment opportunities available to LCP X.

LCP X Investment Activity

As of March 31, 2022

TRANSACTION ($ millions)	PROJECT BLUE SKY	PROJECT ORANGE	PROJECT FOUNTAIN	PROJECT SILICON	PROJECT COMET	PROJECT ATLAS	< $200MM EXPOSURE (10 Deals)	TOTAL (16 Deals)

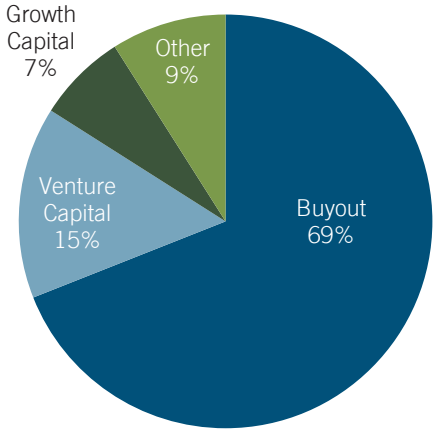
Reflects transactions that are IC approved as of 3/31/22. The amount of capital committed by LCP X to pending or committed transactions remains subject to interim activity and pending allocations through date of closing. There can be no assurances that a pending or committed deal will be consummated, or in the manner currently expected. Market Value reflects GP values at Record Date adjusted for interim activity through expected date of closing. Current Committed Status based on LCP X lifetime commitments of 135% of its $15 billion target capitalization, in accordance with the Partnership Agreement. To be read in conjunction with the endnotes, including the description of "References to Specific Investments."

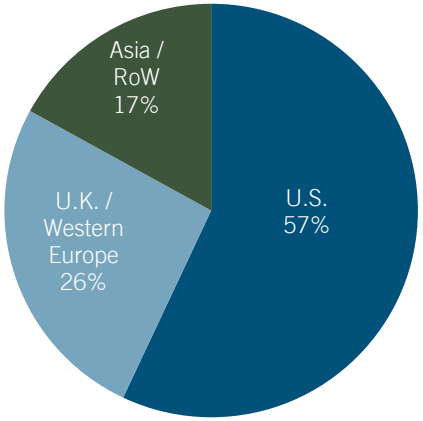
LCP X Diversification

As of March 31, 2022

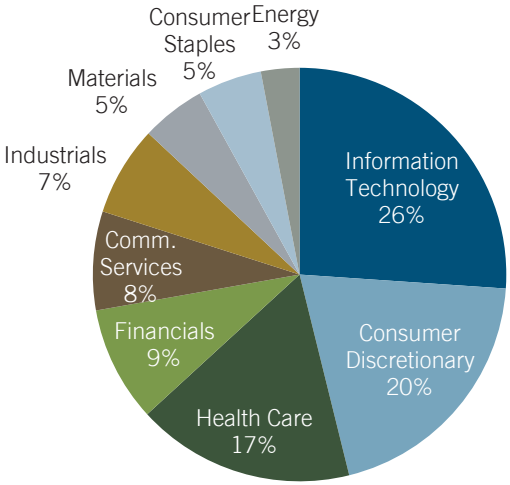
SECTOR DIVERSIFICATION



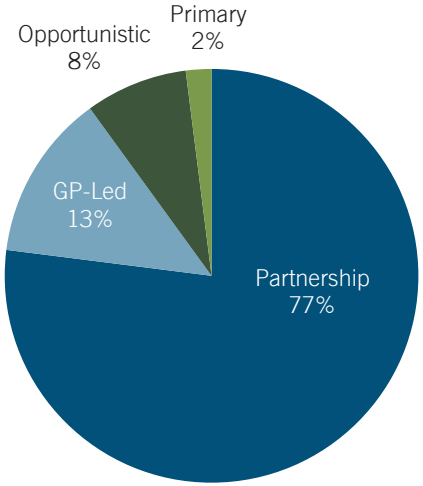
GEOGRAPHIC DIVERSIFICATION



INDUSTRY DIVERSIFICATION



TRANSACTION TYPE



Reflects transactions that are IC approved as of 3/31/22. Transactions that are not fully closed remain subject to interim activity and pending allocations through date of closing. There an be no assurances that a pending or committed deal will be consummated, or in the manner currently expected. Sector and Geographic Diversification are based on Market Value plus unfunded expected at closing. Other includes Credit, Energy, and Infrastructure. Industry Diversification is based on Market Value expected at closing. Transaction Type is based on purchase price plus unfunded expected at closing. LCP X's portfolio diversification is subject to change over time, and the figures above are not indicative of the portfolio diversification of any other Lexington fund. To be read in conjunction with the endnotes, including the note on "Diversification."

LCP X Summary of Key Terms

KEY TERMS	LCP X
Target	$15 billion
Allocation to Secondary Entities Allocation to Primary Entities	95% of committed capital Up to 5% of committed capital
Management Fee	
- Investment Period	1.0% of committed capital[1]
- Post Investment Period	0.85% of the sum of RV of portfolio investments and the lesser of aggregate unpaid commitments and reported unfunded obligations to portfolio investments[2]
Carried Interest	10.0% of investment proceeds (after return of all contributed capital, fees and expenses, and a 7% preferred return test[3]); 12.5% of investment proceeds after a 10% preferred return test[3]
Investment Period	Up to 5 years from final closing
Partnership Term	10 years with up to three 1-year extensions
GP Commitment	The lesser of $200 million and 1.5% of aggregate capital commitments to LCP X and special accounts

To be read in conjunction with the endnotes. The LCP X terms described above are not final and are subject to change. They are qualified entirely by the LCP X Partnership Agreement and the terms of the offering described in the Memorandum of LCP X. Both the Partnership Agreement and the Memorandum will be provided to prospective investors prior to commitment.

[1] The investment period management fee rate per annum is (i) for investors admitted in an early closing: 0.95% (with commitments of $10 million to less than $100 million), 0.925% ($100 million to less than $250 million), 0.90% ($250 million to less than $350 million), 0.825% ($350 million to less than $500 million); (ii) 0.75% (for investors with commitments of at least $500 million); or (iii) increased by 0.25% (for investors with commitments of less than $5 million, if any).

[2] The post-investment period management fee rate per annum is 0.6375% for investors with commitments of at least $500 million.

[3] The 7% and 10% preferred return tests in LCP X will be calculated based on all distributions of investment proceeds to LPs and assuming all remaining portfolio investments are sold for their fair market values and distributed to LPs.

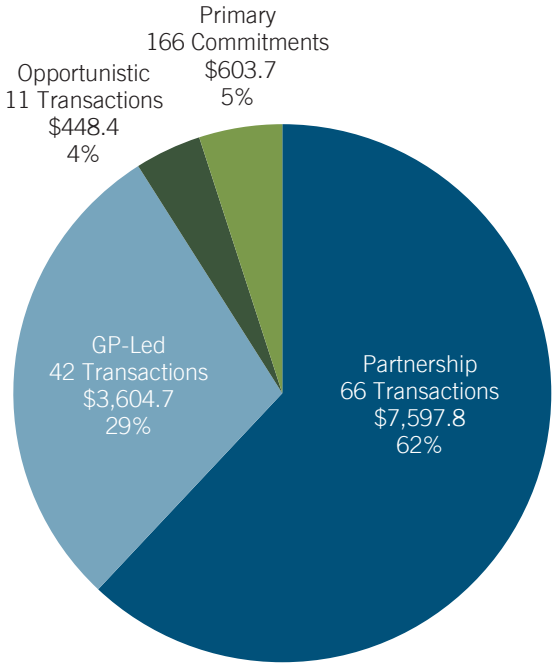
Lexington Capital Partners IX

LCP IX Is Fully Committed

As of December 31, 2021

($ millions)	LCP IX
Total Capital	$11,906.6
Vintage	2018
Net Committed Capital (as of 3/31/22)	$10,831.3
Purchase Discount $ / % (as of 3/31/22)	$2,003.8 / 17%
Invested Capital	$9,435.1
Distributions Received	$2,863.7
RV (9/30/21 GP Values)	$12,395.0
Total Value	$15,258.7
TOTAL GAIN	$5,823.6
Gross IRR / Gross Multiple	45.2% / 1.6x
Net IRR / Net Multiple	NM[1] / 1.6x
Weighted Average Age of Invested Capital	1.3 yrs

LCP IX COMPLETED TRANSACTIONS
2018 – 2022



- As of March 2022, LCP IX has closed or committed to 119 secondary transactions, acquiring 743 interests managed by 242 sponsors
  - Negotiated purchase price discount of 17% to Market Value; 74% invested at time of purchase, in aggregate
  - 73% of exposure acquired in exclusive or limited competitive transactions
- $3.2 billion revolving credit facility being utilized
- As of March 2022, $1,968 million distributed to LCP IX investors, or 27% of contributed capital

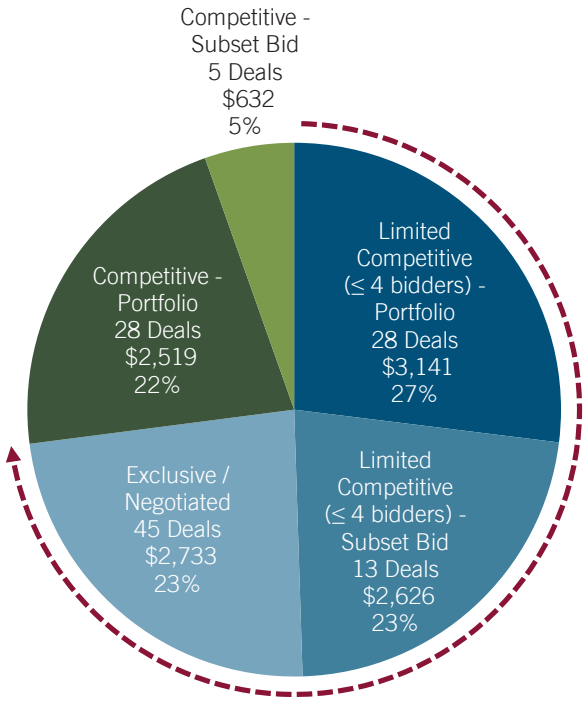
[1] LCP IX's 12/31/21 Net IRR is 82.5%, but Lexington does not consider that figure to be meaningful due to the use of a revolving credit facility. LCP IX data excludes $2,005 million of capital from separate vehicles. Certain LCP IX transactions described are not fully closed and remain subject to interim activity through date of closing. There can be no assurances that a pending or committed deal will be consummated. To be read in conjunction with the endnotes, which contain additional information, including a detailed description of the calculation of LCP IX's Net Committed Capital, the calculation of IRRs and Multiples, and the impact of credit facility usage. As of 12/31/21, $2,049.1 million of proceeds were received and applied to Partnership Obligations. As of 3/31/22, LCP IX's Gross Committed Capital, which is net of contractual commitments that are not expected to be called, is $14,275.6 million, or 120%, and LCP IX's Net Committed Capital is $10,831.3 million, or 91%. Completed transactions based on net purchase price plus unfunded at acquisition for secondary transactions that are IC approved as of 3/31/22 (net of secondary committed capital adjustments) and original commitment for primary commitments. Past performance is not indicative of future results.

LCP IX Transaction Sourcing

As of March 31, 2022

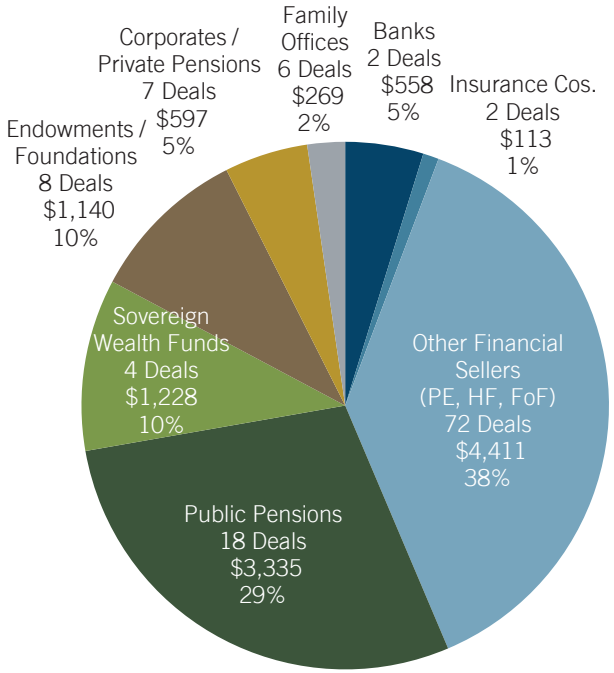
- Transactions representing 73% of exposure acquired in exclusive or limited competitive transactions

SOURCING
($ millions)



73% Exclusive/Limited Competitive

SELLER TYPE
($ millions)

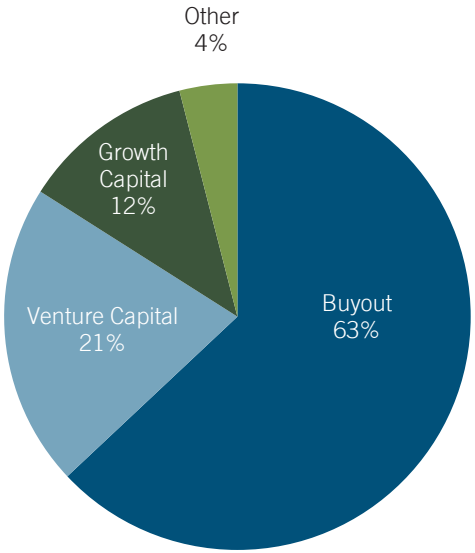


Based on net purchase price plus unfunded at acquisition for secondary transactions that are IC approved as of 3/31/22. Transactions that are not fully closed remain subject to interim activity and pending allocations through date of closing. There can be no assurances that a pending or committed deal will be consummated. Transaction count for Seller Type attributed to largest seller category for transactions involving multiple sellers. There can be no assurances as to the diversification of transaction sources for any Lexington fund.

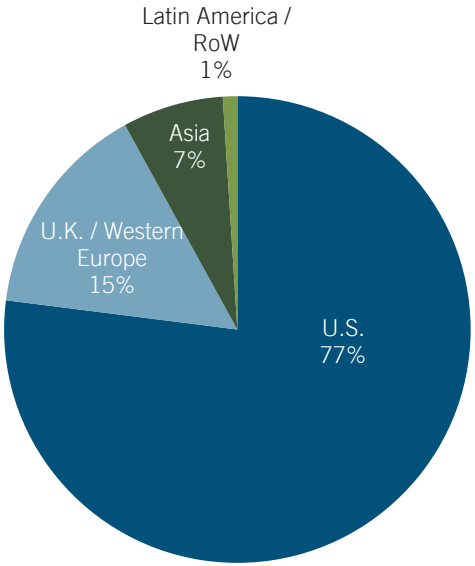
LCP IX Diversification

As of March 31, 2022

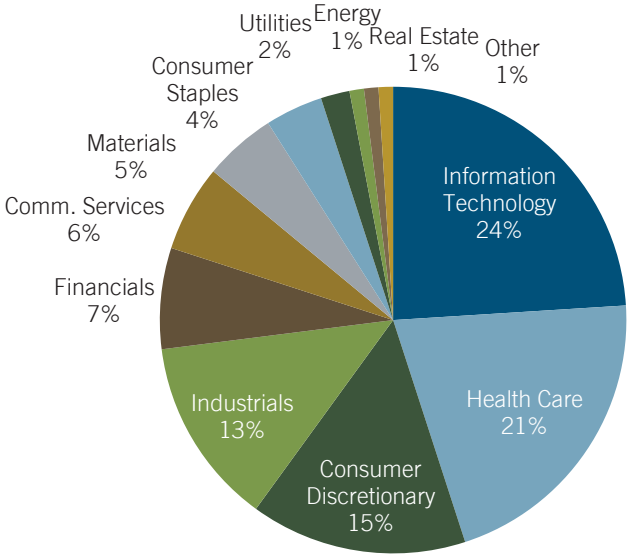
SECTOR DIVERSIFICATION



GEOGRAPHIC DIVERSIFICATION



INDUSTRY DIVERSIFICATION



Sector and Geographic Diversification are based on the underlying interests' Reported Value plus unfunded as of 9/30/21 pro forma for transactions IC approved as of 3/31/22 and represent classification at the fund level. Other includes Credit, Energy, and Infrastructure. Transactions that are not fully closed remain subject to interim activity and pending allocations through date of closing. There can be no assurances that a pending or committed deal will be consummated. Industry Diversification is based on underlying GP values as of 9/30/21. LCP IX's portfolio diversification is subject to change over time, and the figures above are not indicative of the portfolio diversification of any other Lexington fund. To be read in conjunction with the endnotes, including the description of "Diversification."

Purchase Discount ($ / %)	$682 / 29%	$238 / 12%	$353 / 15%	$731 / 15%	$2,004 / 17%

Based on net purchase price plus unfunded at acquisition for transactions that are IC approved as of 3/31/22. Transactions that are not fully closed remain subject to interim activity and pending allocations through date of closing. There can be no assurances that a pending or committed deal will be consummated. Please see the endnotes for a detailed description of the calculation of LCP IX's Net Committed Capital.

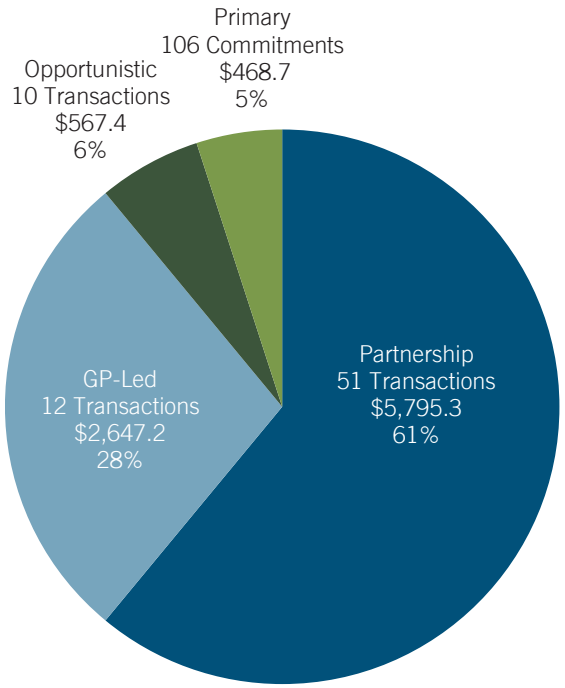
Lexington Capital Partners VIII

LCP VIII Was Fully Committed in 2018

As of December 31, 2021

($ millions)	LCP VIII
Total Capital	$9,212.1
Vintage	2014
Net Committed Capital	$9,478.6
Purchase Discount $ / %	$1,361.7 / 16%
Invested Capital	$9,218.5
Distributions Received	$9,353.8
RV (9/30/21 GP Values)	$7,414.0
Total Value	$16,767.8
TOTAL GAIN	$7,549.3
Gross IRR / Gross Multiple	19.3% / 1.8x
Net IRR / Net Multiple	20.0% / 1.7x
Weighted Average Age of Invested Capital	4.9 yrs

LCP VIII COMPLETED TRANSACTIONS
2013 – 2018



- LCP VIII completed 73 secondary transactions, acquiring 452 interests managed by 180 sponsors
  - 74% invested at time of purchase, in aggregate
  - Negotiated purchase price discount of 16% to Market Value
- $100 million revolving credit facility currently being utilized maturing in December 2022
- As of March 2022, $7,686 million distributed to LCP VIII investors, or 93% of contributed capital

To be read in conjunction with the endnotes. Total Capital for LCP VIII program is $10.1 billion including Separate Accounts. To calculate Net Committed Capital, the gross amount committed is reduced by $1,682.7 million for (i) deferred purchase price payments and other obligations of special purpose vehicles ("SPVs") formed to make investments which the general partner expects to be satisfied by proceeds generated from such investments ("SPV Obligations") and (ii) projected proceeds generated from investments that will be used by the partnership to pay outstanding and contemplated LCP VIII Facility borrowings, but which will not reduce the partnership's available capital ("Facility Obligations" and, together with SPV Obligations, "Partnership Obligations"). As of 12/31/21, $3,231.4 million of proceeds were received and applied to Partnership Obligations. Completed transactions based on net purchase price plus unfunded at acquisition for secondary transactions (net of secondary committed capital adjustments) and original commitment for primary commitments. Past performance is not indicative of future results.

LCP VIII Transaction Sourcing

- Transactions representing 90% of exposure acquired in exclusive or limited competitive transactions

Past performance is not indicative of future results. To be read in conjunction with the endnotes. See endnotes for important information relating to the calculation of IRRs and Multiples, including the impact of credit facility usage, and the Co-Managed Funds. Investment performance is as of 12/31/21 based on underlying GP values as of 9/30/21. Committed Capital for LCP IX and LMMI IV is pro forma for transactions IC approved as of 3/31/22 and includes data from transactions that are not fully closed. There can be no assurances that a pending or committed deal will be consummated.

[1] LCP I-VI, LMMI I, and the Co-Managed Funds are essentially fully distributed therefore weighted average age of invested capital no longer computed.

[2] LCP VII data includes capital from separate vehicles which pursue a substantially similar strategy and are subject to reduced fees.

[3] Aside from Total Capital, LCP VIII, LCP IX, and LMMI IV data excludes $905 million, $2,005 million, and $601 million, respectively, of capital from separate vehicles.

[4] LCP IX's 12/31/21 Net IRR is 82.5%, but Lexington does not consider that figure to be meaningful due to the use of a revolving credit facility. LCP IX's 12/31/21 Net Multiple is equal to the Gross Multiple due to the use of a revolving credit facility.

LCP IX TRANSACTION EXAMPLES

LCP IX Transaction Examples

SELLER TYPE	ASIAN BANK (Project Saturn)	U.S. PUBLIC PENSION (Project Secretariat)	SOVEREIGN WEALTH FUND (Project Prime)
YEAR	2018	2021	2019
TYPE	Partnership	Partnership	Partnership
DRIVER OF SALE	Regulatory: balance sheet de-risking	Maintain target asset allocation	Rebalance overall investment portfolio and reduce unfunded obligations
COMPETITION	Exclusive	Limited Competitive	Limited Competitive
ASSETS INVOLVED	Highly diversified portfolio of 73 LP interests managed by 30 GPs (700+ underlying assets) across multiple sectors and geographies	Diversified portfolio of 19 LP interests managed by 9 GPs (300+ underlying assets)	Diversified portfolio of 20 high-quality LP interests across multiple sectors and geographies
LEXINGTON ANGLE	Seller's short timeline and large transaction size allowed for limited capable competition; Lexington benefitted from pricing leverage, resulting in an attractive discount for a large portfolio of quality GPs	Strong counterparty reputation and ability to expeditiously and decisively provide a solution to the seller in a shortened process positioned Lexington as the only viable buyer	Short timeframe with limited capable competition; importance of GP relationships to mitigate transfer risk; and need for counterparty certainty and execution capabilities
PORTFOLIO HIGHLIGHTS	No single fund represents more than 5% of exposure; expected to generate significant near-term cash flow; 50%+ of distributions projected in the first three years	High-quality, recent vintage buyout, venture, and growth interests managed by leading GPs; highly diversified, with no single company representing more than 2% of projected distributions	Transaction was ~74% funded at closing, with 50%+ of unfunded allocated to top buyout managers; the largest single asset represents only ~2% of projected distributions
TRANSACTION STRUCTURE	Cash purchase	Cash purchase	Deferred purchase arrangement; 25% at close, 75% in 12 months
MARKET VALUE + UNFUNDED	$1.4 billion	$941 million	$873 million

Selected transaction examples in this Presentation may not be representative of all transactions of a given type or of investments generally, and are intended to be illustrative of some investment techniques or transaction types that may be used by a Lexington fund. Market Value plus Unfunded Commitments represented at close. See page 53 for more information regarding LCP IX's investment activity. To be read in conjunction with the endnotes, including the description of "References to Specific Investments."

LCP IX Transaction Examples

SELLER TYPE	U.S. ENDOWMENT (Project Kale)	SOVEREIGN WEALTH FUND (Project Fusion)	CANADIAN PUBLIC PENSION (Project Knight)
YEAR	2021	2020	2020
TYPE	Partnership	Partnership	Partnership
DRIVER OF SALE	Portfolio rebalancing to generate liquidity	Maintain target asset allocation	Opportunistic seller looking to exit a number of non-core relationships
COMPETITION	Limited Competitive	Limited Competitive	Limited Competitive
ASSETS INVOLVED	Highly diversified portfolio of 68 LP interests managed by 25 GPs (700+ underlying assets)	Interests in high-quality buyout funds and Greenspring Associates growth / venture focused managed accounts (21 underlying funds managed by 16 GPs)	Diversified portfolio of 11 LP interests managed by 8 high-quality North American and European GPs
LEXINGTON ANGLE	Sizable growth and venture exposure and existing relationship with the seller positioned Lexington for success as a familiar, trusted counterparty	Differentiated ability to diligence the managed accounts via strong relationship with the manager and broad network of growth and venture relationships	Large diversified portfolio, motivated seller, differentiated ability to diligence given 100% GP coverage, and insight into an iterative and fast-moving process created favorable transaction dynamics
PORTFOLIO HIGHLIGHTS	High-quality growth and venture fund interests; underlying companies weighted towards enterprise software, internet/consumer, and life sciences/digital health industries	Well-balanced interests managed by GPs that are rarely available on the secondary market; recent fund vintages provide opportunity for meaningful near-term value appreciation	Largest sector concentration in information technology (24%) and healthcare (15%); weighted average fund vintage of 2016 provides attractive unfunded exposure to blue chip managers
TRANSACTION STRUCTURE	Deferred purchase arrangement; 33% at close, 67% in 9 months	Cash purchase	Cash purchase
MARKET VALUE + UNFUNDED	$682 million	$578 million	$543 million

Selected transaction examples in this Presentation may not be representative of all transactions of a given type or of investments generally, and are intended to be illustrative of some investment techniques or transaction types that may be used by a Lexington fund. Market Value plus Unfunded Commitments represented at close. See page 53 for more information regarding LCP IX's investment activity. To be read in conjunction with the endnotes, including the description of "References to Specific Investments."

TOTAL NET COMMITTED CAPITAL	**$10,831.3**

Transactions shown above reflect committed transactions >$350mm. Remaining exposure includes data from transactions that are not fully closed. There can be no assurances that a pending or committed deal will be consummated. Market Value reflects GP values at Record Date adjusted for interim activity through actual or expected date of closing and stock price of public companies at closing. Secondary Committed Capital excludes $836.7 million of contractual commitments that are not expected to be called. Please see the endnotes for a detailed description of the calculation of LCP IX's Net Committed Capital. To be read in conjunction with the endnotes, including the description of "References to Specific Investments."

Endnotes

This presentation (the "Presentation") related to Lexington Capital Partners X, L.P. (together with its parallel vehicles, "LCP X" or the "Partnership") and its associated vehicles is being provided to certain selected institutional and sophisticated individual investors in one-on-one presentations on a confidential basis for informational and discussion purposes only and does not constitute an offer to sell or a solicitation of an offer to purchase a limited partner interest in the Partnership. Any such offer or solicitation shall be made only pursuant to the confidential private placement memorandum (as modified, amended, restated or supplemented from time to time, the "Memorandum"), which describes certain risks related to an investment in the Partnership and which qualifies in its entirety the information set forth herein. The Memorandum, including the risk factors and potential conflicts of interest described therein, should be read carefully prior to investment. Capitalized terms used throughout this document shall have the meanings ascribed to such terms in the Limited Partnership Agreement or as otherwise defined herein. The information contained herein should be treated in a confidential manner and may not be reproduced or used in whole or in part for any other purpose. Each person accepting this Presentation hereby agrees to return it promptly upon request. Lexington Partners L.P. (together with its affiliated entities, "Lexington") does not make any representation or warranty, express or implied, as to the accuracy or completeness of the information contained herein and nothing contained herein shall be relied upon as a promise or representation whether as to the past or future performance. Lexington does not have or undertake any obligation to update or keep current the information contained herein. This Presentation includes non-public information regarding Lexington and certain other issuers that could be considered material. By accepting this Presentation, the recipient agrees that it will not use, and it will cause its directors, partners, officers, employees, and representatives not to use, any information herein in a manner inconsistent with applicable securities laws including, for example, transactions in securities based on its possession of material non-public information.

Unless otherwise indicated, investment performance information contained herein is the investment performance as of December 31, 2021 unaudited which is based upon the aggregate value of the Lexington Secondary Fund's interests, as applicable, in each underlying private investment fund as most recently reporting by the sponsors thereof, (i.e., September 30, 2021).

During the period 1990 to 1995, Lexington helped organize and provide investment services to six secondary funds with Landmark Partners Inc. ("Landmark") (collectively, the "Co-Managed Funds"): Landmark Venture Partners, L.P. ("LVP"), Landmark Equity Partners II, L.P. ("LEP II") and Landmark Equity Partners V, L.P. ("LEP V"), for the purchase of secondary venture capital interests; Landmark Equity Partners III, L.P. ("LEP III") and Landmark Equity Partners IV, L.P. ("LEP IV"), for the purchase of secondary buyout interests; and Landmark Mezzanine Partners, L.P. ("LMP"), for the purchase of secondary mezzanine interests. LVP, LEP II and LEP V are collectively referred to as the "Co-Managed Venture Capital Funds." LEP III, LEP IV and LMP are collectively referred to as the "Co-Managed Buyout and Mezzanine Funds." The aggregate Net IRR and Net Multiple for the Lexington Secondary Funds as of December 31, 2021 is 17.3% and 1.6x, respectively. Excluding the Co-Managed Funds formed prior to the establishment of Lexington as an independent firm in 1994 (for which only certain current and former Lexington investment professionals were involved in investment decisions and who may not be involved in investment decisions for more recent funds, including the Partnership), the aggregate Net IRR and Net Multiple for the Lexington Secondary Funds as of December 31, 2021 is 14.3% and 1.6x, respectively. Lexington was established in 1994 as an independent entity by certain principals and employees of Landmark. Lexington assumed primary, but not exclusive, responsibility to source investment opportunities and make investment recommendations to the respective general partner entities of the Co-Managed Buyout and Mezzanine Funds. Landmark assumed primary, but not exclusive, responsibility to source investment opportunities and make investment recommendations to the respective general partner entities of the Co-Managed Venture Capital Funds. The investment performance of the Co-Managed Funds contained herein was achieved under different market conditions and with involvement from investment professionals that have not and will not be involved with the investment activities of the Partnership. In addition, the Co-Managed Venture Capital Funds and LMP pursued investment strategies that were materially different than the investment strategy of existing and future Lexington-sponsored funds, including the Partnership. Accordingly, such performance information is provided solely for background purposes, should be given qualified consideration and should not be considered as an indication of future performance by the Partnership. The Lexington Secondary Funds include: the Co-Managed Funds, Lexington Capital Partners I, L.P. ("LCP I"), Lexington Capital Partners II, L.P. ("LCP II"), Lexington Capital Partners III, L.P. ("LCP III"), Lexington Capital Partners IV, L.P. ("LCP IV"), Lexington Capital Partners V, L.P. ("LCP V"), Lexington Capital Partners VI, L.P. ("LCP VI"), Lexington Capital Partners VII, L.P. and associated vehicles (collectively, "LCP VII"), Lexington Capital Partners VIII, L.P. and its parallel vehicle ("LCP VIII"), Lexington Capital Partners IX, L.P. and its parallel vehicles ("LCP IX"), Lexington Capital Partners X, L.P. and its parallel vehicles ("LCP X"), Lexington Middle Market Investors, L.P. ("LMMI I"), Lexington Middle Market Investors II, L.P. ("LMMI II"), Lexington Middle Market Investors III, L.P. ("LMMI III"), Lexington Middle Market Investors IV, L.P. ("LMMI IV"), and Lexington Emerging Partners, L.P. ("LEP").

As used herein, LCP VII includes capital from separate vehicles which pursue a substantially similar strategy and are subject to reduced fees. Aside from Total Capital and unless otherwise stated, LCP VIII, LCP IX, and LMMI IV data excludes $905 million, $2,005 million, and $601 million, respectively, of capital from separate vehicles.

Unless otherwise indicated, the vintage year referenced for each Lexington fund is the year of first closing; provided that in the event the year of first closing had no meaningful investment, the vintage year is generally determined by the year in which amounts invested exceed 10% of the fund's capital.

The past performance information contained herein is not necessarily indicative of future results and there can be no assurance that the Partnership will achieve comparable results or that the Partnership will be able to implement its investment strategy, achieve its investment objectives, or avoid substantial losses. Prospective investors are cautioned not to rely on the prior performance information set forth herein in making a decision whether or not to purchase an interest. Unless otherwise explicitly stated, the prior performance information contained herein has not been audited or verified by any independent party and is not necessarily representative of the returns that may be received by an investor in the Partnership or any other Lexington fund. Certain factors exist that may affect comparability between the Partnership and affiliated investment funds including, among others, differences with respect to fees and expenses and the payment of a carried interest (which may be different for the Partnership) as well as other factors. For example, all of the Partnership's investments will be subject to the same level of advisory fees and carried interest at the level of the Partnership, while its

Endnotes

predecessor funds' investments in Primary Funds were subject to reduced investment advisory fees and no carried interest. Except as otherwise explicitly noted, all information contained herein describing prior performance is on a gross basis before giving effect to management fees, the general partner's carried interest, taxes, transaction costs and other expenses to be borne by investors, the application of which would reduce such rates of return. See "Investment Performance" on page 46 for Net IRR information. Investors may suffer the loss of their entire investment. The information provided in these materials is illustrative and no assurance is given that any indicated returns, performance or results will be achieved.

There can be no assurance that historical trends presented, referenced or implied herein will continue during the life of any Lexington fund or investment.

Certain information contained in this Presentation has been obtained from sources outside Lexington. While such information is believed to be reliable for purposes used herein, no representations are made as to the accuracy or completeness thereof. Unless otherwise indicated, public market index returns have been calculated using a "public market equivalent approach" whereby cash flows into and out of private equity funds are treated as investments and sales in the public market index, interim balances are carried forward at riskless rates, and the resulting ending value is treated as a measure of performance. The returns for the public market index have been calculated without dividend reinvestment. The market volatility, liquidity, and other characteristics of private equity investments are materially different from those of the public markets.

Statements contained in this Presentation (including those relating to current and future market conditions and trends, in respect thereof) that are not historical facts are based on Lexington's current expectations, estimates, projections, opinions, and/or beliefs. Certain information contained in this Presentation constitutes "forward-looking statements," which can be identified by the use of forward-looking terminology such as "may," "will," "should," "could," "expect," "anticipate," "project," "estimate," "intend," "continue," "target," "pro forma," "plan" or "believe" or the negatives thereof or other variations thereon or comparable terminology. Due to various risks and uncertainties, actual events or results or the actual performance of the Partnership and any other Lexington fund may differ materially from those reflected or contemplated in such forward-looking statements. Moreover, no assurance can be given that the events, views, conditions, trends or themes described in this presentation will occur or continue, particularly since they will often depend upon future events outside of the control of Lexington.

Franklin Templeton Acquisition: Lexington announced on November 1, 2021 that it had entered into an agreement under which Franklin Resources, Inc., a global asset investment organization with subsidiaries operating as Franklin Templeton ("Franklin"), would acquire 100% of the firm from the current owners. The transaction closed on April 1, 2022. In connection with the transaction, Lexington's active team is being granted a 25% ownership stake in Lexington, subject to vesting terms.

Endnote to pages 27, 34, 38, and 53: To calculate Net Committed Capital, LCP IX's gross committed capital (which is net of $836.7 million of contractual commitments that are not expected to be called) is reduced by $3,444.3 million as of 3/31/22 for (i) deferred purchase price payments and other obligations of special purpose vehicles ("SPVs") formed to make investments which the general partner expects to be satisfied by proceeds generated by such investments ("SPV Obligations"), and (ii) projected proceeds generated from investments that will be used by the partnership to pay outstanding and contemplated LCP IX Facility borrowings, but which will not reduce the partnership's available capital ("Facility Obligations" and, together with SPV Obligations, "Partnership Obligations"). As of 12/31/21, $2,049.1 million of proceeds were received and applied to Partnership Obligations. As of the fourth quarter of 2021, Lexington has adjusted its projections relating to Facility Obligations and increased the amount of proceeds expected to be applied to Facility Obligations by $1,423.4 million in aggregate, which will result in the partnership being allocated a greater portion of new investments than would otherwise be the case, and in separate vehicles in the LCP IX program being allocated a smaller portion of new investments than would otherwise be the case.

Endnote to page 30: Current Committed Status based on LCP X lifetime commitments of 135% of its $15 billion target capitalization, in accordance with the Partnership Agreement.

Endnote to page 27: A fund's Cash at Work percentage is calculated by dividing the fund's aggregate LP contributed capital net of distributions by the fund's total LP committed capital, and a fund's Maximum Cash at Work percentage reflects the high point of that ratio. For purposes of these calculations, capital contributions and distributions are calculated on a cumulative, quarterly basis. Multiple on Max. Cash at Work is provided for illustrative purposes only, and is calculated by dividing total LP distributions net of LP contributed capital since the date the fund reached its Maximum Cash at Work percentage plus LP Partners' Capital as of 12/31/21 by the fund's Maximum Cash at Work. The Multiple on Max. Cash at Work shows the maximum effective net multiple that might have been achieved if an investor had funded its capital contributions to the fund with distributions received from the fund, but it is not indicative of the actual performance achieved by any fund or investor. Each fund's Net Multiple as of 12/31/21 is shown in the "Net Multiple" line of the table.

Estimates for Maximum Cash at Work of primary funds are based on Lexington's Proprietary Database. The Maximum Cash at Work % for LCP VIII is calculated (and the percentage for LCP IX will be calculated) based on LP committed capital of the respective fund, which is gross of the LP portion of Adjustments to Secondary Committed Capital as described in the endnotes and page 40 for LCP IX and LCP VIII, respectively. This methodology results in a lower percentage than if Maximum Cash at Work % had been calculated based on the respective fund's original LP committed capital. LCP VIII's Maximum Cash at Work % based on total LP commitments, without Adjustments to Secondary Committed Capital, is 53%. LCP IX's Maximum Cash at Work % is presented as an estimate of the fund's ultimate percentage, and its Multiple on Max. Cash at Work is shown as NM because the fund is early in its life and Lexington does not believe it has reached its Maximum Cash at Work % yet.

Endnotes

Credit Facilities: Lexington put in place a revolving credit facility (the "LCP X Facility") at the beginning of LCP X's investment period in the amount of $2.2 billion. Lexington intends to increase the size of the LCP X Facility in subsequent closings to an amount not to exceed 35% of total Capital Commitments at any point in time. The stated maturity date of the LCP X Facility is January 14, 2026. As a result of the revolving nature of the LCP X Facility, on a cumulative basis, aggregate borrowings over the life of the LCP X Facility are expected to exceed 35% of aggregate capital commitments. Advances under the LCP X Facility are expected to generally bear interest at a rate per annum equal to SOFR plus 1.90% (2.19% as of 3/31/22). The general partner of LCP X currently intends to utilize the LCP X Facility for the duration of its term to efficiently manage the LCP X acquisition program and working capital.

Lexington put in place a revolving credit facility (the "LCP IX Facility") at the beginning of LCP IX's investment period in the amount of $1.75 billion. As of March 6, 2020, Lexington increased the size of the LCP IX Facility to $3.2 billion in the aggregate and may increase the size of the facility to an amount not to exceed 30% of total Capital Commitments at any point in time. The stated maturity date of the LCP IX Facility is October 21, 2022, with a one-year extension option. As a result of the revolving nature of the LCP IX Facility, on a cumulative basis, aggregate borrowings over the life of the LCP IX Facility are expected to exceed 30% of aggregate capital commitments. Advances under the LCP IX Facility are expected to generally bear interest at a rate per annum equal to LIBOR plus 1.50% (2.46% as of 3/31/22). As of March 31, 2022, the LCP IX Facility has an outstanding balance of $2.1 billion. Through March 31, 2022 on a cumulative basis, LCP IX has borrowed approximately $4.9 billion on the LCP IX Facility and repaid approximately $2.8 billion. The general partner of LCP IX currently intends to utilize the LCP IX Facility for the duration of its term to efficiently manage the LCP IX acquisition program and working capital.

LCP VIII has a revolving credit facility (the "LCP VIII Facility") that, as of February 8, 2022, allows for maximum outstanding borrowings of $100 million and bears interest at SOFR plus 1.90% (2.19% as of 3/31/22). The LCP VIII Facility's current maturity date is December 16, 2022. Prior to stepping down to a $100 million working capital facility in February of 2021, for a one-year period the LCP VIII Facility allowed for maximum borrowings of $200 million; for the one-year period prior to that, $300 million; and for the one-year period prior to that, $1.95 billion. Prior to that, the LCP VIII Facility allowed for maximum borrowings of $2.25 billion. As a result of the revolving nature of the LCP VIII Facility, through March 31, 2022 on a cumulative basis, LCP VIII has borrowed approximately $5.2 billion on the LCP VIII Facility and repaid approximately $5.1 billion. Of this $5.2 billion, approximately $3.3 billion represents borrowing for the purpose of interim financing and covering the Investment Advisory Fee. The general partner of LCP VIII currently intends to utilize the LCP VIII Facility for the duration of its term to efficiently manage working capital.

LMMI IV has a revolving credit facility (the "LMMI IV Facility") that currently allows for maximum borrowings of $262 million and bears interest at LIBOR plus 2.00% (2.96% as of 3/31/22). The stated maturity date of the LMMI IV Facility is December 2, 2022. Prior to stepping down to a $262 million revolving credit facility in December of 2021, the LMMI IV Facility most recently allowed for maximum borrowings of $524 million; for the one-year period prior to that, $611 million; and for the one-year period prior to that, $720 million. As of March 31, 2022, the LMMI IV Facility has an outstanding balance of $212 million. As a result of the revolving nature of the LMMI IV Facility, through March 31, 2022 on a cumulative basis, LMMI IV has borrowed approximately $1.15 billion on the LMMI IV Facility and repaid approximately $939 million. The general partner of LMMI IV currently intends to utilize the LMMI IV Facility for the duration of its term to efficiently manage the LMMI IV acquisition program and working capital.

Lexington put in place a working capital facility for LMMI III (the "LMMI III Facility") in September of 2012 in the amount of $35 million. After the fund's final closing, the line was increased to $150 million and subsequently increased to $200 million. In May of 2019, the line of credit matured and the fund entered into a new line of credit with a stated maturity date of May 17, 2022. The LMMI III Facility currently allows for maximum borrowings of $100 million and bears interest at LIBOR plus 1.50% (2.46% as of 3/31/22). As of March 31, 2022, the LMMI III Facility has an outstanding balance of $30 million. The general partner of LMMI III currently intends to utilize the LMMI III Facility for the duration of its term to efficiently manage working capital.

Lexington's Proprietary Database: Lexington has assembled a proprietary database, which is compiled from various sources, including, without limitation: third party agents, publications, public filings, industry sponsors and market participants. Lexington's database includes over 48,000 private equity and alternative interests.

Discount: As used herein, "discount to market value" and "purchase discount" shall mean the difference between purchase price and Market Value except for LMMI I and LMMI II for which purchase discount is to contributed capital. Unless otherwise indicated, "Market Value" means the value reported by the general partner of each underlying private investment fund at the Record Date, adjusted to reflect (i) interim activity between the Record Date and the date of closing of the purchase and sale, (ii) the stock price of publicly traded companies on the date of closing, and (iii) in certain instances, adjustments to private company valuations based on more recent general partner valuations subsequent to the Record Date. "Record Date" means the quarter or period-end date of the financial report of the underlying private investment fund that has been agreed upon with the seller to be used in a secondary acquisition. Industry Average discount estimates are based on data from Lexington's Proprietary Database of secondary transactions. Secondary transaction data is analyzed to estimate industry average discounts. Although Lexington's data includes over 48,000 private equity interests, Lexington's industry average discount estimates do not reflect all secondary transactions in a given period and may differ materially from actual industry average discounts in any such period. In order to provide a meaningful basis for comparison against Lexington discounts (which are adjusted to reflect activity between the Record Date and the date of closing – see "Discount" above) such industry average discounts are adjusted to take into account movement in NAV consistent with broader markets between the Record Date and the date of closing. This adjustment is applied using an estimated appreciation equal to the average of (i) 2.5%, (ii) performance of the S&P 500 over the applicable time period and (iii) the industry average discounts without adjustment.

Reported Value: "Reported Value" is typically the aggregate value of the Lexington Secondary Fund's interests, as applicable, in such underlying private equity fund as most recently reported by the general partners thereof as of 9/30/21 increased for cash contributions paid to, and decreased for realized cash proceeds received from, such underlying investment funds for the intervening period through 12/31/21, provided that the Reported Values for LCP VII, LCP VIII, LCP IX, LMMI III, LMMI IV, and LEP are net of deferred purchase price obligations of NA, NA, $185.3 million, NA, $13.4 million, and NA, respectively, and other assets of $31.8 million, $112.6 million, $288.8 million,

Endnotes

$5.4 million, $25.5 million, and $1.8 million, respectively, as of 12/31/21. The Reported Value of LCP VIII reflects shares of Moonpig at the closing price of £3.75, shares of Compass at the closing price of $9.09, shares of Keurig Dr. Pepper at a closing price of $36.86, as well as shares of Krispy Kreme, Inc. at a closing price of $18.92 as of 12/31/21. In addition, any portfolio acquisitions that have been made during the current quarter have been included at their fair value, in accordance with U.S. GAAP. Reported Values are net of all fees, expenses and "carried interest" borne by investors in the underlying private equity funds, but do not reflect the management fees, "carried interest," taxes and other expenses to be borne by investors in the applicable Lexington partnership, which will reduce returns and, in the aggregate, are expected to be substantial. The actual returns on investments for which a Reported Value has been used to calculate Gross IRRs and Net IRRs will depend on, among other factors, the value of the assets and market conditions at the time of disposition of each underlying investment of the applicable underlying fund, which may differ from assumptions of the general partners of the underlying funds on which the Reported Value is based. Accordingly, the actual realized returns on these unrealized investments may differ materially from Reported Values and there can be no assurance that unrealized investments will be realized at the valuations shown.

Distributions Received: "Distributions Received" for LCP VII excludes $511.7 million of distributions received by SPVs in respect of underlying investments ("SPV Distributions") applied to SPV Obligations and not distributed to LCP VII. Distributions Received for LCP VIII excludes $1,542.9 million of SPV Distributions applied to SPV Obligations and not distributed to LCP VIII, but includes $1,688.5 million of distributions applied to Facility Obligations. Distributions Received for LCP IX excludes $1,057.7 million of SPV Distributions applied to SPV Obligations and not distributed to LCP IX, but includes $991.4 million of distributions applied to Facility Obligations. Distributions Received for LMMI III excludes $78.3 million of SPV Distributions applied to SPV Obligations and not distributed to LMMI III, but includes $240.8 million of distributions applied to Facility Obligations. Distributions Received for LMMI IV excludes $146.8 million of SPV Distributions applied to SPV Obligations and not distributed to LMMI IV, but includes $227.7 million of distributions applied to Facility Obligations. Distributions Received for LEP excludes $18.3 million of SPV Distributions applied to SPV Obligations and not distributed to LEP.

Gross IRR and Net IRR; Gross Multiple and Net Multiple: "Gross IRR" and "Net IRR" mean an aggregate, compound, annual, gross or net, as applicable, internal rate of return on investments. Such Gross IRRs and Net IRRs are calculated using Reported Value and on the basis of the actual timing of cash inflows and outflows between the underlying Lexington Secondary Fund interests and the applicable Lexington partnership or SPV (Gross IRR), except for the Co-Managed Funds as stated below, and between the applicable Lexington Secondary Fund and its limited partners (Net IRR), aggregated monthly (Co-Managed Funds, LCP I–V, and LMMI I) or daily (LCP VI–IX, LMMI II–IV, and LEP), and the returns are annualized; provided that in the case of Gross IRRs, cash inflows and outflows are aggregated daily for LCP I–IX, the Middle Market Secondary Funds, and LEP. There can be no assurance that unrealized investments will be realized at the Reported Values. Gross IRRs and Gross Multiples of LCP I–IX, the Middle Market Secondary Funds, and LEP do not reflect the management fees, "carried interest," taxes, and other expenses to be borne by investors in the applicable Lexington partnership, which will reduce returns and, in the aggregate, are expected to be substantial. However, such Gross IRRs and Gross Multiples are net of all fees, expenses and "carried interest" borne by investors in the underlying private equity funds. Gross IRRs and Gross Multiples of the Co-Managed Funds are on the basis of the actual timing of cash inflows and outflows between the applicable Co-Managed Fund and its limited partners and general partner, and do not reflect the "carried interest" and taxes to be borne by investors in the applicable Co-Managed Fund, which will reduce returns and, in the aggregate, are expected to be substantial, but are net of management fees and other expenses. Such Gross IRRs and Gross Multiples are also net of all fees, expenses, and "carried interest" borne by investors in the underlying private equity funds. Gross and Net IRRs and Multiples may also reflect the reinvestment of certain dividends, gains, and other portfolio earnings. Net IRRs and Net Multiples are after all management fees, carried interest, taxes (but do not include taxes or withholdings incurred by investors directly), and other expenses. As described herein, calculations of Gross IRRs and Net IRRs in this Presentation utilize different payment dates, and investors should account for this when comparing Gross IRRs to Net IRRs. Calculations of Net IRRs and Net Multiples herein are at the investor level and use the date of capital contributions by investors to the applicable Lexington fund and the date of distribution of investment proceeds from such Lexington fund to the investors, whereas calculations of Gross IRRs and Gross Multiples herein are at the fund level and use the date of the relevant investment made by such Lexington fund without regard to whether the investment was initially funded by investor contributions or by borrowing under a revolving credit facility or by any other manner, and the date that such Lexington fund receives investment proceeds from such investment. This treatment also applies in instances where a fund utilizes borrowings under a fund's revolving credit facility in advance of receiving capital contributions from limited partners to repay any such borrowings and related interest expense. As a result, use of a revolving credit facility will result in a higher reported IRR than if the facility had not been utilized and instead such limited partners' capital had been contributed at the inception of an investment. As of 12/31/21, the Net IRRs of the funds had been calculated using the date of each investment rather than the date of contribution by fund investors, the Net IRRs would be lower since internal rate of return calculations are time-weighted and the relevant calculations would incorporate longer periods of time during which capital is deployed. If the Net IRRs with respect to LCP VIII, LCP IX, LMMI III, and LMMI IV had been calculated using the date of each investment rather than the date of contribution by fund investors (and excluding any fees and expenses related to fund borrowings as well as any capital calls made exclusively to pay down fund borrowings), then the Net IRRs would have been 14.5%, 32.8%, 15.6%, and 16.4%, respectively. "Gross Multiple" equals Total Value divided by Invested Capital. Calculations of Gross IRRs and Gross Multiples for LCP VII, LCP VIII, LCP IX, LMMI III, LMMI IV, and LEP are net of SPV Distributions that have been utilized for the purpose of funding SPV Obligations in respect of transactions entered into through special purpose vehicles because such distributions have been excluded from both total invested capital and total distributions received, one effect of which is to increase gross returns relative to what they would have been had such distributions been included in both invested capital and distributions received. Lexington Secondary Funds with remaining deferred purchase price installments (i.e., LCP IX and LMMI IV) do not take into account any unfunded portion of deferred purchase price and, accordingly, Reported Value (in the case of Gross Multiples) and terminal value (in the case of Gross IRRs) are reduced by the amount of such unfunded deferred purchase price. Net IRRs and Net Multiples are after all estimated management fees, organization expenses, and "carried interest." "DPI" reflects cumulative distributions relative to invested capital. "NM" is used to indicate that certain performance metrics for recent vintage funds or investments are generally considered not to be meaningful. Unless otherwise indicated, aggregated Net IRR figures include LCP IX cash flows.

Endnotes

Diversification: Lexington performs a detailed analysis of the Lexington funds' underlying portfolios in order to determine the underlying diversification of the portfolios, as well as Lexington's implied look through valuation of each of the respective holdings. This review was most recently conducted based on 12/31/21 reported values (9/30/21 underlying sponsor values). Lexington utilizes the Global Industry Classification Standard (GICS) as the basis for the underlying company level diversifications. The amounts represent Lexington's implied look through valuation of each of the underlying portfolio companies as a percent of Lexington's implied look through valuation of all of the companies comprising the underlying portfolio, diversified by sector. This analysis excludes Fund of Funds. Certain information that contributed to this analysis has been obtained from funds in which the Lexington funds have invested and the sponsors of such funds. Lexington has not independently verified this information, and no representation or warranty is made, expressed or implied, as to the accuracy of the information provided.

Investment Activity: Certain information for LCP X, LCP IX, and LMMI IV is presented pro forma for transactions that are approved by the applicable investment committee but not yet closed as of 3/31/22 in order to provide the latest available data. Certain transactions described are not fully closed and remain subject to interim activity through date of closing. There can be no assurances that a pending or committed deal will be consummated at all, or at the price or on the terms Lexington expects.

Transaction Type: Transaction type classifications contained herein have been made by Lexington based on its assessment of the transactions' characteristics. Certain transactions have characteristics of more than one category, and Lexington has made a good faith effort to allocate each such transaction to the most appropriate category. However, reasonable persons could disagree with one or more of Lexington's classifications, including but not limited to its classifications of the transactions described in the prior sentence. Recipients should bear in mind that transaction classifications involve elements of subjectivity and are subject to change.

ESG: While Lexington may consider environmental, social, and governance ("ESG") factors when making an investment decision on behalf of the Partnership, LCP X does not pursue an ESG-based investment strategy or limit its investments to those that meet specific ESG criteria or standards. Any reference herein to ESG considerations is not intended to qualify our duty to maximize risk-adjusted returns.

References to Specific Investments: Any specific investment described herein does not constitute a recommendation by Lexington. Any case studies (or example transactions) in this Presentation are presented for informational purposes only and are intended to be illustrative of the types of investments that may be made by the Partnership. However, there can be no assurances that any investments of the type included in the case studies will be available to, or approved by the investment committee of, the Partnership. The case studies may not be representative of all transactions of a given type or of investments generally. Nothing herein should be considered a recommendation of any particular security or portfolio company. There can be no assurance that the Partnership will be able to implement its investment strategy, achieve its investment objective, or avoid substantial losses. In addition, certain of these investments are unrealized and actual results may vary. There can be no assurance that growth trends (if any) will continue. Further, certain statements contained in any case studies or transaction examples is based on Lexington's experience and available market information and contain subjective judgments, beliefs and opinions. Any discussion of general market activity, industry or sector trends, or other broad-based economic, market, political or regulatory conditions should not be construed as research or investment advice. Unless otherwise indicated, statements in case studies are as of the closing date of the relevant investment. It should not be assumed that any of the specific investments described herein were or will ultimately be profitable.

References herein to "secondary" market purchases or transactions by Lexington Secondary Funds, or "secondary" interests or investments held by the Lexington funds (or similar terms), generally refer to investments by Lexington Secondary Funds that qualify as investments in "secondary funds" in accordance with their governing agreements, and include investments made on a primary basis. References herein to "primary funds" exclude investments made on a primary basis that qualify as "secondary funds" under the applicable governing agreements.

Projected Returns: The projected Gross Multiples and Net Multiples for LCP VI, LCP VII, LCP VIII and LCP IX (the "Projected Returns") on page 25 of the Presentation have been prepared by Lexington for discussion purposes only, and reflect Lexington's current expectations (as of April 2021) based on available information and the calculation methodology described in detail below.

The Projected Returns have been prepared and are set out for illustrative purposes only and do not constitute a forecast. They have been prepared based on our current understanding of the intended future operations of the applicable funds, our current view in relation to future events and financial performance of the funds and various estimations and assumptions, including estimations and assumptions about events that have not occurred, any of which may prove to be incorrect. Therefore, the Projected Returns are subject to uncertainties, changes (including changes in economic, operational, political or other circumstances or the management of the underlying funds and their portfolio companies) and other risks, including, but not limited to, changes in technology, broad trends in business and finance, pandemics, epidemics, legislation and regulation affecting the underlying funds and their portfolio companies, monetary and fiscal policies, interest rates, inflation, currency values, market conditions, the availability and cost of short-term or long-term funding and capital, all of which are beyond the underlying funds' and our control and any of which may cause the relevant actual, financial and other results to be materially different from the results expressed or implied by the Projected Returns. Any assumptions (and the resulting analyses and projections) may require modification as additional information becomes available and as economic and market developments warrant. Any such modification could be either favorable or adverse. No assurance, representation or warranty is made by any person that any of the Projected Returns will be achieved and no investor should rely on the Projected Returns.

Neither Lexington nor any of its personnel or representatives makes any assurance, representation or warranty as to the accuracy of any of the Projected Returns. Nothing contained herein may be relied upon as a guarantee, promise, assurance or a representation as to the future. In considering the performance information contained herein, each prospective investor should bear in mind that past or projected performance is not necessarily indicative of future results, and there can be no assurance that comparable results or any projected returns will be met.

Endnotes

Certain information utilized in developing the Projected Returns (including information about the underlying funds and their portfolio companies) has been obtained from published and non-published sources prepared by other parties (including underlying fund sponsors). While such information is believed to be reliable for the purpose used herein, Lexington does not assume any responsibility for the accuracy of such information, and such information has not been independently verified by Lexington. Moreover, Lexington may be in possession of information regarding the underlying funds and their portfolio companies (including information provided to Lexington by the underlying fund sponsors) that is not incorporated into Lexington's estimates or assumptions, and such information, if so incorporated, might have resulted in higher or lower Projected Returns than as described herein.

Each fund's gross and net Projected Return is the mathematical average of the Gross and Net Multiple projections, respectively, generated for such fund by each of the two methods described below ("Method 1" and "Method 2"). Lexington regularly uses both of these methods in its re-projection processes and has chosen to average the results of the two methods to produce the Projected Returns because Lexington believes that both the re-underwriting information reflected in Method 1 and the broad historical data and experience reflected in Method 2 are meaningful. However, different methodologies – and different assumptions within those methodologies – would produce different and potentially less attractive results. The Projected Returns in this Presentation reflect calculations performed by Lexington in April 2021, based on the methodologies and information described below, have not been updated since that time, and Lexington is not under any obligation to update or keep current such information and prospective investors should not expect Lexington to do so. If Lexington were to re-run the calculations after April 2021 based on updated information, the results most likely would differ from the Projected Returns herein and could be materially less favorable than such Projected Returns. As noted above, Lexington runs projections for various funds and investments based on Method 1 and/or Method 2 in the ordinary course, as part of our re-projection processes, and historically many of those projections have proven to be higher than the actual performance ultimately achieved by the relevant funds and/or investments.

Method 1 – Re-Underwriting Analysis

For each of LCP VI – LCP IX, Lexington obtained updated underwriting feedback for the underlying partnerships representing such fund's "top fund exposures" by net asset value ("NAV") plus unfunded commitments as of 9/30/20 or, in the case of LCP IX only, 9/30/20 pro forma for certain deals closed after 9/30/20. Each fund's top fund exposures include each underlying fund that represents more than 1.2% of such fund's investments by NAV plus unfunded commitments. In the aggregate, each fund's top fund exposures represent at least 50% of such fund's total exposure by NAV plus unfunded commitments based on 9/30/20 underlying financials or, for LCP IX only, 9/30/20 underlying financials pro forma for certain deals closed after 9/30/20. Data gathered for each such top fund exposure underlying partnership included updated projections of the (i) net multiple of the top fund exposure underlying partnership's capital account, (ii) net multiple of the top fund exposure underlying partnership's unfunded commitment, and (iii) percentage of the top fund exposure underlying partnership's unfunded commitment to be called. The Method 1 (and Method 2) analyses include assumptions with respect to the use of credit facility borrowings and the recycling of investment proceeds to make investments, in lieu of capital contributions, based on our historical approach and expectations for future use of such borrowings and proceeds. These assumptions may ultimately prove to be incorrect, and the projected Gross and Net Multiples would be lower, potentially materially, if we assumed all investments would be made using capital contributions. Using this data, Lexington generated an updated projection for each such top fund exposure underlying partnership and an aggregate projection for the re-underwritten portion of each Lexington fund's portfolio (the "Top Fund Exposure Projection"). For the avoidance of doubt, the net multiples referenced in items (i) and (ii) above are net of management fees, carried interest and expenses at the level of the underlying partnership, but are gross of Lexington's management fees, carried interest and expenses, which will reduce returns and in the aggregate are expected to be substantial. For additional information about Lexington's management fees, carried interest and expenses, please see the endnote on Gross IRR and Net IRR and the Memorandum of the relevant fund.

For LCP VI – LCP IX, to project the Gross Multiple of the portion of each fund's portfolio not covered by the Top Fund Exposure Projection (the "tail" of each portfolio), Lexington assumed the tail would appreciate by the same percentage indicated by the relevant fund's Top Fund Exposure Projection with a 15% discount on the distributions produced by the capital account net multiple assumption (Item (i) in the previous paragraph) (the resulting number, the "Tail Projection"). Note that Lexington did not adjust the unfunded commitment net multiple or unfunded percentage called assumptions (Items (ii) and (iii) in the previous paragraph) with respect to the tail portions of the portfolios. Lexington believes that the 15% discount on the capital account net multiple assumption is a reasonable discount for uncertainty, but industry experts and others may believe a greater discount is appropriate, and there can be no assurance that this discount assumption will prove to be accurate or that the tail portion of any Lexington fund's portfolio will perform similarly to the top fund exposure portion of the portfolio, or otherwise in accordance with Lexington's assumptions and projections. For example, the Top Fund Exposure Projection (inclusive of the 15% discount) may not be an appropriate benchmark for the "tail" of each portfolio, and such "tail" exposure may consist primarily of lower performing underlying funds and portfolio companies. Lexington has not taken into account specific information regarding the "tail" of each portfolio in calculating the Tail Projections.

For LCP VI – LCP VIII, the Top Fund Exposure Projection and the Tail Projection together provide aggregate projected Gross Cash Flow Amounts for the entirety of each such fund's remaining exposure and produce the Method 1 Projected Gross Multiple.

For LCP IX only, Lexington further assumed the following (the "Pending/Future Deal Projection"):

1. That each of the fund's pending deals (representing approximately 12% of LCP IX's aggregate capital commitments), which include deals that are approved by the investment committee but have not yet been signed, signed deals that have not yet closed or have only partially closed, and deals that closed after 9/30/20 but were excluded from the source reporting used for the Top Fund Exposure Projection and the Tail Projection due to closing timing, will achieve the projected underwritten Gross Multiple as contemplated during such deal's investment committee approval process (i.e., Lexington's "underwriting case" as opposed to "upside" or "downside" cases also considered internally).

2. That the fund's remaining capital not yet invested (representing approximately 27% of LCP IX's aggregate capital commitments) will generate a Gross Multiple consistent with the aggregate underwritten Gross Multiple for LCP IX as of April 2021, which is composed of the original underwritten projections for each deal included in the fund or expected to be included (i.e., deals that are IC-approved but not yet committed or committed deals that have not yet closed), regardless of whether Lexington has subsequently reassessed or updated its projections for any such deal (e.g., as part of the Top Fund Exposure Projection calculation described above).

There can be no assurance that deals that are not committed to yet, or that are not yet closed, will be consummated, either at all, on time or on the prices and terms contemplated by the Projected Returns, or that any such deals described in this paragraph will achieve the returns contemplated during the investment committee approval process. In addition, notwithstanding the assumptions described in paragraph 2 above, there can be no assurance that LCP IX's prior investments (and the prices and terms of such investments, or their performance) are indicative of LCP IX's future investments (and the prices and terms of such investments, or their performance), including, for example, as a result of the continued impact of the COVID-19 pandemic on the current and future market for investment opportunities (and the prices and terms available). If any such assumptions are incorrect, the performance of LCP IX may be materially lower than the Projected Returns described herein.

For LCP IX, the Top Fund Exposure Projection, the Tail Projection and the Pending/Future Deal Projection together provide aggregate projected Gross Cash Flow Amounts for the entirety of the fund's remaining exposure (including pending and expected future deals as described in paragraphs 1 and 2 above) and produce the Method 1 Projected Gross Multiple.

For LCP VI – LCP IX, the Method 1 Projected Gross Multiples are translated to Method 1 Projected Net Multiples by adjusting for Lexington's actual historical and estimated future management fees, carried interest and expenses in addition to the relevant fund's actual historical and estimated future credit facility interest expenses and recycling activity. Lexington believes its estimates relating to future costs and other items that impact net returns are reasonable, but there can be no assurance that they will prove to be accurate. For example, the actual costs borne by investors in any fund may exceed the estimated amount, possibly materially, due to a number of factors including fluctuations in borrowing costs, in which case the fund's actual net multiple would be lower than its Method 1 Projected Net Multiple even if the Method 1 Projected Gross Multiple were achieved. Similarly, a fund may engage in more or less recycling than Lexington has assumed for purposes of its Method 1 Projected Returns, and such difference would impact the fund's actual net multiple, and could cause it to be materially lower than the Method 1 Projected Net Multiple.

Method 2 – Yield/Appreciation Model

For LCP VI, Lexington produces a Method 2 Projection by applying a series of projected NAV appreciation and distribution yield assumptions to each subsequent quarter starting with estimated interim results as of 12/31/20 (audited). Estimates were derived from a combination of GP reporting available to Lexington and other Lexington estimates. The Method 2 Projection assumes projected quarterly NAV appreciation of 2.0%. The Method 2 Projection assumes projected quarterly distribution yields (calculated as distributions as a percentage of prior quarter projected NAV) as follows: actuals through Q1 2021; Q2 2021-Q4 2021 (7.5%); Q1 2022 (100%; assumes a portfolio sale exit at 75% of remaining NAV).

For LCP VII, Lexington produces a Method 2 Projection by applying a series of projected NAV appreciation and distribution yield assumptions to each subsequent quarter starting with estimated interim results as of 12/31/20 (audited). Estimates were derived from a combination of GP reporting available to Lexington and other Lexington estimates. The Method 2 Projection assumes projected quarterly NAV appreciation of 2.0%. The Method 2 Projection assumes projected quarterly distribution yields (calculated as distributions as a percentage of prior quarter projected NAV) as follows: actuals through Q1 2021; Q2 2021-Q4 2021 (7.5%); Q1 2022-Q4 2023 (10.0%); Q1 2024 (100%; assumes a portfolio sale exit at 75% of remaining NAV).

For LCP VIII, Lexington produces a Method 2 Projection by applying a series of projected NAV appreciation and distribution yield assumptions to each subsequent quarter starting with estimated interim results as of 12/31/20 (audited). Estimates were derived from a combination of GP reporting available to Lexington and other Lexington estimates. The Method 2 Projection assumes projected quarterly NAV appreciation as follows: Q1 2021-Q4 2021 (2.5%), Q1 2022-Q4 2024 (2.25%), thereafter (2.0%). The Method 2 Projection assumes projected quarterly distribution yields (calculated as distributions as a percentage of prior quarter projected NAV) as follows: actuals through Q1 2021; Q2 2021-Q4 2021 (7.0%), Q1 2022-Q4 2022 (7.5%), Q1 2023-Q4 2023 (8.0%), Q1 2024-Q4 2024 (8.5%), Q1 2025-Q4 2025 (9.0%), Q1 2026-Q4 2027 (10%), Q1 2028-Q4 2028 (12.5%), Q1 2029 (100%; assumes a portfolio sale exit at 75% of remaining NAV). The LCP VIII Method 2 Projection reflects the use of a fund-level revolving credit facility (the "LCP VIII Facility") that, as of February 9, 2021, allows for maximum outstanding borrowings of $100MM and bears interest at LIBOR plus 1.95% (2.13% as of 4/30/21). Prior to stepping down to a $100 million working capital facility in February 2021, for a one-year period the LCP VIII Facility allowed for maximum borrowings of $200 million; for the one-year period prior to that, $300 million; and for the one-year period prior to that, allowed for maximum borrowings of $1.95 billion. Prior to that, the LCP VIII Facility allowed for maximum borrowings of $2.25 billion. As a result of the revolving nature of the LCP VIII Facility, through April 30, 2021 on a cumulative basis, LCP VIII has borrowed approximately $4.9 billion on the LCP VIII Facility and repaid approximately $4.8 billion. Of this $4.9 billion, approximately $3.0 billion represents borrowing for the purpose of interim financing and covering the Investment Advisory Fee. After final maturity, the LCP VIII Method 2 Projection assumes LCP VIII continues to utilize a working capital facility of $100MM (1% of fund capitalization) through Q4 2025. The LCP VIII Method 2 Projection assumes the working capital facility is repaid through fund-level capital calls.

For LCP IX, Lexington produces a Method 2 Projection by applying a series of projected NAV appreciation and distribution yield assumptions to each subsequent quarter starting with estimated interim results as of 12/31/20 (audited). Estimates were derived from a combination of GP reporting available to Lexington and other Lexington estimates. Projected quarters (after 12/31/20) are adjusted to include purchase price and closing market value for transactions closed or expected to close in the respective quarter. Projected quarters are also adjusted to include purchase price and closing market value for illustrative future transactions assuming committed transaction exposure is

70% purchase price with closing market value discounts as follows: Q2 2021-Q1 2022 (15%). Actual ITD LCP IX market value discount as of 7/31/21 is 18%. This illustrative future transaction exposure is assumed to be committed beginning in Q2 2021 through the end of Q1 2022. Including all transaction exposure closed or committed as of the date of the Method 2 Projection as well as illustrative future transaction exposure, the Method 2 Projection assumes LCP IX makes aggregate gross commitments equivalent to approximately 122% of the fund's total capitalization excluding the allocation for primary commitments. There can be no assurance that the fund will participate, or have the opportunity to participate, in future transactions that are similar in size, cost, discount, or other respects to the illustrative future transactions assumed in the Method 2 Projection. The Method 2 Projection assumes projected quarterly NAV appreciation as follows: Q1 2021-Q4 2023 (3.0%), Q1 2024-Q4 2025 (2.5%), Q1 2026-Q4 2028 (2.25%), thereafter (2.0%). The Method 2 Projection assumes projected quarterly distribution yields (calculated as distributions as a percentage of prior quarter projected NAV) as follows: actuals through Q1 2021; Q2 2021-Q4 2024 (5%); Q1 2025-Q4 2028 (7.5%); Q1 2029-Q4 2029 (10%); Q1 2030-Q4 2031 (12.5%); Q1 2032-Q4 2032 (15%); Q1 2033 (100%; assumes a portfolio sale exit at 75% of remaining NAV). The LCP IX Method 2 Projection reflects the use of a fund-level revolving credit facility (the "LCP IX Facility") put in place at the beginning of LCP IX's investment period in the amount of $1.75 billion. As of March 6, 2020, Lexington increased the size of the LCP IX Facility to $3.2 billion in the aggregate and may increase the size of the facility to an amount not to exceed 30% of total Capital Commitments at any point in time. The stated maturity date of the LCP IX Facility is October 23, 2021, with a one-year extension option. Advances under the LCP IX Facility are expected to generally bear interest at a rate per annum equal to LIBOR plus 1.50% (1.68% as of 4/30/21). As of April 30, 2021, the LCP IX Facility has an outstanding balance of $2.7 billion. Through April 30, 2021 on a cumulative basis, LCP IX has borrowed approximately $4.2 billion on the LCP IX Facility and repaid approximately $1.5 billion. The LCP IX Method 2 Projection assumes a portion of portfolio distributions are used to paydown outstanding borrowings until the final maturity date at which point 100% of underlying portfolio distributions are available for distribution. The LCP IX Method 2 Projection assumes outstanding facility borrowings at maturity are repaid through fund-level capital calls in the quarter of final maturity. After final maturity, the LCP IX Method 2 Projection assume LCP IX continues to utilize a working capital facility of $300MM (3% of fund capitalization) through Q3 2024 and then reducing to $200MM (~2% of fund capitalization) through Q3 2025. The LCP IX Method 2 Projection assumes the working capital facility is repaid through fund-level capital calls.

The foregoing projections with respect to NAV appreciation and distribution yields are estimates developed by Lexington and which Lexington believes reflect reasonable estimates for each fund, based on historical performance data dating back to 2002 for investments made by Lexington funds. These estimates do not fully take into account the specific characteristics of the underlying investments currently held by each of LCP VI – LCP IX. Industry experts may disagree with these projections, which may ultimately prove to be incorrect.

For each of LCP VI – LCP IX, the Method 2 Projection produced by the calculation methodology described above is such fund's Method 2 Projected Gross Multiple.

For LCP VI – LCP IX, the Method 2 Projected Gross Multiples are translated to Method 2 Projected Net Multiples by adjusting for Lexington's actual historical and estimated future management fees, carried interest and expenses in addition to the relevant fund's actual historical and estimated future credit facility interest expenses and recycling activity. Lexington believes its estimates relating to future costs and other items that impact net returns are reasonable, but there can be no assurance that they will prove to be accurate. For example, the actual costs borne by investors in any fund may exceed the estimated amount, possibly materially, in which case the fund's Net Multiple would be lower than its Method 2 Projected Net Multiple even if the Method 2 Projected Gross Multiple were achieved. Similarly, a fund may engage in more or less recycling than Lexington has assumed for purposes of its Method 2 Projected Returns, and such difference would impact the fund's actual net multiple, and could cause it to be materially lower than the Method 2 Projected Net Multiple.

LCP V Projected Performance

Although LCP V still holds a small amount of unrealized assets, Lexington has assumed for purposes of the projected performance discussions in this Presentation that LCP V's terminal gross and net multiples will be the same as its gross and net multiples as of 12/31/20 (unaudited). Although Lexington believes that this assumption is reasonable given the maturity of the fund and the nature of its unrealized assets, there can be no assurance that LCP V's fully realized gross and net multiples will be consistent with its 12/31/20 (unaudited) gross and net multiples.

It should not be assumed that any fund will meet or exceed its projected lifetime Gross or Net multiple even if such fund is currently exceeding or has exceeded such multiple at any point in time.

Any projections set forth in this Presentation (the "Projections") are hypothetical, have been prepared and are set out for illustrative purposes only, and do not constitute a forecast. They have been prepared based on Lexington's current view in relation to future events and financial performance of relevant funds' existing portfolio investments and various estimations and assumptions made by Lexington, including the availability of financing and certain assumptions about investing conditions and market fluctuation or recovery. While the Projections are based on assumptions that Lexington believes are reasonable under the circumstances, they are subject to uncertainties, changes (including changes in economic, operational, political, legal, tax and other circumstances) and other risks which are beyond Lexington's control and any of which may cause the relevant actual, financial and other results to be materially different from the results expressed or implied by such Projections. No assurance, representation or warranty is made by any person that any of the Projections will be achieved, and no recipient of this Presentation should rely on the Projections. None of Lexington, Lexington funds, their affiliates or any of the respective directors, officers, employees, partners, shareholders, advisers and agents of any of the foregoing makes any assurance, representation or warranty as to the accuracy of the Projections. Nothing contained in this Presentation may be relied upon as a guarantee, promise or forecast or a representation as to the future. A broad range of risk factors could cause a Lexington fund to fail to meet its investment objectives, and there can be no assurance that any Lexington fund will achieve these objectives. Additionally, the Projections in many cases may not reflect the value obtainable in a sale of the relevant portfolios under current market conditions. If Lexington were to liquidate such portfolios under current market conditions, the values obtained would likely, with respect to certain portfolios, be materially lower than those

Endnotes

indicated in the Projections. Recipients are encouraged to contact Lexington representatives to discuss the procedures and methodologies used to calculate the Projections and other information provided herein. Recipients may obtain additional information relating to the Projections described herein upon request.

This Presentation includes information related to prior performance of Lexington funds, in which LCP X investors will not have any interest. Prospective investors should note that the investment programs, objectives, leverage policies, risk return profiles, and strategies of certain of these funds (including, without limitation, the LMMI Secondary Funds) are substantially different than those of the Partnership. Therefore, the investment performance of such funds is less relevant to an investment decision with respect to the Partnership. The information provided herein regarding the investment performance of these funds is, therefore, provided solely for background purposes and should not be considered as an indication of future performance of the Partnership or of past performance of the investment professionals expected to be responsible for management of the Partnership. Prospective investors should note that any selected examples, case studies, and/or transaction summaries presented in or referred to herein may not have involved all of the Lexington professionals who will be involved with the management and operations of the Partnership. In addition, certain of the persons who were involved in the applicable investment programs may not be actively involved in the Partnership or may function in different roles at Lexington, which may impact the Partnership's ability to achieve comparable returns. Any summaries and case studies and other performance information presented herein are for illustrative purposes only to provide background information on the types of investments made previously by Lexington funds. Prospective investors admitted to the Partnership are not expected to participate in any investment made by any previous Lexington fund (including those described in the case studies and/or selected examples elsewhere in this Presentation). Therefore, prospective investors will have interests in investments and overall returns that are different in one or more material respects from investors in other Lexington funds. Prospective investors should not assume that any specific investments discussed herein were or will be profitable.

As used herein, S&P 500 Index returns have been calculated using a "public market equivalent approach" whereby cash flows into and out of private investment funds are treated as investments and sales in the S&P 500 Index, interim balances are carried forward at riskless rates, and the resulting ending value is treated as a measure of performance. Public market equivalent returns have been calculated without dividend reinvestment. The market volatility, liquidity, and other characteristics of private equity and alternative investments are materially different from those of public markets. The performance of the Lexington funds relative to the S&P 500 Index returns is with respect to Net IRR. Any comparisons herein of investment performance to a benchmark or index is qualified as follows: (i) the volatility of such benchmark or index may be materially different from that of the Lexington funds; (ii) such benchmark or index may employ different investment guidelines and criteria than any Lexington fund and, therefore, the holdings of such Lexington fund may differ significantly from the securities that comprise the index or benchmark; and (iii) the performance of such benchmark or index has not necessarily been selected to represent an appropriate benchmark to compare to the performance of any Lexington fund, but rather is disclosed to allow for comparison of such Lexington fund performance to that of a well-known benchmark or index. Additional information is available upon request. There may be other benchmarks where the applicable funds would rank higher or lower than as described herein. Comparisons to other benchmarks may yield different results.

Unless otherwise indicated, the use of logos does not imply affiliation or endorsement.

It should not be assumed that each of the Lexington investment professionals identified herein will necessarily be involved in managing the investment activities of any future Lexington fund.

Investors domiciled in the European Economic Area will generally only be offered LCP X (Luxembourg) SCSp in compliance with the Alternative Investment Fund Managers Directive (AIFMD).

Registration with the SEC as an investment adviser does not constitute an endorsement of Lexington by the SEC, nor does it indicate that Lexington has attained a particular skill or ability.
