Brookfield

BSREP V: Our Latest Flagship Opportunistic Fund

Focused on finding value opportunities amid turbulent markets

Seeking $15 Billion of Capital[23]

- Including Brookfield's $3 billion target commitment to the BSREP V program
- Targeting unlevered gross returns of 20% (15% net) and 2.0x (1.7x net) and levered net returns of 16% and 1.7x[1,7]

Why Now

We believe economic headwinds and capital markets volatility create compelling buying opportunities

- Elevated interest rates and near-term debt maturities are creating stress for undercapitalized owners
- Moderating but persistent inflation coupled with active asset management is leading to pricing power for high-quality real estate
- Major shifts in demographics, geopolitics and consumer preferences are leading to strong real estate demand generators

Our Strategy

- Invest opportunistically in real estate companies, properties, distressed loans and securities
- Pursue creative, large-scale transactions where competition may be limited
- Leverage our experience, scale and operating capabilities to enhance value
- Realized $36 billion of opportunistic equity since 2006, generating unlevered gross returns of 22.3% (17.1% net) and 1.7x (1.5x net) and levered net returns of 18.2% and 1.5x*[,6,7,9]

*Composite returns presented are based on funds with similar investment strategies and are calculated by aggregating total cash flows of such funds, using the same information used to calculate the returns for each individual fund. Please refer to the opportunistic composite track record at the end of the presentation. Prior performance is not indicative of future results and there can be no guarantee that the fund, future funds or their respective investments will achieve comparable results or be able to avoid losses.

Please refer to endnotes at the end of the presentation.

Brookfield's Investment Strategy

We take a consistent investment approach to building portfolios. We seek to:

1

Acquire High-Quality Assets

2

Invest on a Value Basis

3

Enhance Value Through Operating Expertise

Brookfield's Sustainability Commitment[15]

We are committed to responsible investment practices and transparency with our stakeholders

Net Zero Asset Managers Initiative
Became a signatory in early 2021, underscoring our longstanding commitment to driving the complementary goals of sustainability and value creation across our investments and operations

Became signatory in early 2020

Utilizing Sustainability Accounting Standards Board (SASB) to enhance our due diligence

BSREP V is expected to align with Sustainable Finance Disclosure Regulation (SFDR) Article 8

Supporting diversity in the real estate industry

Most of our portfolio companies measure their Greenhouse Gas (GHG) emissions

BSREP III reports to Global Real Estate Sustainability Benchmark (GRESB); BSREP IV will report for FY 2023 and BSREP V is expected to report for FY 2024

Aligning with the TCFD framework to climate-proof our business

Please refer to endnotes at the end of the presentation.

BSREP Advantage

With a focus on creating value through operations, we believe we are uniquely suited to execute on opportunities across the globe and through market cycles

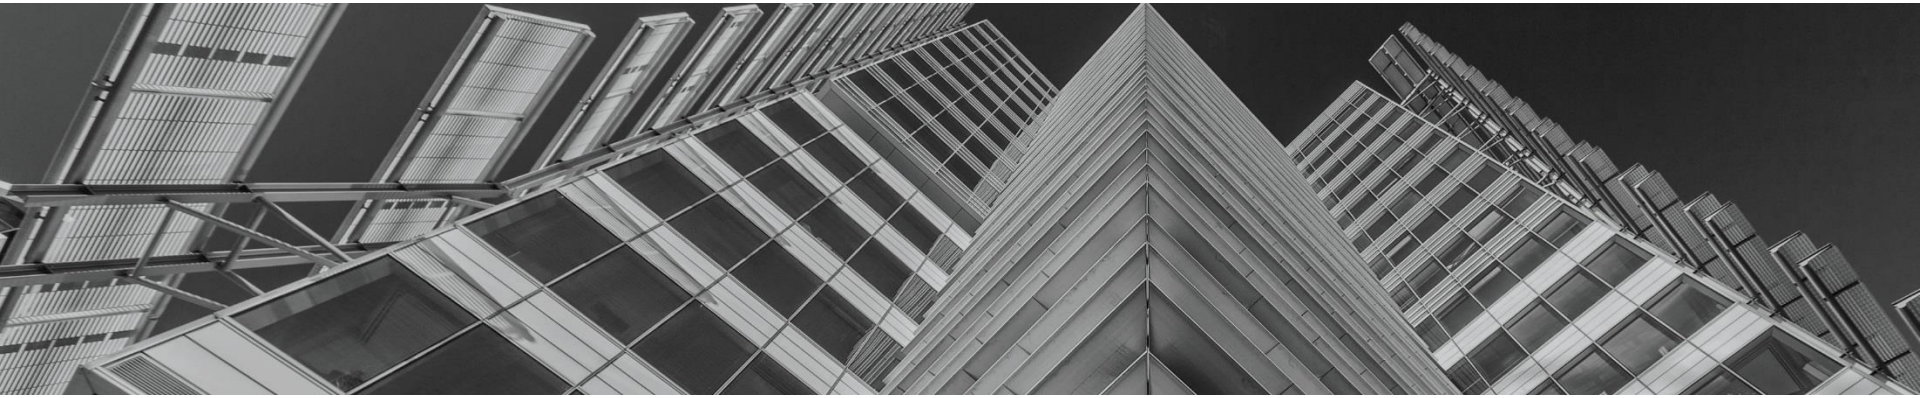
Global Reach and Relationships
On-the-ground presence in 30+ markets enables us to source deals off-market and positions us as buyer of choice

Strong, Opportunistic Track Record
Experience investing, operating and delivering strong returns through market cycles

Permanent Operating Platforms Around the World
In-house expertise provides us with the ability to execute business plans efficiently and react to changing conditions in real time

Access to Large-Scale Capital
Large transactions can be executed with reduced competition and may provide sizeable co-investment opportunities

Commitment to ESG
ESG enhancements are integrated into business plans; results reported through industry-leading ESG frameworks



Opportunity

Investment Environment

We believe disruption and uncertainty in markets around the world will produce attractive opportunities for BSREP V

We believe economic headwinds and capital markets volatility are producing a compelling environment for opportunistic investing

We expect opportunities to buy high quality assets at attractive pricing in a downturn, and to deliver stabilized assets into recovering economies

Higher interest rates can create opportunities

Elevated interest rates and near-term debt maturities may stress many under-capitalized owners, creating buying opportunities for BSREP V

Limited liquidity may lead to less competition for investments, and more favorable pricing

Inflation remains elevated, supporting revenue growth

Inflation remains elevated, which, when combined with active asset management, we believe will support strong revenue growth

Supply remains muted as rising replacement costs continue to curtail new development

Investment Themes

Demographics & Affordability

- Housing Shortages
- High Cost of Homeownership
- R&D

The New Normal

- Experiences and Leisure

- Logistics / Fulfillment

Integrating Sustainability into the Investment Process

Brookfield

Sustainability considerations are incorporated throughout the investment life cycle

Due Diligence

- Review material issues to determine any concerns
- Evaluate material sustainability risks and value creation opportunities

Investment Decision

- Assess sustainability and flag key risks and opportunities to the investment committee
- Develop a post-acquisition sustainability plan

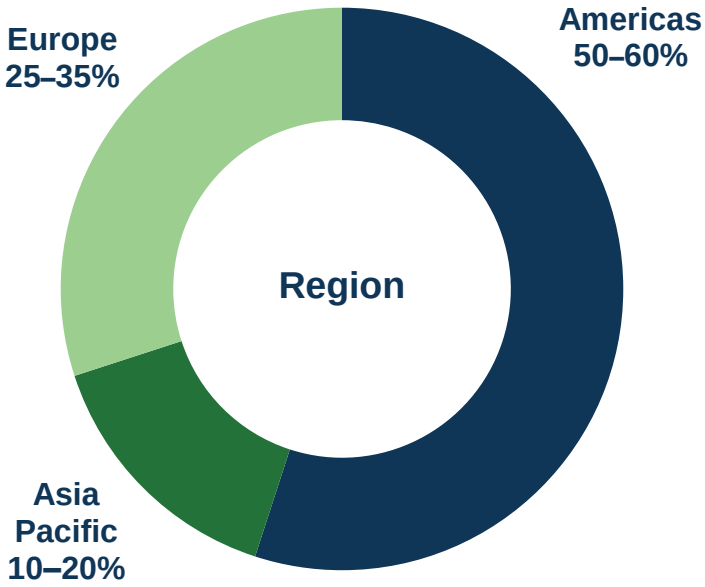
Ongoing Management

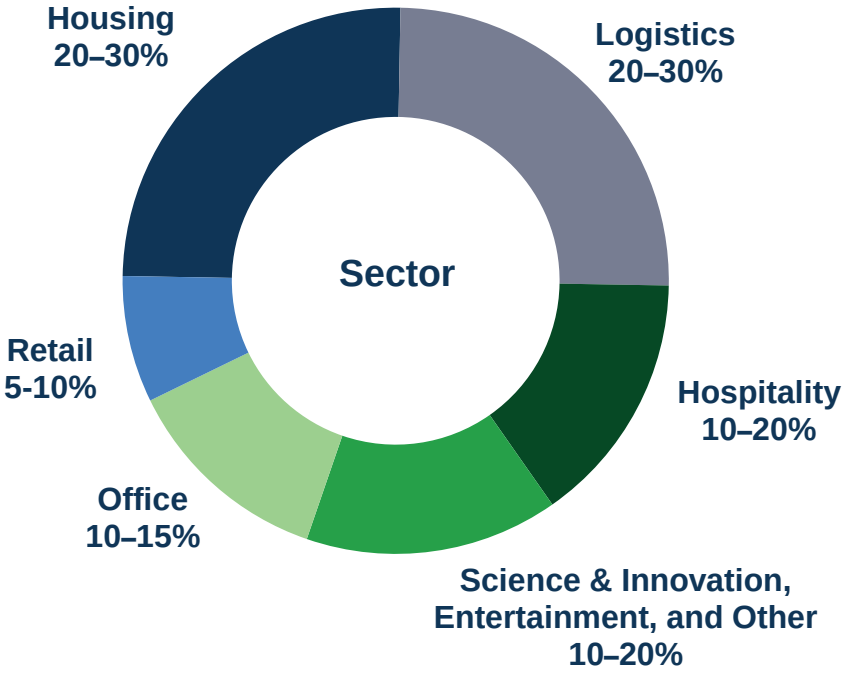
- Identify, prioritize, and revisit sustainability issues on an ongoing basis
- Document and measure KPIs on relevant issues or incidents

Brookfield's sustainability policy is based on the following guiding principles: 1) mitigate the impact of operations on the environment 2) ensure the well-being and safety of employees 3) uphold strong governance practices and 4) be good corporate citizens. For more information on our sustainability approach, please visit Brookfield.com/responsibility.

Illustrative Portfolio Construction[16]

BSREP V will seek to allocate capital in markets and sectors where we believe we have a significant local presence and extensive market knowledge

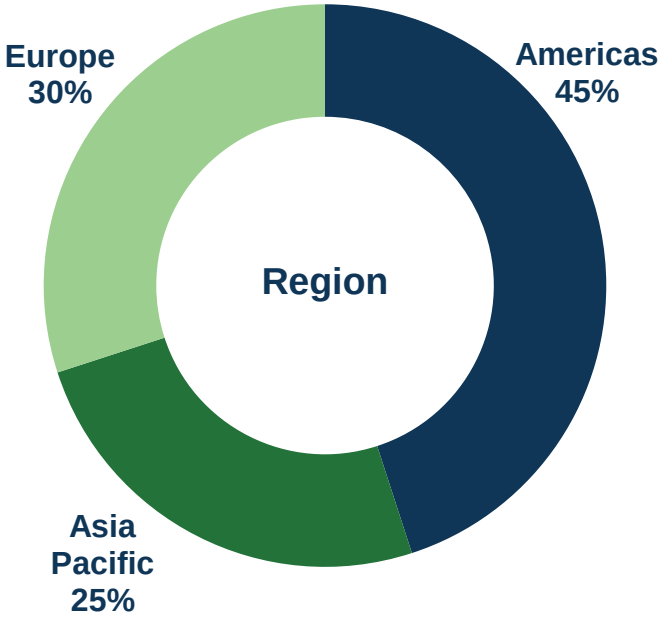


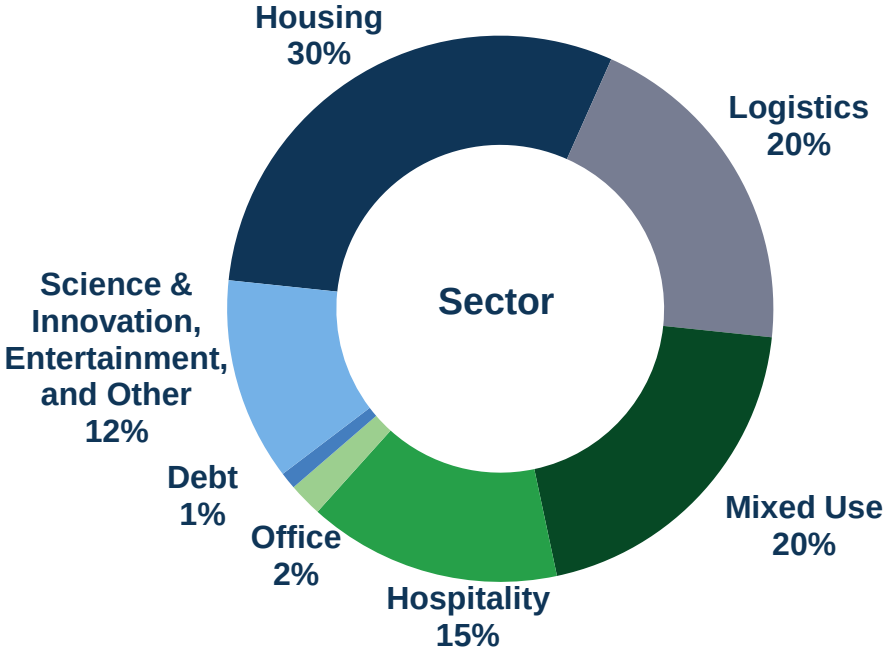


Based on equity commitments. Please refer to endnotes at the end of this presentation.

BSREP V Pipeline[22]

We are evaluating a robust, $15B pipeline of opportunities





Note: Pipeline as of March 2024. Based on expected equity commitments.
Please refer to endnotes at the end of this presentation.

Opportunity: U.S. Multifamily[22]

~20 multifamily assets across various sunbelt markets from distressed owner under threat of foreclosure

Deal Background

- Seller acquired most assets in the two years preceding interest rate hikes, with high leverage and floating rate debt
- Increased interest rates have stressed cash flows; seller is no longer able to service the existing debt
- Negotiating acquisition of assets at existing debt basis via subordinated seller equity

Investment Thesis

- Well-located assets in markets with positive long-term supply/demand dynamics
- Attractive entry basis 20% below seller's basis
- Mismanaged portfolio provides significant operational upside from institutionalizing property management
- Further upside potential through value-add unit renovation program

Value Creation

Attractive entry point provides compelling basis

Institutionalize operations and property management

Drive rents through value-add unit renovation program

6,000+
Units

~$800M
Gross Asset Value

~$270M
Equity Commitment[5]

~50%
Discount to Replacement Cost[13]

Opportunity: German Residential Platform[22]

Brookfield

Fully stabilized residential platform across Germany from distressed seller seeking liquidity

Deal Background

- Complex ownership and financing structure, with seller under severe distress
- Unique transaction circumstances allow for highly attractive entry basis for a stabilized portfolio

Investment Thesis

- Fully stabilized residential portfolio with exposure to established German markets
- "Clean-up" of ownership and financing structure
- Accretive refurbishments of churning units to capture ERV upside of ~25%
- Potential for opportunistic disposal of non-core assets

Value Creation

Mark rents to market

Execute accretive capex

Institutionalize management and improve capital structure

~10K
Units

~$870M
Gross Asset Value

~$435M
Equity Commitment[5]

~25%
ERV Upside

- Please refer to endnotes at the end of this presentation.

Opportunity: South Asia Hospitality[22]

Convertible preferred equity in a luxury hotel owner, brand and operator of sustainable resorts in South Asia

Deal Background

- Proprietary sourcing through existing relationships
- Top luxury brand led by an experienced founder
- Existing investor looking for early exit due to resource reallocation

Investment Thesis

- World-class brand and platform with a strong track record of driving operating performance
- Well-located properties in highly desirable destinations, supported by strong demand
- Potential to create synergies across our existing hotels and platforms
- Strong downside protection with substantial upside share

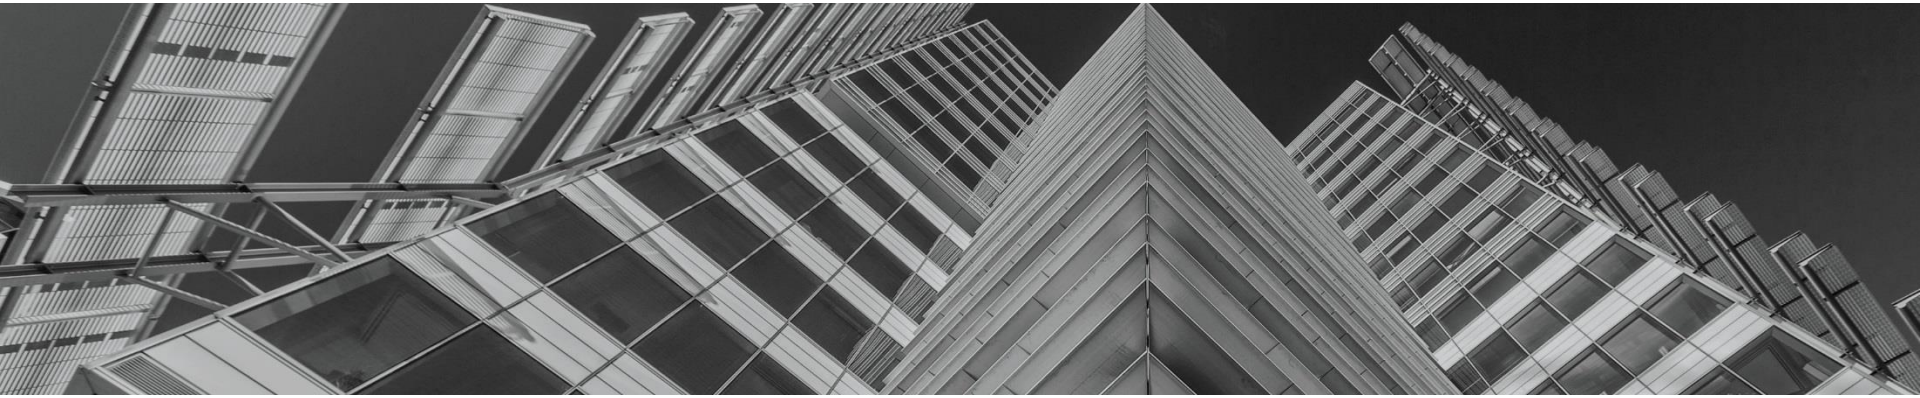
Value Creation

Execute capex programs at existing resorts to drive NOI

Potential to expand and scale existing portfolio

~$700M
Total Enterprise Value

~$300M
Equity Commitment[5]



Performance and Value Creation

Opportunistic Composite Fund Performance*

Brookfield

We have delivered strong composite opportunistic returns, realizing $36 billion of proceeds since 2006[10]

Value Creation Through Multiple Strategies

Brookfield

We leverage our operational expertise to maximize the performance and value of our investments

Distressed Situations

Candor Office Parks (BSREP I)

$351M	**$1,204M**	**$227M**	**26.8% (21.4%)**
Equity Invested[5]	Realized Proceeds[10]	Unrealized Proceeds[12]	**4.1x (3.5x)** Current Gross (Net) IRR / MoC[6,7,14]

- Capitalized on shareholder distress to privatize company and acquire portfolio of assets at what we believe was an attractive value
- Scaled portfolio through completion of 8.6 million sf of development, doubling operating area from 8.0 million sf at acquisition to over 16 million sf
- Grew NOI by increasing in-place rents 35% to date
- Leased 10.7M sf to date; the assets in Brookfield India REIT are 77% leased as of Q4 2023
- Sold all assets to either Brookfield India REIT or third-party; majority of REIT shares monetized

Large Scale

Forest City (BSREP III)

$1,895M	**$1,324M**	**$1,783M**	**13.1% (9.1%)**
Equity Invested[5]	Realized Proceeds[10]	Unrealized Proceeds[12]	**1.6x (1.4x)** Current Gross (Net) IRR / MoC[6,7,14]

- Privatized public REIT with a depressed stock price; acquired large-scale, operationally intensive portfolio concentrated around major U.S. markets
- Completed $2.0 billion of large-scale, multi-sector development
- Developed and leased ~2,400 multifamily units; same-store net rents increased 18% since acquisition
- To date, sold life sciences portfolio, +340 properties across office, retail, multifamily and single-family homes, generating $7 billion of gross proceeds at share, returning ~70% of invested capital

Building Businesses

Student Roost (BSREP II – Fully Realized)

$939M	**$2,750M**	**($97M)**	**24.9% (19.0%)**
Equity Invested[5]	Realized Proceeds[10]	Unrealized Proceeds*[12]	**2.8x (2.4x)** Current Gross (Net) IRR / MoC[6,7,14]

- Grew portfolio from ~5,700 beds to 23,000+ through acquisitions and development
- Expanded from five markets to 20+
- 75% of beds in top university cities
- Internalized operating and marketing functions, improving NOI margin
- 97% leased for the 2022–23 academic year at exit
- Exited the business in Q4 2022 for $4.1B gross proceeds

Single-Asset Aggregation

U.S. Logistics Portfolio (BSREP III)

$1,115M	**$403M**	**$2,012M**	**42.6% (29.4%)**
Equity Invested[5]	Realized Proceeds[10]	Unrealized Proceeds[12]	**2.2x (1.9x)** Current Gross (Net) IRR / MoC[6,7,14]

- Aggregated a portfolio of 41 operating assets (11.8M sf) and 36 development properties (8.2M sf) in key land-constrained markets
- With vertically integrated operations, development and acquisition capabilities, the team is well positioned to leverage tenant relationships across Brookfield's global platform
- Leased 4.7M sf of operating portfolio to date, 86% leased at Q4 2023
- Renewal leases (2.7M sf) and new leases (2.0M sf) executed at rents 38% and 32% above expiring rents and underwriting, respectively
- Since inception, leased 5.0M sf of development at rents 38% above underwriting; on average, stabilized developments within 3 months of completion, compared to 13 months at underwriting

Fund level current unlevered gross IRR (MoC) / unlevered net IRR (MoC) / levered net IRR (MoC)[6,7,9]
BSREP I: 21.4% (2.4x) / 17.1% (2.1x) / 17.7% (2.1x) BSREP II: 15.1% (2.0x) / 11.6% (1.7x) / 12.0% (1.7x) BSREP III: 16.0% (1.6x) / 11.1% (1.4x) / 11.5% (1.3x)
*Negative unrealized balance represents market value of unrealized hedge contracts which we expect to realize when market conditions improve
Please refer to endnotes at the end of the presentation.

Sustainability-Driven Value Creation Across Our Funds[21]

Brookfield

We believe achieving our sustainability goals is complementary with generating opportunistic returns

Shanghai Mixed-Use Portfolio

Rooftop solar projects that highlight synergies with Brookfield's renewables business

682

Rooftop solar panels installed

2,400

Tons of coal saved

5,600

Tons of emissions reduced over project life

260,000 kWh

Solar power generated in 2022 at a substantial discount to state grid cost

E-Valley

French Logistics Portfolio

Redeveloping a military base into a net-zero logistics park with top technical and ESG credentials

Adding 90 MW of solar panel generating capacity, 20 MW of geothermal heating capacity, and a biomethane plant producing 25 GWh per year

500+

Electric vehicle charging stations being installed

€15M

Expected incremental value across initiatives

Ecoworld

India Office Portfolio

First certified zero-waste office park in Asia

95%+

Waste diversion rate

~1,500 tons

Waste recycled annually

45%

Electricity will be sourced via renewables in partnership with Brookfield renewables

2M liters

Reduction in daily freshwater consumption due to sewage treatment plant investment

660 Fifth Avenue

State-of-the-art infrastructure to support flexibility, wellness and performance

Expansive outdoor terraces provide abundant green space for tenants

$6M

Savings from reduction in electricity and steam

54%

Reduction in operating GHG emissions due to the renovated building

Case studies reflect investments in BSREP III, which is the earliest BSREP fund to participate in GRESB (a global ESG benchmark for real assets).

BSREP IV: Managing Through Disruption

Brookfield

In our most recent vintage, our hands-on approach has created early value amid persistent inflation and interest rates

Selenta Hospitality Group

- **$198M (62%) MTM** gain since acquisition
- **2023 ADR up 18% YoY**

North American Logistics Portfolio

- Operating portfolio **88% leased**
- Executed 3.3M sf of new and renewal leases since inception at rents 37% **above underwriting**

Waterside Plaza

- **17% average rent growth** on new leases Q4 2023
- Average renovation premiums reflecting a **28%+ ROI**

US Student Housing

- **$170M (40%) MTM gain** since acquisition
- **89% leased for AY2023-24** with YoY rent growth of 10% and 5% for the renovated and unrenovated units

Experimental Group

- 2023 same-store in-season revenue increased **10% YoY** following refurbishment and relaunch of three assets under Experimental Group brand

Washington DC Office Portfolio

- **Occupancy at ~76%,** up 5% since acquisition
- Executed **312,000** sf of leasing in 2023 with rents in line underwriting

Brazil Office Portfolio

- Renewals and rent reviews achieved in Faria Lima portfolio since acquisition on average **13% above underwriting**

King Street Properties

- Commenced construction at four projects spanning ~2.0M sf; pipeline 80% committed
- Rent growth has outpaced inflation where our projects are located

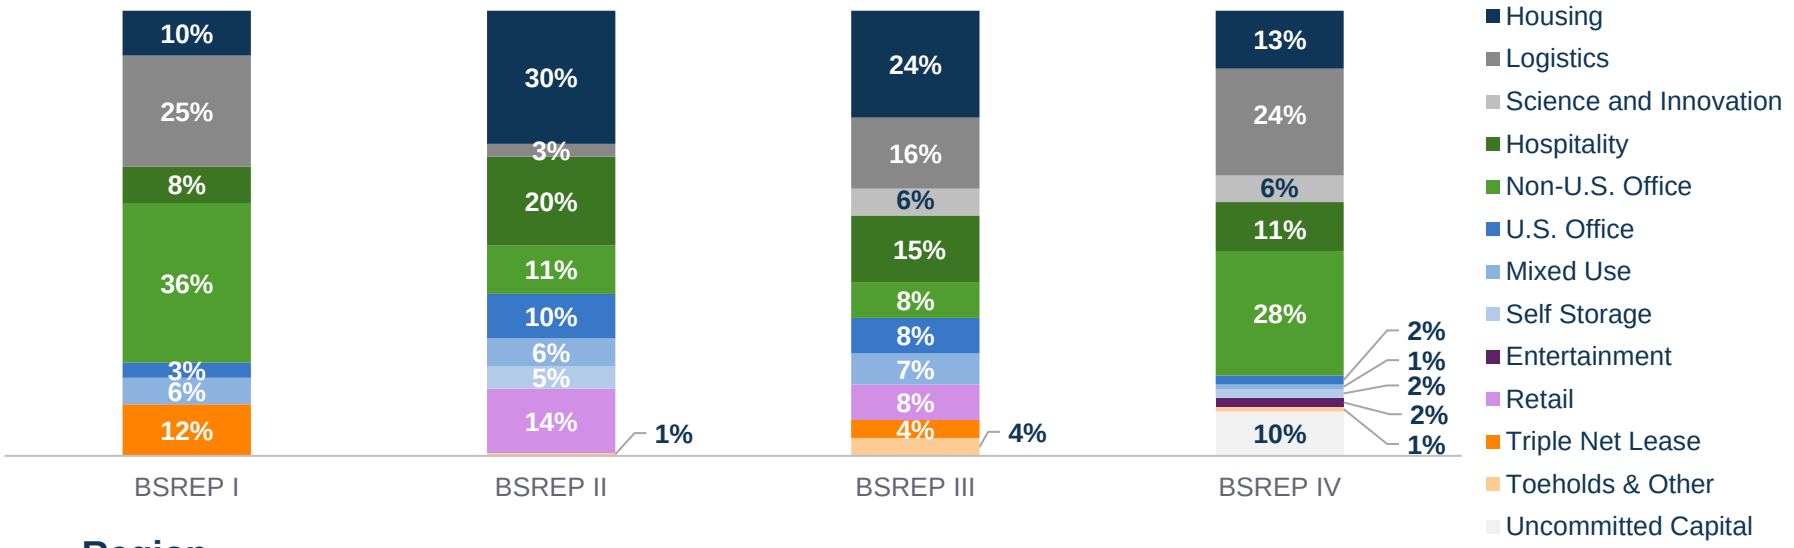
The investments shown on this slide are shown for illustrative purposes only and are not intended to depict investments that BSREP V will invest in. It should not be assumed that any investment made by BSREP V will be profitable or will equal the performance listed herein. Past performance is not indicative of future results. For a complete list of each investment made by the BSREP funds, please refer to the track records at the end of the presentation.

Diversified Portfolios

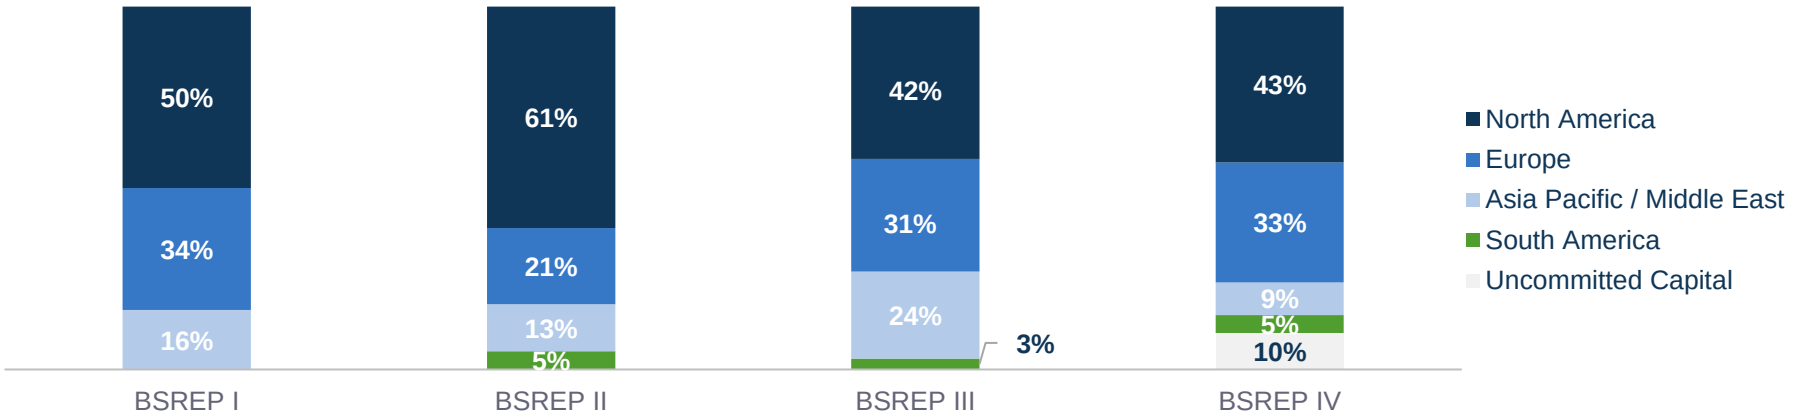
Brookfield

We believe diversified portfolios deliver strong, consistent returns through cycles

Sector



Region



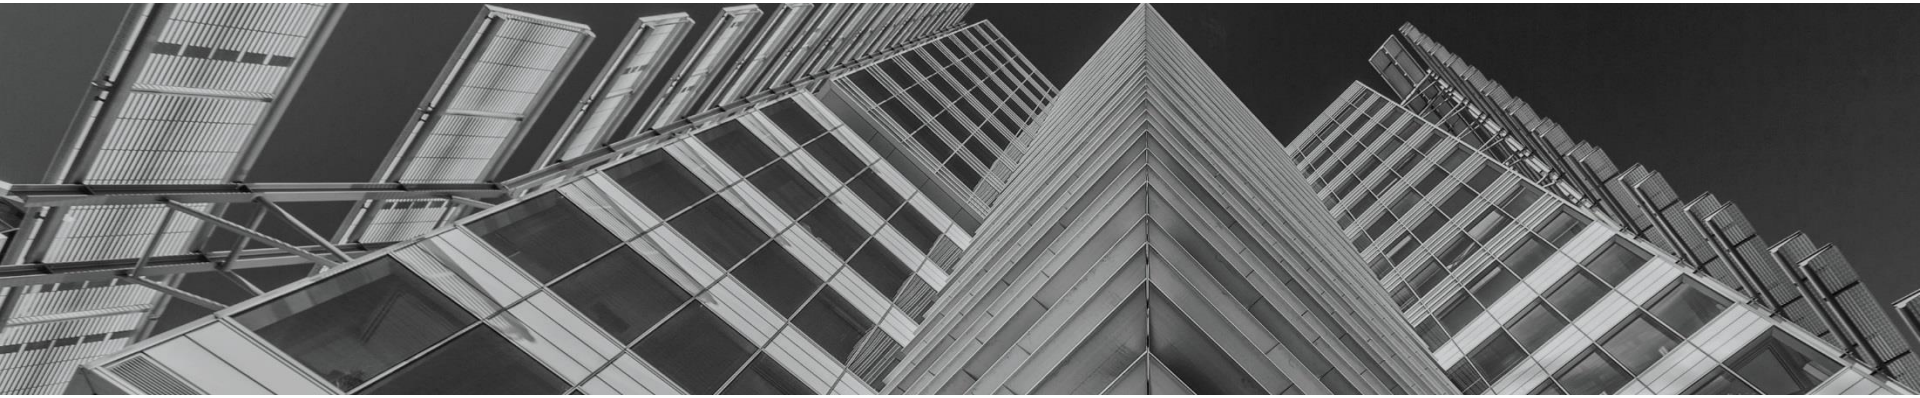
BSREP I-II pie charts based on Equity Invested[5]. BSREP III-IV based on Equity Invested/Committed[5]. The ultimate portfolio composition of BSREP V may differ from the information presented herein.
Please refer to endnotes at the end of this presentation.

We believe BSREP is an all-weather strategy to produce strong, consistent returns

Our approach to investing doesn't change in market cycles:

- Seek to acquire high-quality assets at **attractive basis**
- Leverage **on-the-ground presence** and local relationships to acquire **off-market** with limited competition where possible
- Focus on sectors with **strong long-term fundamentals**
- Strive to drive value through our **operating platform** or acquire **strategic positions** in management companies in new sectors or markets
- Build what we believe are **diversified, resilient** portfolios without relying on single sector/region bets to drive returns
- **15+ year** opportunistic track record of creating value through multiple strategies
- We are typically the largest investor in our funds, ensuring a **strong alignment of interests** with our private fund investors

Forest City
BSREP III



Appendix: BSREP V Investments

San Francisco Multifamily Portfolio

Brookfield

75-property portfolio of rent-controlled multifamily assets in San Francisco's most desirable neighborhoods

Transaction Summary and Sourcing

- In December 2023, BSREP V acquired two nonperforming pools of first mortgage loans secured by 75 rent-controlled multifamily assets (~2,200 units) in San Francisco and subsequently won the underlying assets at the foreclosure auction in January 2024; total equity commitment of ~$240 million
- Portfolio encumbered by high leverage and floating rate debt
- Challenges created by Covid and increases in interest rates stressed operations and cash flows; pullback in capital markets at loan maturity created a forced seller

Investment Thesis

- Acquired at a 31% discount to the current debt stack and 42% discount to replacement cost[13]
- ~86% of portfolio is concentrated in San Francisco's most desirable neighborhoods
- Stable rent roll due to rent-controlled nature of portfolio
- Significant opportunity to mark below-market leases to market upon turnover (~12% discount to market rents) and further upside through unit renovations

Business Plan[22]

- Mark units to market upon turnover
- Prune noncore assets to improve portfolio composition
- Drive rent growth through unit renovations upon turnover

Exit Strategy[22]

- Sell to a strategic buyer after completion of business plan

Investment Details

North American Logistics Portfolio

Brookfield

Asset-by-asset aggregation strategy to curate a high-quality portfolio of scale

Transaction Summary and Sourcing

- As of Q4 2023, BSREP V has invested in or committed to seven operating assets requiring ~$76 million of equity commitments, located in highly desirable urban in-fill industrial clusters in Chicago, Boston, New Jersey and Atlanta

Investment Thesis

- Invest in top supply-constrained markets across our target regions
- Leverage Brookfield's national logistics platform to source assets off market at an attractive basis
- Growing shift from just-in-time to just-in-case is expected to increase domestic manufacturing, driving demand for logistics space
- Supply chain transformation with a focus on automation, resilience and sustainability is expected to drive demand for high quality, future-proofed logistics facilities
- Increasing cost of debt and high replacement costs are slowing pace of new deliveries, limiting future supply
- Vacancies remain below historical levels in target markets, which is expected to drive rent growth

Business Plan[22]

- Leverage Brookfield's vertically integrated logistics platform to drive top line revenue growth and global tenant relationships to lease up properties
- Implement capital renovation projects to improve asset functionality and mark rents to market

Exit Strategy[22]

- Exit through a portfolio sale or select asset transactions

Investment Details

Pan-European Logistics Portfolio

Brookfield

Building a Pan-European logistics portfolio via single asset aggregation strategy

Transaction Summary and Sourcing

- In February 2024, BSREP V acquired a 205,000 sf logistics asset in the Netherlands in an off-market transaction for a total equity commitment of $7 million*
  - The transaction represents the first asset in our Pan-European Logistics portfolio, which seeks to build a portfolio of scale by acquiring high-quality logistics assets across Europe

Investment Thesis

- Invest in key supply-constrained markets across Europe, leveraging Brookfield's global network to source deals off-market at an attractive basis
- Strong rental growth in Europe supported by historically low vacancy levels
- Attractive asset class with stable cashflows and minimal capex requirements
- Supply chain transformation with a focus on automation, resilience and sustainability is expected to drive demand for high quality, future-proofed logistics facilities

Business Plan[22]

- Acquire well-located logistics sites across Europe to expand Brookfield's logistics presence and create a high-quality Pan-European logistics portfolio
- Leverage Brookfield's vertically integrated logistics platform to drive top line revenue growth and global tenant relationships to lease up properties
- Capture reversionary potential across under-rented assets

Exit Strategy[22]

- Exit through portfolio sales or select asset transactions

Investment Details

U.S. Student Housing Portfolio

Brookfield

Curating a portfolio of well-located student housing properties across the U.S.

Transaction Summary and Sourcing

- In March 2024, BSREP V acquired Aves at Twelve100, a 1,527-bed property, located at The University of Central Florida
  - This transaction represents the first asset in the portfolio
  - Leveraging existing student housing platform to aggregate a portfolio of assets alongside Scion Group, our JV partner and one of the largest student housing operator in the U.S. with 20+ years of experience
- Seller was seeking to meet redemptions from its open-ended core fund and offered below-market seller financing

Investment Thesis

- The University of Central Florida is the second largest public institution in the U.S. where student housing demand expected to outpace supply
- Newly renovated property with prime location on campus
- ~9% mark-to-market opportunity and ability to drive ancillary income
- Attractive entry basis at a ~24% discount to recent core/core+ trades

Business Plan[22]

- Mark units to market and increase reimbursements, parking, and admin fees
- Leverage expertise in student housing to drive operational efficiencies
- Build and expand portfolio through additional acquisitions across the U.S.

Exit Strategy[22]

- Sell to a strategic buyer after completion of business plan

Middle East Logistics Portfolio

Brookfield

Plan to establish and scale logistics platform in the Gulf Corporation Council

Transaction Summary and Sourcing

- In March 2024, BSREP V acquired an 80% controlling stake in a 1.5 million sf portfolio owned by a major private equity firm who will retain an ownership interest
- Experienced partner with an established presence in the UAE

Investment Thesis

- Growing and diversified economy, strong population growth and favorable business environment provide a strong backdrop for the logistics sector
- Strong demand drivers from increase in consumer spending
- Attractive basis reflecting a 23% discount to replacement cost[13] and early mover advantage in the largest logistics market in the Gulf Cooperation Council
- Initial portfolio located in proximity to Jebel Ali Port, the largest container port in the Middle East and third largest globally
- Active pipeline of opportunities to grow the business

Business Plan[22]

- Grow and scale platform through follow-ons and build Class A warehouse properties
- Leverage operating expertise and global tenant relationships to build a best-in-class platform

Exit Strategy[22]

- Sell to a strategic buyer after completion of business plan

*Composite returns presented are based on sector and include all realized investments made by Brookfield Strategic Real Estate Partners I ("BSREP I"), Brookfield Strategic Real Estate Partners II ("BSREP II"), Brookfield Strategic Real Estate Partners III ("BSREP III") and Brookfield Strategic Real Estate Partners IV ("BSREP IV") and are calculated by aggregating total cash flows of such investments, using the same information used to calculate the returns for each individual fund. The composite performance shown is not representative of any particular fund and should not be construed as a projection of the future results of BSREP V. Prior performance is not indicative of future results and there can be no guarantee that the fund, future funds or their respective investments will achieve comparable results or be able to avoid losses.

**Includes Forest City Life Sciences.

***Includes triple net lease and debt.

This is not representative of any particular fund and should not be construed as a projection of the future results of BSREP V. Prior performance is not indicative of future results and there can be no guarantee that the fund, future funds or their respective investments will achieve comparable results or be able to avoid losses.

Please refer to the endnotes at the end of the presentation.

Opportunistic Track Record

Brookfield

The summary set forth below includes performance for all discretionary opportunistic real estate funds managed by Brookfield Asset Management Ltd. or a management affiliate thereof (collectively, "Brookfield"). "Opportunistic" real estate funds include all discretionary funds managed by Brookfield that pursue an opportunistic real estate investment strategy and share a common range of target returns (other than those entities expressly excluded from this summary). The summary excludes (i) other real estate funds managed by Brookfield that pursue distinct investment strategies with distinct ranges of target investment returns and (ii) investments made by Brookfield directly, managed accounts, joint ventures, co-investments, publicly listed issuers and investment funds for which Brookfield did not serve as the manager during the investment period. Investments by these entities are not representative of the performance of a complete investment strategy pursued by a discretionary opportunistic investment fund managed by Brookfield, and therefore have been excluded from this summary on the basis that they are not comparable. Information regarding such entities and programs is available upon request. Prior performance is not indicative of future results and there can be no guarantee that the funds, future funds or their respective investments will achieve comparable results or be able to avoid losses.

As of December 31, 2023

Notes to Opportunistic Track Record

Brookfield

1. *Reflects performance from initial investment date to December 31, 2023 for (a) Brookfield Real Estate Opportunity Fund I which reflects the performance from initial investment date to the wind up of the fund on December 31, 2019, (b) Brookfield Real Estate Opportunity Fund II which reflects the performance from initial investment date to the wind up of the fund on January 31, 2020, (c) Brookfield Real Estate Turnaround Fund which reflects the performance from initial investment date to the wind up of the fund on December 17, 2021. "—" refers to performance measures that are not meaningful, typically where the performance measurement date is within twelve months of acquisition. Accordingly, such performance measures are not disclosed separately; however, they have been included in the calculation of the performance metrics for the composite sub-total.*
2. *"Gross IRR" and "Gross Investment Multiple" reflect performance before fund expenses, management fees and carried interest (or equivalent fees), which would reduce an investor's return. "Net IRR" and "Net Investment Multiple" take into account fund expenses, management fees and carried interest (or equivalent fees). Performance figures exclude the effects of and returns from bridge financing provided by the fund. Fund performance is in the functional currency of each fund.*
3. *Fund-level multiples may be adjusted for recalled capital if applicable.*
4. *Projected returns reflected herein have been prepared based on various estimations and assumptions made by the manager, including estimations and assumptions about events that have not yet occurred. Projected returns are based on equity invested to date and equity projected to be invested, all cash flows generated to date and cash flows projected to be generated during the remaining expected holding period and the expected terminal value, determined based on projected operating performance and projected capitalization rates in the applicable market. These calculations are in turn based on numerous assumptions, including the amount of capital each investment will require; availability and cost of debt financing; rents and occupancy rates; tenant defaults; maintenance, property taxes, insurance, utilities and other operating expenses; market conditions influencing capitalization rates and the hold period of each investment; and other factors. While the manager reviews its projected returns quarterly, since the manager's assumptions take into account its views regarding expected outcomes across the length of the expected hold period of an investment, updates to the assumptions (and, therefore, to the resulting projections) will generally be made only when the manager believes such changes reflect durable changes in the facts underpinning such assumptions, as opposed to temporary market fluctuations. Projected fund-level returns for funds that are not yet substantially invested or committed reflect a calculation blending (i) the projected investment-level returns for the fund's investments to date, and (ii) with respect to capital that the fund has not yet committed to specific assets (but expects to deploy in investments over time), the fund's target returns. Projected net returns are prepared based on an illustrative model that takes into account fund expenses, management fees and carried interest (or equivalent fees) paid to date and projected to be paid within the fund. Modeled fund expenses are estimated by the manager based on its experience in the fund and/or similar funds, and modeled management fees and carried interest reflect the highest management fee and carried interest rates expected to be charged to investors in the fund. Projected net returns also take into account assumptions regarding the holding period of each investment, and other factors. Projected gross returns do not take these amounts into account. Due to various risks, uncertainties and changes beyond the control of the manager, the actual results of the referenced investments could differ materially from the results expressed or implied by the projected returns reflected herein in respect of such investments. There is no assurance, representation or warranty being made by any person that any of the projected returns will be achieved and undue reliance should not be put on them. Industry experts may disagree with the estimations and assumptions used in preparing the projected returns. IMPORTANT: The projections or other information generated by the manager's investment analysis tools and provided herein regarding the likelihood of various investment outcomes are hypothetical in nature, do not reflect actual investment results and are not guarantees of future results. Additional information about the estimations and assumptions used in preparing the projected returns and the factors that could cause actual results to differ materially from the projected returns are available upon request. Please contact the manager to see projected performance information based on different assumptions.*
5. *"Equity Invested" represents the initial capital investment, follow-on investments, capital expenditures and subscription facility drawdowns, as applicable.*
6. *"Realized Proceeds" represents any proceeds from disposition and distributions or other forms of current income and loss.*
7. *Values ascribed to "Unrealized Proceeds" as of December 31, 2023, are used in determining performance results based on assumptions that management believes are fair and reasonable under the circumstances and held at cost for investments acquired during the reporting quarter, where cost of the investment is considered to be an appropriate estimate of the fair value. Where applicable, Unrealized Proceeds include unrealized gains or losses resulting from hedges against foreign currency exposure. The actual returns on unrealized gains or losses will depend on among other factors, future operating results, the value of the asset and market conditions at the time of dispositions, any related transactions costs and the time and manner of sale, all of which may differ from the assumptions on which the valuations contained herein are based. Accordingly, the actual realized gains or losses on these unrealized investments may differ materially from the returns shown herein. The material assumptions that were applied in determining the values and the material factors that could cause actual results to differ materially will be provided upon request. Please refer to Brookfield's Fund Valuation Policy (available upon request) for more information.*
8. *"Total Proceeds" are before fund expenses, management fees and carried interest (or equivalent fees).*
9. *"Net IRR" and "Net Investment Multiple" are calculated on a fund level and not for any particular investor, and take into account the average fund expenses, management fees and carried interest (or equivalent fees) and the effects of leverage incurred at the fund-level through the use of a subscription secured credit facility to temporarily fund investments and meet working capital needs ("Fund Leverage"), if any, allocated to or paid by each investor. "Unlevered Net IRR" and "Unlevered Net Investment Multiple" do not take into account the effects of Fund Leverage. "N/A" refers to a fund which has not utilized such leverage, as such, net levered return metrics are not applicable. For the purposes of this calculation, Brookfield is treated as having paid management fees and carried interest rates that correspond to the rates a third party investor investing at the same time and in the same amount as Brookfield would pay (provided that Brookfield will be generally treated as being entitled to any applicable "early closing" discount, including to the extent Brookfield's commitment is increased after the early closing period). Since Brookfield is generally the largest investor in its funds and is typically entitled to such an early closing discount, the notional management fee and carried interest rates applied to Brookfield's commitment are typically the lowest rates available to third party investors and as such these net returns are calculated using those rates for Brookfield's commitment, which reduces the fund's average management fees and carried interest rates (and increases the net returns presented here) below what they would have been if Brookfield was not invested in the fund. Since management fees and carried interest rates vary by investor, each particular investor would likely have a different net performance return than those shown here, and investors who do not qualify for discounted management fees and carried interest rates based on, as applicable, their commitment size or timing of commitment would likely experience a greater spread between gross and net performance than presented here. The calculation in respect of any particular set of economic terms will be provided upon request.*
10. *Composite returns presented are based on funds with similar investment strategies and are calculated by aggregating total cash flows of such funds, using the same information used to calculate the returns for each individual fund.*
11. *Projected net return for a particular investment reflects the projected gross return adjusted for the "Gross-Net Discount Factor" for the fund. The Gross-Net Discount Factor is determined by dividing the fund's unlevered projected net return by its unlevered projected gross return as described in footnote 4. For purposes of this calculation, "unlevered" returns refer to return metrics calculated by removing the effect that a subscription secured credit facility would otherwise have on fund-level returns.*

Brookfield Strategic Real Estate Partners I Track Record

Brookfield

The summary set forth below includes real estate investments made by Brookfield through Brookfield Strategic Real Estate Partners I ("BSREP I"). Prior performance is not indicative of future results and there can be no guarantee that the fund, future funds or their respective investments will achieve comparable results or be able to avoid losses.

Notes to Brookfield Strategic Real Estate Partners I Track Record

Brookfield

1. *Reflects performance from initial investment date to December 31, 2023.*
2. *"Gross IRR" and "Gross Investment Multiple" reflect performance before fund expenses, management fees, and carried interest (or equivalent fees), which would reduce an investor's return. "Net IRR" and "Net Investment Multiple" take into account fund expenses, management fees and carried interest (or equivalent fees). Performance figures exclude the effects of and returns from bridge financing provided by the fund.*
3. *To the extent that a fund's aggregate "Equity Invested" has exceeded the fund's committed capital as a result of the application of the recycling provisions of the fund's governing documents, the calculation of fund-level multiples is adjusted by reducing both the fund's "Total Proceeds" and its "Equity Invested" by the amount of such excess (which adjustment, where applicable, generally results in a higher fund-level multiple than the unadjusted figure). If a fund's aggregate "Equity Invested" does not exceed its committed capital, fund-level multiples are not adjusted for recycling. In either case, asset-level multiples are not adjusted for recycling.*
4. *Projected returns reflected herein have been prepared based on various estimations and assumptions made by the manager, including estimations and assumptions about events that have not yet occurred. Projected returns are based on equity invested to date and equity projected to be invested, all cash flows generated to date and cash flows projected to be generated during the remaining expected holding period and the expected terminal value, determined based on projected operating performance and projected capitalization rates in the applicable market. These calculations are in turn based on numerous assumptions, including the amount of capital each investment will require; availability and cost of debt financing; rents and occupancy rates; tenant defaults; maintenance, property taxes, insurance, utilities and other operating expenses; market conditions influencing capitalization rates and the hold period of each investment; and other factors. While the manager reviews its projected returns quarterly, since the manager's assumptions take into account its views regarding expected outcomes across the length of the expected hold period of an investment, updates to the assumptions (and, therefore, to the resulting projections) will generally be made only when the manager believes such changes reflect durable changes in the facts underpinning such assumptions, as opposed to temporary market fluctuations. Projected fund-level returns for funds that are not yet substantially invested or committed reflect a calculation blending (i) the projected investment-level returns for the fund's investments to date, and (ii) with respect to capital that the fund has not yet committed to specific assets (but expects to deploy in investments over time), the fund's target returns. Projected net returns are prepared based on an illustrative model that takes into account fund expenses, management fees and carried interest (or equivalent fees) paid to date and projected to be paid within the fund. Modeled fund expenses are estimated by the manager based on its experience in the fund and/or similar funds, and modeled management fees and carried interest reflect the highest management fee and carried interest rates expected to be charged to investors in the fund. Projected net returns also take into account assumptions regarding the holding period of each investment, and other factors. Projected gross returns do not take these amounts into account. Due to various risks, uncertainties and changes beyond the control of the manager, the actual results of the referenced investments could differ materially from the results expressed or implied by the projected returns reflected herein in respect of such investments. There is no assurance, representation or warranty being made by any person that any of the projected returns will be achieved and undue reliance should not be put on them. Industry experts may disagree with the estimations and assumptions used in preparing the projected returns. IMPORTANT: The projections or other information generated by the manager's investment analysis tools and provided herein regarding the likelihood of various investment outcomes are hypothetical in nature, do not reflect actual investment results and are not guarantees of future results. Additional information about the estimations and assumptions used in preparing the projected returns and the factors that could cause actual results to differ materially from the projected returns are available upon request. Please contact the manager to see projected performance information based on different assumptions.*
5. *"Realization Date" reflects the date on which the investment was realized or the date by which management estimates the investment will be realized. There is no guarantee that unrealized investments will be realized at the estimated dates.*
6. *"Equity Invested" represents the initial capital investment, follow-on investments, capital expenditures and subscription facility drawdowns, as applicable.*
7. *"Realized Proceeds" represents any proceeds from disposition and distributions or other forms of current income and loss.*
8. *Values ascribed to "Unrealized Proceeds" as of December 31, 2023, are used in determining performance results based on assumptions that management believes are fair and reasonable under the circumstances and held at cost for investments acquired during the reporting quarter, where cost of the investment is considered to be an appropriate estimate of the fair value. Where applicable, Unrealized Proceeds include unrealized gains or losses resulting from hedges against foreign currency exposure. The actual returns on unrealized gains or losses will depend on among other factors, future operating results, the value of the asset and market conditions at the time of dispositions, any related transactions costs and the time and manner of sale, all of which may differ from the assumptions on which the valuations contained herein are based. Accordingly, the actual realized gains or losses on these unrealized investments may differ materially from the returns shown herein. The material assumptions that were applied in determining the values and the material factors that could cause actual results to differ materially will be provided upon request. Please refer to Brookfield's Fund Valuation Policy (available upon request) for more information.*
9. *"Total Proceeds" are before fund expenses, management fees and carried interest (or equivalent fees).*
10. *Realized and Materially Realized Investments represent fully realized investments and investments with Realized Proceeds equal to or greater than 75% of Equity Invested.*
11. *Bridge financing of $6.2 million for Manhattan Multifamily Portfolio, which is currently outstanding and expected to be repaid within 18 months after the investment date, is excluded from Fund Equity Invested and Proceeds as well as the associated Performance figures, and if not repaid within such time, will be included therein.*

Notes to Brookfield Strategic Real Estate Partners I Track Record

Brookfield

12. *"Net IRR" and "Net Investment Multiple" are calculated on a fund level and not for any particular investor, and take into account the average fund expenses, management fees and carried interest (or equivalent fees), if any, allocated to or paid by each investor. For the purposes of this calculation, Brookfield is treated as having paid management fees and carried interest rates that correspond to the rates a third party investor investing at the same time and in the same amount as Brookfield would pay (provided that Brookfield will be generally treated as being entitled to any applicable "early closing" discount, including to the extent Brookfield's commitment is increased after the early closing period). Since Brookfield is generally the largest investor in its funds and is typically entitled to such an early closing discount, the notional management fee and carried interest rates applied to Brookfield's commitment are typically the lowest rates available to third party investors and as such these net returns are calculated using those rates for Brookfield's commitment, which reduces the fund's average management fees and carried interest rates (and increases the net returns presented here) below what they would have been if Brookfield was not invested in the fund. Since management fees and carried interest rates vary by investor, each particular investor would likely have a different net performance return than those shown here, and investors who do not qualify for discounted management fees and carried interest rates based on, as applicable, their commitment size or timing of commitment would likely experience a greater spread between gross and net performance than presented here. The calculation in respect of any particular set of economic terms will be provided upon request.*
13. *"Net IRR" and "Net Investment Multiple" indicated under "Total Portfolio" do not take into account the effects of leverage incurred at the fund level through the use of a subscription secured credit facility to temporarily fund investments and meet working capital needs.*
14. *"Net IRR" and "Net Investment Multiple" for a particular investment reflects the Gross IRR and Gross Investment Multiple of the investment, adjusted for the "Gross-Net Discount Factor" for the fund. The Gross-Net Discount Factor used for calculating an investment's Net IRR is determined by dividing the fund's unlevered Net IRR by its unlevered Gross IRR, and the Gross-Net Discount Factor used for calculating an investment's Net Investment Multiple is determined by dividing the fund's unlevered Net Investment Multiple by its unlevered Gross Investment Multiple. For purposes of this calculation, "unlevered" returns refer to return metrics calculated by removing the effect that a subscription secured credit facility would otherwise have on fund-level returns. Since the Net IRR and Net Investment Multiple for a particular investment are derivatives of the fund's overall Net IRR and Net Investment Multiple, they take into account the average management fees and carried interest (or equivalent fees) paid by investors in the fund, as more fully described in the notes to such figures.*
15. *Projected net return for a particular investment reflects the projected gross return adjusted for the "Gross-Net Discount Factor" applicable to the fund in which the investment was made. The Gross-Net Discount Factor is determined by dividing the fund's unlevered projected net return by its unlevered projected gross return as described in footnote 4. For purposes of this calculation, "unlevered" returns refer to return metrics calculated by removing the effect that a subscription secured credit facility would otherwise have on fund-level returns.*
16. *"Net IRR" and "Net Investment Multiple" indicated under "Levered Net Portfolio" take into account the effects of leverage incurred at the fund level through the use of a subscription secured credit facility to temporarily fund investments and meet working capital needs.*

Brookfield Strategic Real Estate Partners II Track Record

Brookfield

The summary set forth below includes real estate investments made by Brookfield through Brookfield Strategic Real Estate Partners II ("BSREP II"). Notes to Brookfield Strategic Real Estate Partners II Track Record

Brookfield

1. *Reflects performance from initial investment date to December 31, 2023. "—" refers to performance measures that are not meaningful, typically where: (a) the performance measurement date is within twelve months of acquisition or (b) where a significant portion of the asset is under development. "N/R" refers to performance measures that are not relevant. Accordingly, such performance measures are not disclosed separately; however, they have been included in the calculation of the performance metrics for the total portfolio.*
2. *"Gross IRR" and "Gross Investment Multiple" reflect performance before fund expenses, management fees, and carried interest (or equivalent fees), which would reduce an investor's return. "Net IRR" and "Net Investment Multiple" take into account fund expenses, management fees and carried interest (or equivalent fees). Performance figures exclude the effects of and returns from bridge financing provided by the fund.*
3. *To the extent that a fund's aggregate "Equity Invested" has exceeded the fund's committed capital as a result of the application of the recycling provisions of the fund's governing documents, the calculation of fund-level multiples is adjusted by reducing both the fund's "Total Proceeds" and its "Equity Invested" by the amount of such excess (which adjustment, where applicable, generally results in a higher fund-level multiple than the unadjusted figure). If a fund's aggregate "Equity Invested" does not exceed its committed capital, fund-level multiples are not adjusted for recycling. In either case, asset-level multiples are not adjusted for recycling.*
4. *Projected returns reflected herein have been prepared based on various estimations and assumptions made by the manager, including estimations and assumptions about events that have not yet occurred. Projected returns are based on equity invested to date and equity projected to be invested, all cash flows generated to date and cash flows projected to be generated during the remaining expected holding period and the expected terminal value, determined based on projected operating performance and projected capitalization rates in the applicable market. These calculations are in turn based on numerous assumptions, including the amount of capital each investment will require; availability and cost of debt financing; rents and occupancy rates; tenant defaults; maintenance, property taxes, insurance, utilities and other operating expenses; market conditions influencing capitalization rates and the hold period of each investment; and other factors. While the manager reviews its projected returns quarterly, since the manager's assumptions take into account its views regarding expected outcomes across the length of the expected hold period of an investment, updates to the assumptions (and, therefore, to the resulting projections) will generally be made only when the manager believes such changes reflect durable changes in the facts underpinning such assumptions, as opposed to temporary market fluctuations. Projected fund-level returns for funds that are not yet substantially invested or committed reflect a calculation blending (i) the projected investment-level returns for the fund's investments to date, and (ii) with respect to capital that the fund has not yet committed to specific assets (but expects to deploy in investments over time), the fund's target returns. Projected net returns are prepared based on an illustrative model that takes into account fund expenses, management fees and carried interest (or equivalent fees) paid to date and projected to be paid within the fund. Modeled fund expenses are estimated by the manager based on its experience in the fund and/or similar funds, and modeled management fees and carried interest reflect the highest management fee and carried interest rates expected to be charged to investors in the fund. Projected net returns also take into account assumptions regarding the holding period of each investment, and other factors. Projected gross returns do not take these amounts into account. Due to various risks, uncertainties and changes beyond the control of the manager, the actual results of the referenced investments could differ materially from the results expressed or implied by the projected returns reflected herein in respect of such investments. There is no assurance, representation or warranty being made by any person that any of the projected returns will be achieved and undue reliance should not be put on them. Industry experts may disagree with the estimations and assumptions used in preparing the projected returns. IMPORTANT: The projections or other information generated by the manager's investment analysis tools and provided herein regarding the likelihood of various investment outcomes are hypothetical in nature, do not reflect actual investment results and are not guarantees of future results. Additional information about the estimations and assumptions used in preparing the projected returns and the factors that could cause actual results to differ materially from the projected returns are available upon request. Please contact the manager to see projected performance information based on different assumptions.*
5. *"Realization Date" reflects the date on which the investment was realized or the date by which management estimates the investment will be realized. There is no guarantee that unrealized investments will be realized at the estimated dates.*
6. *"Equity Invested" represents the initial capital investment, follow-on investments, capital expenditures and subscription facility drawdowns, as applicable.*
7. *"Realized Proceeds" represents any proceeds from disposition and distributions or other forms of current income and loss.*
8. *Values ascribed to "Unrealized Proceeds" as of December 31, 2023, are used in determining performance results based on assumptions that management believes are fair and reasonable under the circumstances and held at cost for investments acquired during the reporting quarter, where cost of the investment is considered to be an appropriate estimate of the fair value. Where applicable, Unrealized Proceeds include unrealized gains or losses resulting from hedges against foreign currency exposure. The actual returns on unrealized gains or losses will depend on among other factors, future operating results, the value of the asset and market conditions at the time of dispositions, any related transactions costs and the time and manner of sale, all of which may differ from the assumptions on which the valuations contained herein are based. Accordingly, the actual realized gains or losses on these unrealized investments may differ materially from the returns shown herein. The material assumptions that were applied in determining the values and the material factors that could cause actual results to differ materially will be provided upon request. Please refer to Brookfield's Fund Valuation Policy (available upon request) for more information.*
9. *"Total Proceeds" are before fund expenses, management fees and carried interest (or equivalent fees).*
10. *Realized and Materially Realized Investments represent fully realized investments and investments with Realized Proceeds equal to or greater than 75% of Equity Invested.*
11. *"N/C" refers to performance measures that cannot be calculated as the Total Proceeds realized by the Fund is $nil.*
12. *Bridge financing of $453.0 million for Brazil Office Portfolio, $12.3 million for Mumbai Office Portfolio and $1.9 million for Associated Estates Realty, which is currently outstanding and expected to be repaid within 18 months after the investment date, is excluded from Fund Equity Invested and Proceeds as well as the associated Performance figures, and if not repaid within such time, will be included therein.*
13. *"Toeholds and Other Investments" may include the acquisition of public or private debt, debt like instruments, publicly traded securities or another form of strategic investment in a target company, which could potentially play a significant role in a broader transaction, if one were to materialize, or other assets.*

Notes to Brookfield Strategic Real Estate Partners II Track Record

Brookfield

14. *"N/C" refers to performance measures that cannot be calculated as the expected Total Proceeds without improvements to the company's execution to the Fund is currently expected to be $nil.*
15. *"Net IRR" and "Net Investment Multiple" are calculated on a fund level and not for any particular investor, and take into account the average fund expenses, management fees and carried interest (or equivalent fees), if any, allocated to or paid by each investor. For the purposes of this calculation, Brookfield is treated as having paid management fees and carried interest rates that correspond to the rates a third party investor investing at the same time and in the same amount as Brookfield would pay (provided that Brookfield will be generally treated as being entitled to any applicable "early closing" discount, including to the extent Brookfield's commitment is increased after the early closing period). Since Brookfield is generally the largest investor in its funds and is typically entitled to such an early closing discount, the notional management fee and carried interest rates applied to Brookfield's commitment are typically the lowest rates available to third party investors and as such these net returns are calculated using those rates for Brookfield's commitment, which reduces the fund's average management fees and carried interest rates (and increases the net returns presented here) below what they would have been if Brookfield was not invested in the fund. Since management fees and carried interest rates vary by investor, each particular investor would likely have a different net performance return than those shown here, and investors who do not qualify for discounted management fees and carried interest rates based on, as applicable, their commitment size or timing of commitment would likely experience a greater spread between gross and net performance than presented here. The calculation in respect of any particular set of economic terms will be provided upon request.*
16. *"Net IRR" and "Net Investment Multiple" indicated under "Total Portfolio" do not take into account the effects of leverage incurred at the fund level through the use of a subscription secured credit facility to temporarily fund investments and meet working capital needs.*
17. *"Net IRR" and "Net Investment Multiple" for a particular investment reflects the Gross IRR and Gross Investment Multiple of the investment, adjusted for the "Gross-Net Discount Factor" for the fund. The Gross-Net Discount Factor used for calculating an investment's Net IRR is determined by dividing the fund's unlevered Net IRR by its unlevered Gross IRR, and the Gross-Net Discount Factor used for calculating an investment's Net Investment Multiple is determined by dividing the fund's unlevered Net Investment Multiple by its unlevered Gross Investment Multiple. For purposes of this calculation, "unlevered" returns refer to return metrics calculated by removing the effect that a subscription secured credit facility would otherwise have on fund-level returns. Since the Net IRR and Net Investment Multiple for a particular investment are derivatives of the fund's overall Net IRR and Net Investment Multiple, they take into account the average management fees and carried interest (or equivalent fees) paid by investors in the fund, as more fully described in the notes to such figures.*
18. *Projected net return for a particular investment reflects the projected gross return adjusted for the "Gross-Net Discount Factor" applicable to the fund in which the investment was made. The Gross-Net Discount Factor is determined by dividing the fund's unlevered projected net return by its unlevered projected gross return as described in footnote 4. For purposes of this calculation, "unlevered" returns refer to return metrics calculated by removing the effect that a subscription secured credit facility would otherwise have on fund-level returns.*
19. *"Net IRR" and "Net Investment Multiple" indicated under "Levered Net Portfolio" take into account the effects of leverage incurred at the fund level through the use of a subscription secured credit facility to temporarily fund investments and meet working capital needs.*

Brookfield Strategic Real Estate Partners III Track Record

Brookfield

The summary set forth below includes real estate investments made by Brookfield through Brookfield Strategic Real Estate Partners III ("BSREP III"). Prior performance is not indicative of future results and there can be no guarantee that the fund, future funds or their respective investments will achieve comparable results or be able to avoid losses.

Notes to Brookfield Strategic Real Estate Partners III Track Record

Brookfield

1. *Reflects performance from initial investment date to December 31, 2023. "—" refers to performance measures that are not meaningful, typically where: (a) the performance measurement date is within twelve months of acquisition or (b) where a significant portion of the asset is under development. "N/R" refers to performance measures that are not relevant. Accordingly, such performance measures are not disclosed separately; however, they have been included in the calculation of the performance metrics for the total portfolio.*
2. *"Gross IRR" and "Gross Investment Multiple" reflect performance before fund expenses, management fees, and carried interest (or equivalent fees), which would reduce an investor's return. "Net IRR" and "Net Investment Multiple" take into account fund expenses, management fees and carried interest (or equivalent fees). Performance figures exclude the effects of and returns from bridge financing provided by the fund.*
3. *To the extent that a fund's aggregate "Equity Invested" has exceeded the fund's committed capital as a result of the application of the recycling provisions of the fund's governing documents, the calculation of fund-level multiples is adjusted by reducing both the fund's "Total Proceeds" and its "Equity Invested" by the amount of such excess (which adjustment, where applicable, generally results in a higher fund-level multiple than the unadjusted figure). If a fund's aggregate "Equity Invested" does not exceed its committed capital, fund-level multiples are not adjusted for recycling. In either case, asset-level multiples are not adjusted for recycling.*
4. *Projected returns reflected herein have been prepared based on various estimations and assumptions made by the manager, including estimations and assumptions about events that have not yet occurred. Projected returns are based on equity invested to date and equity projected to be invested, all cash flows generated to date and cash flows projected to be generated during the remaining expected holding period and the expected terminal value, determined based on projected operating performance and projected capitalization rates in the applicable market. These calculations are in turn based on numerous assumptions, including the amount of capital each investment will require; availability and cost of debt financing; rents and occupancy rates; tenant defaults; maintenance, property taxes, insurance, utilities and other operating expenses; market conditions influencing capitalization rates and the hold period of each investment; and other factors. While the manager reviews its projected returns quarterly, since the manager's assumptions take into account its views regarding expected outcomes across the length of the expected hold period of an investment, updates to the assumptions (and, therefore, to the resulting projections) will generally be made only when the manager believes such changes reflect durable changes in the facts underpinning such assumptions, as opposed to temporary market fluctuations. Projected fund-level returns for funds that are not yet substantially invested or committed reflect a calculation blending (i) the projected investment-level returns for the fund's investments to date, and (ii) with respect to capital that the fund has not yet committed to specific assets (but expects to deploy in investments over time), the fund's target returns. Projected net returns are prepared based on an illustrative model that takes into account fund expenses, management fees and carried interest (or equivalent fees) paid to date and projected to be paid within the fund. Modeled fund expenses are estimated by the manager based on its experience in the fund and/or similar funds, and modeled management fees and carried interest reflect the highest management fee and carried interest rates expected to be charged to investors in the fund. Projected net returns also take into account assumptions regarding the holding period of each investment, and other factors. Projected gross returns do not take these amounts into account. Due to various risks, uncertainties and changes beyond the control of the manager, the actual results of the referenced investments could differ materially from the results expressed or implied by the projected returns reflected herein in respect of such investments. There is no assurance, representation or warranty being made by any person that any of the projected returns will be achieved and undue reliance should not be put on them. Industry experts may disagree with the estimations and assumptions used in preparing the projected returns. IMPORTANT: The projections or other information generated by the manager's investment analysis tools and provided herein regarding the likelihood of various investment outcomes are hypothetical in nature, do not reflect actual investment results and are not guarantees of future results. Additional information about the estimations and assumptions used in preparing the projected returns and the factors that could cause actual results to differ materially from the projected returns are available upon request. Please contact the manager to see projected performance information based on different assumptions.*
5. *"Realization Date" reflects the date on which the investment was realized or the date by which management estimates the investment will be realized. There is no guarantee that unrealized investments will be realized at the estimated dates.*
6. *"Equity Invested" represents the initial capital investment, follow-on investments, capital expenditures and subscription facility drawdowns, as applicable.*
7. *"Realized Proceeds" represents any proceeds from disposition and distributions or other forms of current income and loss.*
8. *Values ascribed to "Unrealized Proceeds" as of December 31, 2023, are used in determining performance results based on assumptions that management believes are fair and reasonable under the circumstances and held at cost for investments acquired during the reporting quarter, where cost of the investment is considered to be an appropriate estimate of the fair value. Where applicable, Unrealized Proceeds include unrealized gains or losses resulting from hedges against foreign currency exposure. The actual returns on unrealized gains or losses will depend on among other factors, future operating results, the value of the asset and market conditions at the time of dispositions, any related transactions costs and the time and manner of sale, all of which may differ from the assumptions on which the valuations contained herein are based. Accordingly, the actual realized gains or losses on these unrealized investments may differ materially from the returns shown herein. The material assumptions that were applied in determining the values and the material factors that could cause actual results to differ materially will be provided upon request. Please refer to Brookfield's Fund Valuation Policy (available upon request) for more information.*
9. *"Total Proceeds" are before fund expenses, management fees and carried interest (or equivalent fees).*
10. *Realized and Materially Realized Investments represent fully realized investments and investments with Realized Proceeds equal to or greater than 75% of Equity Invested.*
11. *"N/C" refers to performance measures that cannot be calculated as the Total Proceeds realized by the Fund is $nil.*
12. *"Toeholds and Other Investments" may include the acquisition of public or private debt, debt like instruments, publicly traded securities or another form of strategic investment in a target company, which could potentially play a significant role in a broader transaction, if one were to materialize, or other assets.*

Notes to Brookfield Strategic Real Estate Partners III Track Record

Brookfield

13. *Bridge financing of $385.4 million with $134.3 million for Fundamental Income Properties, $87.5 million for Brazil Office Portfolio, $39.9 million for alstria, $32.5 million for UK Science and Innovation, $26.4 million for French Logistics Portfolio, $26.1 million for 660 Fifth Avenue, $22.3 million for US Logistics Portfolio, $8.4 million for Grand M Group, $5.3 million for North American Hospitality, and $2.8 million for Edyn, which is currently outstanding and expected to be repaid within 18 months after the investment date, is excluded from Fund Equity Invested and Proceeds as well as the associated Performance figures, and if not repaid within such time, will be included therein.*
14. *"Net IRR" and "Net Investment Multiple" are calculated on a fund level and not for any particular investor, and take into account the average fund expenses, management fees and carried interest (or equivalent fees), if any, allocated to or paid by each investor. For the purposes of this calculation, Brookfield is treated as having paid management fees and carried interest rates that correspond to the rates a third party investor investing at the same time and in the same amount as Brookfield would pay (provided that Brookfield will be generally treated as being entitled to any applicable "early closing" discount, including to the extent Brookfield's commitment is increased after the early closing period). Since Brookfield is generally the largest investor in its funds and is typically entitled to such an early closing discount, the notional management fee and carried interest rates applied to Brookfield's commitment are typically the lowest rates available to third party investors and as such these net returns are calculated using those rates for Brookfield's commitment, which reduces the fund's average management fees and carried interest rates (and increases the net returns presented here) below what they would have been if Brookfield was not invested in the fund. Since management fees and carried interest rates vary by investor, each particular investor would likely have a different net performance return than those shown here, and investors who do not qualify for discounted management fees and carried interest rates based on, as applicable, their commitment size or timing of commitment would likely experience a greater spread between gross and net performance than presented here. The calculation in respect of any particular set of economic terms will be provided upon request.*
15. *"Net IRR" and "Net Investment Multiple" indicated under "Total Portfolio" do not take into account the effects of leverage incurred at the fund level through the use of a subscription secured credit facility to temporarily fund investments and meet working capital needs.*
16. *"Net IRR" and "Net Investment Multiple" for a particular investment reflects the Gross IRR and Gross Investment Multiple of the investment, adjusted for the "Gross-Net Discount Factor" for the fund. The Gross-Net Discount Factor used for calculating an investment's Net IRR is determined by dividing the fund's unlevered Net IRR by its unlevered Gross IRR, and the Gross-Net Discount Factor used for calculating an investment's Net Investment Multiple is determined by dividing the fund's unlevered Net Investment Multiple by its unlevered Gross Investment Multiple. For purposes of this calculation, "unlevered" returns refer to return metrics calculated by removing the effect that a subscription secured credit facility would otherwise have on fund-level returns. Since the Net IRR and Net Investment Multiple for a particular investment are derivatives of the fund's overall Net IRR and Net Investment Multiple, they take into account the average management fees and carried interest (or equivalent fees) paid by investors in the fund, as more fully described in the notes to such figures.*
17. *Projected net return for a particular investment reflects the projected gross return adjusted for the "Gross-Net Discount Factor" applicable to the fund in which the investment was made. The Gross-Net Discount Factor is determined by dividing the fund's unlevered projected net return by its unlevered projected gross return as described in footnote 4. For purposes of this calculation, "unlevered" returns refer to return metrics calculated by removing the effect that a subscription secured credit facility would otherwise have on fund-level returns.*
18. *"Net IRR" and "Net Investment Multiple" indicated under "Levered Net Portfolio" take into account the effects of leverage incurred at the fund level through the use of a subscription secured credit facility to temporarily fund investments and meet working capital needs.*

Brookfield Strategic Real Estate Partners IV Track Record

Brookfield

The summary set forth below includes real estate investments made by Brookfield through Brookfield Strategic Real Estate Partners IV ("BSREP IV"). Prior performance is not indicative of future results and there can be no guarantee that the fund, future funds or their respective investments will achieve comparable results or be able to avoid losses.

Notes to Brookfield Strategic Real Estate Partners IV Track Record

Brookfield

1. *Reflects performance from initial investment date to December 31, 2023. "—" refers to performance measures that are not meaningful, typically where: (a) the performance measurement date is within twelve months of acquisition or (b) where a significant portion of the asset is under development. "N/R" refers to performance measures that are not relevant. Accordingly, such performance measures are not disclosed separately; however, they have been included in the calculation of the performance metrics for the total portfolio. The full track record, including the current returns of such investments, will be provided upon request.*
2. *"Gross IRR" and "Gross Investment Multiple" reflect performance before fund expenses, management fees, and carried interest (or equivalent fees), which would reduce an investor's return. "Net IRR" and "Net Investment Multiple" take into account fund expenses, management fees and carried interest (or equivalent fees). Performance figures exclude the effects of and returns from bridge financing provided by the fund.*
3. *To the extent that a fund's aggregate "Equity Invested" has exceeded the fund's committed capital as a result of the application of the recycling provisions of the fund's governing documents, the calculation of fund-level multiples is adjusted by reducing both the fund's "Total Proceeds" and its "Equity Invested" by the amount of such excess (which adjustment, where applicable, generally results in a higher fund-level multiple than the unadjusted figure). If a fund's aggregate "Equity Invested" does not exceed its committed capital, fund-level multiples are not adjusted for recycling. In either case, asset-level multiples are not adjusted for recycling.*
4. *Projected returns reflected herein have been prepared based on various estimations and assumptions made by the manager, including estimations and assumptions about events that have not yet occurred. Projected returns are based on equity invested to date and equity projected to be invested, all cash flows generated to date and cash flows projected to be generated during the remaining expected holding period and the expected terminal value, determined based on projected operating performance and projected capitalization rates in the applicable market. These calculations are in turn based on numerous assumptions, including the amount of capital each investment will require; availability and cost of debt financing; rents and occupancy rates; tenant defaults; maintenance, property taxes, insurance, utilities and other operating expenses; market conditions influencing capitalization rates and the hold period of each investment; and other factors. While the manager reviews its projected returns quarterly, since the manager's assumptions take into account its views regarding expected outcomes across the length of the expected hold period of an investment, updates to the assumptions (and, therefore, to the resulting projections) will generally be made only when the manager believes such changes reflect durable changes in the facts underpinning such assumptions, as opposed to temporary market fluctuations. Projected fund-level returns for funds that are not yet substantially invested or committed reflect a calculation blending (i) the projected investment-level returns for the fund's investments to date, and (ii) with respect to capital that the fund has not yet committed to specific assets (but expects to deploy in investments over time), the fund's target returns. Projected net returns are prepared based on an illustrative model that takes into account fund expenses, management fees and carried interest (or equivalent fees) paid to date and projected to be paid within the fund. Modeled fund expenses are estimated by the manager based on its experience in the fund and/or similar funds, and modeled management fees and carried interest reflect the highest management fee and carried interest rates expected to be charged to investors in the fund. Projected net returns also take into account assumptions regarding the holding period of each investment, and other factors. Projected gross returns do not take these amounts into account. Due to various risks, uncertainties and changes beyond the control of the manager, the actual results of the referenced investments could differ materially from the results expressed or implied by the projected returns reflected herein in respect of such investments. There is no assurance, representation or warranty being made by any person that any of the projected returns will be achieved and undue reliance should not be put on them. Industry experts may disagree with the estimations and assumptions used in preparing the projected returns. IMPORTANT: The projections or other information generated by the manager's investment analysis tools and provided herein regarding the likelihood of various investment outcomes are hypothetical in nature, do not reflect actual investment results and are not guarantees of future results. Additional information about the estimations and assumptions used in preparing the projected returns and the factors that could cause actual results to differ materially from the projected returns are available upon request. Please contact the manager to see projected performance information based on different assumptions.*
5. *"Realization Date" reflects the date on which the investment was realized or the date by which management estimates the investment will be realized. There is no guarantee that unrealized investments will be realized at the estimated dates.*
6. *"Equity Invested" represents the initial capital investment, follow-on investments, capital expenditures and subscription facility drawdowns, as applicable.*
7. *"Realized Proceeds" represents any proceeds from disposition and distributions or other forms of current income and loss.*
8. *Values ascribed to "Unrealized Proceeds" as of December 31, 2023, are used in determining performance results based on assumptions that management believes are fair and reasonable under the circumstances and held at cost for investments acquired during the reporting quarter, where cost of the investment is considered to be an appropriate estimate of the fair value. Where applicable, Unrealized Proceeds include unrealized gains or losses resulting from hedges against foreign currency exposure. The actual returns on unrealized gains or losses will depend on among other factors, future operating results, the value of the asset and market conditions at the time of dispositions, any related transactions costs and the time and manner of sale, all of which may differ from the assumptions on which the valuations contained herein are based. Accordingly, the actual realized gains or losses on these unrealized investments may differ materially from the returns shown herein. The material assumptions that were applied in determining the values and the material factors that could cause actual results to differ materially will be provided upon request. Please refer to Brookfield's Fund Valuation Policy (available upon request) for more information.*
9. *"Total Proceeds" are before fund expenses, management fees and carried interest (or equivalent fees).*
10. *Realized and Materially Realized Investments represent fully realized investments and investments with Realized Proceeds equal to or greater than 75% of Equity Invested.*
11. *Realized proceeds include $330M of expected proceeds from the full disposition of the investment which closed on December 1, 2023. The proceeds are expected to be distributed to the Fund by March 31, 2024 which is the date reflected in the calculation of the Current Gross IRR.*
12. *Bridge financing of $250.7 million for North American Logistics Portfolio, $250.0 million for Watermark Lodging, $215.5 million for Hibernia, $213.7 million for alstria, $104.9 million for Pan-European Logistics Portfolio, $71.6 million for Befimmo , $45.9 million for 150 Champs Élysées, $17.8 million for US Student Housing, $17.4 million for King Street Properties, $12.4 million for Brazil Multifamily Portfolio, $12.2 million for Journal Student Living, $8.5 million for US Single Family Rental Portfolio, $4.9 million for Australian Logistics Portfolio, $2.8 million for Texas Multifamily Portfolio, and $1.5 million for RedBox Self Storage, which is currently outstanding and expected to be repaid within 18 months after the investment date, is excluded from Fund Equity Invested and Proceeds as well as the associated Performance figures, and if not repaid within such time, will be included therein.*

Notes to Brookfield Strategic Real Estate Partners IV Track Record

Brookfield

13. *"Toeholds and Other Investments" may include the acquisition of public or private debt, debt like instruments, publicly traded securities or another form of strategic investment in a target company, which could potentially play a significant role in a broader transaction, if one were to materialize, or other assets, including land for development.*
14. *"Net IRR" and "Net Investment Multiple" are calculated on a fund level and not for any particular investor, and take into account the average fund expenses, management fees and carried interest (or equivalent fees), if any, allocated to or paid by each investor. For the purposes of this calculation, Brookfield is treated as having paid management fees and carried interest rates that correspond to the rates a third party investor investing at the same time and in the same amount as Brookfield would pay (provided that Brookfield will be generally treated as being entitled to any applicable "early closing" discount, including to the extent Brookfield's commitment is increased after the early closing period). Since Brookfield is generally the largest investor in its funds and is typically entitled to such an early closing discount, the notional management fee and carried interest rates applied to Brookfield's commitment are typically the lowest rates available to third party investors and as such these net returns are calculated using those rates for Brookfield's commitment, which reduces the fund's average management fees and carried interest rates (and increases the net returns presented here) below what they would have been if Brookfield was not invested in the fund. Since management fees and carried interest rates vary by investor, each particular investor would likely have a different net performance return than those shown here, and investors who do not qualify for discounted management fees and carried interest rates based on, as applicable, their commitment size or timing of commitment would likely experience a greater spread between gross and net performance than presented here. The calculation in respect of any particular set of economic terms will be provided upon request.*
15. *"Net IRR" and "Net Investment Multiple" indicated under "Total Portfolio" do not take into account the effects of leverage incurred at the fund level through the use of a subscription secured credit facility to temporarily fund investments and meet working capital needs.*
16. *"Net IRR" and "Net Investment Multiple" for a particular investment reflects the Gross IRR and Gross Investment Multiple of the investment, adjusted for the "Gross-Net Discount Factor" for the fund. The Gross-Net Discount Factor used for calculating an investment's Net IRR is determined by dividing the fund's unlevered Net IRR by its unlevered Gross IRR, and the Gross-Net Discount Factor used for calculating an investment's Net Investment Multiple is determined by dividing the fund's unlevered Net Investment Multiple by its unlevered Gross Investment Multiple. For purposes of this calculation, "unlevered" returns refer to return metrics calculated by removing the effect that a subscription secured credit facility would otherwise have on fund-level returns. Since the Net IRR and Net Investment Multiple for a particular investment are derivatives of the fund's overall Net IRR and Net Investment Multiple, they take into account the average management fees and carried interest (or equivalent fees) paid by investors in the fund, as more fully described in the notes to such figures.*
17. *Projected net return for a particular investment reflects the projected gross return adjusted for the "Gross-Net Discount Factor" applicable to the fund in which the investment was made. The Gross-Net Discount Factor is determined by dividing the fund's unlevered projected net return by its unlevered projected gross return as described in footnote 4. For purposes of this calculation, "unlevered" returns refer to return metrics calculated by removing the effect that a subscription secured credit facility would otherwise have on fund-level returns.*
18. *"Net IRR" and "Net Investment Multiple" indicated under "Levered Net Portfolio" take into account the effects of leverage incurred at the fund level through the use of a subscription secured credit facility to temporarily fund investments and meet working capital needs.*

Brookfield Strategic Real Estate Partners V Track Record

Brookfield

The summary set forth below includes real estate investments made by Brookfield through Brookfield Strategic Real Estate Partners V ("BSREP V"). Prior performance is not indicative of future results and there can be no guarantee that the fund, future funds or their respective investments will achieve comparable results or be able to avoid losses.

Notes to Brookfield Strategic Real Estate Partners V Track Record

Brookfield

1. *Reflects performance from initial investment date to December 31, 2023. "—" refers to performance measures that are not meaningful, typically where: (a) the performance measurement date is within twelve months of acquisition or (b) where a significant portion of the asset is under development. "N/R" refers to performance measures that are not relevant. Accordingly, such performance measures are not disclosed separately; however, they have been included in the calculation of the performance metrics for the total portfolio. The full track record, including the current returns of such investments, will be provided upon request.*
2. *"Gross IRR" and "Gross Investment Multiple" reflect performance before fund expenses, management fees, and carried interest (or equivalent fees), which would reduce an investor's return. "Net IRR" and "Net Investment Multiple" take into account fund expenses, management fees and carried interest (or equivalent fees). Performance figures exclude the effects of and returns from bridge financing provided by the fund.*
3. *To the extent that a fund's aggregate "Equity Invested" has exceeded the fund's committed capital as a result of the application of the recycling provisions of the fund's governing documents, the calculation of fund-level multiples is adjusted by reducing both the fund's "Total Proceeds" and its "Equity Invested" by the amount of such excess (which adjustment, where applicable, generally results in a higher fund-level multiple than the unadjusted figure). If a fund's aggregate "Equity Invested" does not exceed its committed capital, fund-level multiples are not adjusted for recycling. In either case, asset-level multiples are not adjusted for recycling.*
4. *Projected returns reflected herein have been prepared based on various estimations and assumptions made by the manager, including estimations and assumptions about events that have not yet occurred. Projected returns are based on equity invested to date and equity projected to be invested, all cash flows generated to date and cash flows projected to be generated during the remaining expected holding period and the expected terminal value, determined based on projected operating performance and projected capitalization rates in the applicable market. These calculations are in turn based on numerous assumptions, including the amount of capital each investment will require; availability and cost of debt financing; rents and occupancy rates; tenant defaults; maintenance, property taxes, insurance, utilities and other operating expenses; market conditions influencing capitalization rates and the hold period of each investment; and other factors. While the manager reviews its projected returns quarterly, since the manager's assumptions take into account its views regarding expected outcomes across the length of the expected hold period of an investment, updates to the assumptions (and, therefore, to the resulting projections) will generally be made only when the manager believes such changes reflect durable changes in the facts underpinning such assumptions, as opposed to temporary market fluctuations. Projected fund-level returns for funds that are not yet substantially invested or committed reflect a calculation blending (i) the projected investment-level returns for the fund's investments to date, and (ii) with respect to capital that the fund has not yet committed to specific assets (but expects to deploy in investments over time), the fund's target returns. Projected net returns are prepared based on an illustrative model that takes into account fund expenses, management fees and carried interest (or equivalent fees) paid to date and projected to be paid within the fund. Modeled fund expenses are estimated by the manager based on its experience in the fund and/or similar funds, and modeled management fees and carried interest reflect the highest management fee and carried interest rates expected to be charged to investors in the fund. Projected net returns also take into account assumptions regarding the holding period of each investment, and other factors. Projected gross returns do not take these amounts into account. Due to various risks, uncertainties and changes beyond the control of the manager, the actual results of the referenced investments could differ materially from the results expressed or implied by the projected returns reflected herein in respect of such investments. There is no assurance, representation or warranty being made by any person that any of the projected returns will be achieved and undue reliance should not be put on them. Industry experts may disagree with the estimations and assumptions used in preparing the projected returns. IMPORTANT: The projections or other information generated by the manager's investment analysis tools and provided herein regarding the likelihood of various investment outcomes are hypothetical in nature, do not reflect actual investment results and are not guarantees of future results. Additional information about the estimations and assumptions used in preparing the projected returns and the factors that could cause actual results to differ materially from the projected returns are available upon request. Please contact the manager to see projected performance information based on different assumptions.*
5. *"Realization Date" reflects the date on which the investment was realized or the date by which management estimates the investment will be realized. There is no guarantee that unrealized investments will be realized at the estimated dates.*
6. *"Equity Invested" represents the initial capital investment, follow-on investments, capital expenditures and subscription facility drawdowns, as applicable.*
7. *"Realized Proceeds" represents any proceeds from disposition and distributions or other forms of current income and loss.*
8. *Values ascribed to "Unrealized Proceeds" as of December 31, 2023, are used in determining performance results based on assumptions that management believes are fair and reasonable under the circumstances and held at cost for investments acquired during the reporting quarter, where cost of the investment is considered to be an appropriate estimate of the fair value. Where applicable, Unrealized Proceeds include unrealized gains or losses resulting from hedges against foreign currency exposure. The actual returns on unrealized gains or losses will depend on among other factors, future operating results, the value of the asset and market conditions at the time of dispositions, any related transactions costs and the time and manner of sale, all of which may differ from the assumptions on which the valuations contained herein are based. Accordingly, the actual realized gains or losses on these unrealized investments may differ materially from the returns shown herein. The material assumptions that were applied in determining the values and the material factors that could cause actual results to differ materially will be provided upon request. Please refer to Brookfield's Fund Valuation Policy (available upon request) for more information.*
9. *"Total Proceeds" are before fund expenses, management fees and carried interest (or equivalent fees).*
10. *Bridge financing of $410.0 million for San Francisco Multifamily Portfolio and $22.5 million for North American Logistics Portfolio, which is currently outstanding and expected to be repaid within 18 months after the investment date, is excluded from Fund Equity Invested and Proceeds as well as the associated Performance figures, and if not repaid within such time, will be included therein.*

Brookfield

11. *"Net IRR" and "Net Investment Multiple" are calculated on a fund level and not for any particular investor, and take into account the average fund expenses, management fees and carried interest (or equivalent fees), if any, allocated to or paid by each investor. For the purposes of this calculation, Brookfield is treated as having paid management fees and carried interest rates that correspond to the rates a third party investor investing at the same time and in the same amount as Brookfield would pay (provided that Brookfield will be generally treated as being entitled to any applicable "early closing" discount, including to the extent Brookfield's commitment is increased after the early closing period). Since Brookfield is generally the largest investor in its funds and is typically entitled to such an early closing discount, the notional management fee and carried interest rates applied to Brookfield's commitment are typically the lowest rates available to third party investors and as such these net returns are calculated using those rates for Brookfield's commitment, which reduces the fund's average management fees and carried interest rates (and increases the net returns presented here) below what they would have been if Brookfield was not invested in the fund. Since management fees and carried interest rates vary by investor, each particular investor would likely have a different net performance return than those shown here, and investors who do not qualify for discounted management fees and carried interest rates based on, as applicable, their commitment size or timing of commitment would likely experience a greater spread between gross and net performance than presented here. The calculation in respect of any particular set of economic terms will be provided upon request.*
12. *"Net IRR" and "Net Investment Multiple" indicated under "Total Portfolio" do not take into account the effects of leverage incurred at the fund level through the use of a subscription secured credit facility to temporarily fund investments and meet working capital needs.*
13. *"Net IRR" and "Net Investment Multiple" for a particular investment reflects the Gross IRR and Gross Investment Multiple of the investment, adjusted for the "Gross-Net Discount Factor" for the fund. The Gross-Net Discount Factor used for calculating an investment's Net IRR is determined by dividing the fund's unlevered Net IRR by its unlevered Gross IRR, and the Gross-Net Discount Factor used for calculating an investment's Net Investment Multiple is determined by dividing the fund's unlevered Net Investment Multiple by its unlevered Gross Investment Multiple. For purposes of this calculation, "unlevered" returns refer to return metrics calculated by removing the effect that a subscription secured credit facility would otherwise have on fund-level returns. Since the Net IRR and Net Investment Multiple for a particular investment are derivatives of the fund's overall Net IRR and Net Investment Multiple, they take into account the average management fees and carried interest (or equivalent fees) paid by investors in the fund, as more fully described in the notes to such figures.*
14. *Projected net return for a particular investment reflects the projected gross return adjusted for the "Gross-Net Discount Factor" applicable to the fund in which the investment was made. The Gross-Net Discount Factor is determined by dividing the fund's unlevered projected net return by its unlevered projected gross return as described in footnote 4. For purposes of this calculation, "unlevered" returns refer to return metrics calculated by removing the effect that a subscription secured credit facility would otherwise have on fund-level returns.*
15. *"Net IRR" and "Net Investment Multiple" indicated under "Levered Net Portfolio" take into account the effects of leverage incurred at the fund level through the use of a subscription secured credit facility to temporarily fund investments and meet working capital needs.*

Endnotes

1. The **"Target Returns"** set forth herein are for illustrative and informational purposes only. Target gross returns are based on historical performance for similar investment strategies and the manager's expectations regarding the returns that it will underwrite for the types of investment opportunities that it expects to be available for Brookfield Strategic Real Estate Partners V ("BSREP V" or "The Fund"). There can be no assurance that the manager will be able to source investment opportunities that it can underwrite in line with the target gross returns, or that the underwritten returns for any of the fund's investments will be achieved. Target gross returns do not reflect fund expenses, management fees or carried interest (or equivalent fees), which reduce an investor's returns. Target net returns are prepared based on an illustrative model that takes into account these items, which includes assumptions regarding applicable management fees and carried interest (which reflect the highest management fee and carried interest rates expected to be charged to investors in the fund), fund expenses (which are estimated by the manager based on its experience in the fund and/or similar funds), the expected hold period of the fund's investments, and other factors. Due to various risks, uncertainties and changes (including changes in economic, operational, political or other circumstances), the actual performance of the fund could differ materially from the target returns set forth herein. In addition, industry experts may disagree with the assumptions used in presenting the target returns. No assurance, representation or warranty is made by any person that the target returns will be achieved, and undue reliance should not be put on them. Additional information about the assumptions used in determining the target returns and the factors that could cause actual results to differ materially from the target returns are available upon request. Prior performance is not indicative of future results and there can be no guarantee that the Fund will achieve the target returns or be able to avoid losses.

2. **"Assets Under Management"** as of December 31, 2023**.** Totals may not add due to rounding. Assets under management ("AUM") refers to the total fair value of assets managed by Brookfield Corporation and/or Brookfield Asset Management Ltd. (collectively, "Brookfield"), calculated as follows: (a) investments (excluding AUM attributable to Oaktree Capital Management ("Oaktree")) that Brookfield either: consolidates for accounting purposes (generally, investments in respect of which Brookfield has a significant economic interest and unilaterally directs day-to-day operational, investment and financial activities), or does not consolidate for accounting purposes but over which Brookfield has significant influence by virtue of one or more attributes (e.g., Brookfield being the largest investor in the investment, Brookfield having the largest representation on the investment's governance body, Brookfield being the primary manager and/or operator of the investment, and/or Brookfield having other significant influence attributes), are calculated at 100% of the total fair value of the investment taking into account its full capital structure – equity and debt – on a gross asset value basis, even if Brookfield does not own 100% of the investment, with the exception of investments held through Brookfield's perpetual funds, which are calculated at Brookfield's proportionate economic share of the investment's net asset value; (b) all other Brookfield investments (excluding Oaktree) are calculated at Brookfield's proportionate economic share of the total fair value of the investment taking into account its full capital structure – equity and debt – on a gross asset value basis, with the exception of investments held through Brookfield's perpetual funds, which are calculated at Brookfield's proportionate economic share of the investment's net asset value; and Brookfield AUM that is attributable to Oaktree is calculated as described at https://www.oaktreecapital.com/about. Infrastructure AUM includes $4 billion of AUM attributable to Oaktree and $5 billion of AUM attributable to Brookfield Public Securities Group ("PSG"). Private Equity AUM includes $16 billion of AUM attributable to Oaktree. Real Estate AUM includes $17 billion of AUM attributable to Oaktree and $2 billion of AUM attributable to PSG. Credit & Insurance Solutions AUM includes $148 billion of AUM attributable to Oaktree, $9 billion of AUM attributable to PSG and $60 billion of AUM attributable to Brookfield Reinsurance Partners. Both Oaktree and PSG operate separately from the rest of Brookfield pursuant to an information barrier by which Oaktree and PSG manage their investment activities independently of the rest of Brookfield. Brookfield's methodology for determining AUM differs (and in some cases such difference could be significant) from the methodology that is employed by other alternative asset managers as well as the methodology for calculating regulatory AUM that is prescribed for certain regulatory filings (e.g., Form ADV and Form PF). Brookfield's AUM is rounded down to the nearest $25 billion.

3. **"Operating Employees"** and **"Investment Professionals"** as of December 31, 2023. Totals may not add due to rounding. Investment professionals include personnel involved in the capital allocation process, including investment analysis and transaction execution, portfolio management and other personnel across Brookfield and Oaktree. Operating employees include personnel working at Brookfield's related operating businesses and portfolio companies. Management fees earned by Brookfield are not generally used to compensate such operating employees but rather operating employee compensation is typically a company or fund expense.

4. **"Capital Raised"** includes Brookfield's commitment.

5. **"Equity Invested"** represents the initial capital investment including short-term subscription facility drawdowns, follow-on investments, and capital expenditures as applicable. **"Equity Invested/Committed"** is based on equity invested plus committed capital for identified deals. There can be no guarantee that the fund will make or maintain concentration and/or weighting proportions comparable to those presented herein.

6. **"Current Returns" or "Realized Returns"** reflects performance from initial investment date to December 31, 2023. "n/m" refers to performance measures that are not meaningful, typically where: (a) the performance measurement date is within twelve months of acquisition or (b) where a significant portion of the asset is under development. Accordingly, such performance measures are not disclosed separately; however, they have been included in the calculation of the performance metrics for the total portfolio. Prior performance is not indicative of future results and there can be no guarantee that funds, future funds or their respective investments will achieve comparable results or be able to avoid losses.

7. **"Gross IRR"** and "**Gross Investment Multiple"** reflect performance before fund expenses, management fees, and carried interest (or equivalent fees), which would reduce an investor's return. "Net IRR" and "Net Investment Multiple" take into account fund expenses, management fees and carried interest (or equivalent fees). Performance figures exclude the effects of and returns from bridge financing provided by the fund. To the extent that a fund's aggregate "Equity Invested" has exceeded the fund's committed capital as a result of the application of the recycling provisions of the fund's governing documents, the calculation of fund-level multiples is adjusted by reducing both the fund's "Total Proceeds" and its "Equity Invested" by the amount of such excess (which adjustment, where applicable, generally results in a higher fund-level multiple than the unadjusted figure). If a fund's aggregate "Equity Invested" does not exceed its committed capital, fund-level multiples are not adjusted for recycling. In either case, asset-level multiples are not adjusted for recycling.

8. **"Projected Returns"** reflected herein have been prepared based on various estimations and assumptions made by the manager, including estimations and assumptions about events that have not yet occurred. Projected returns are based on equity invested to date and equity projected to be invested, all cash flows generated to date and cash flows projected to be generated during the remaining expected holding period and the expected terminal value, determined based on projected operating performance and projected capitalization rates in the applicable market. These calculations are in turn based on numerous assumptions, including the amount of capital each investment will require; availability and cost of debt financing; rents and occupancy rates; tenant defaults; maintenance, property taxes, insurance, utilities and other operating expenses; market conditions influencing capitalization rates and the hold period of each investment; and other factors. While the manager reviews its projected returns quarterly, since the manager's assumptions take into account its views regarding expected outcomes across the length of the expected hold period of an investment, updates to the assumptions (and, therefore, to the resulting projections) will generally be made only when the manager believes such changes reflect durable changes in the facts underpinning such assumptions, as opposed to temporary market fluctuations. Projected fund-level returns for funds that are not yet substantially invested or committed reflect a calculation blending (i) the projected investment-level returns for the fund's investments to date, and (ii) with respect to capital that the fund has not yet committed to specific assets (but expects to deploy in investments over time), the fund's target returns. Projected net returns are prepared based on an illustrative model that takes into account fund expenses, management fees and carried interest (or equivalent fees) paid to date and projected to be paid within the fund. Modeled fund expenses are estimated by the manager based on its experience in the fund and/or similar funds, and modeled management fees and carried interest reflect the highest management fee and carried interest rates expected to be charged to investors in the fund. Projected net returns also take into account assumptions regarding the holding period of each investment, and other factors. Projected gross returns do not take these amounts into account. Due to various risks, uncertainties and changes beyond the control of the manager, the actual results of the referenced investments could differ materially from the results expressed or implied by the projected returns reflected herein in respect of such investments. There is no assurance, representation or warranty being made by any person that any of the projected returns will be achieved and undue reliance should not be put on them. Industry experts may disagree with the estimations and assumptions used in preparing the projected returns. IMPORTANT: The projections or other information generated by the manager's investment analysis tools and provided herein regarding the likelihood of various investment outcomes are hypothetical in nature, do not reflect actual investment results and are not guarantees of future results. Additional information about the estimations and assumptions used in preparing the projected returns and the factors that could cause actual results to differ materially from the projected returns are available upon request. Please contact the manager to see projected performance information based on different assumptions.

9. **"Net IRR"** and **"Net Investment Multiple"** are calculated on a fund level and not for any particular investor, and take into account the average fund expenses, management fees and carried interest (or equivalent fees) and the effects of leverage incurred at the fund-level through the use of a subscription secured credit facility to temporarily fund investments and meet working capital needs ("Fund Leverage"), if any, allocated to or paid by each investor. "Unlevered Net IRR" and "Unlevered Net Investment Multiple" do not take into account the effects of Fund Leverage. "N/A" refers to a fund which has not utilized such leverage, as such, net levered return metrics are not applicable. For the purposes of this calculation, Brookfield is treated as having paid management fees and carried interest rates that correspond to the rates a third party investor investing at the same time and in the same amount as Brookfield would pay (provided that Brookfield will be generally treated as being entitled to any applicable "early closing" discount, including to the extent Brookfield's commitment is increased after the early closing period). Since Brookfield is generally the largest investor in its funds and is typically entitled to such an early closing discount, the notional management fee and carried interest rates applied to Brookfield's commitment are typically the lowest rates available to third party investors and as such these net returns are calculated using those rates for Brookfield's commitment, which reduces the fund's average management fees and carried interest rates (and increases the net returns presented here) below what they would have been if Brookfield was not invested in the fund. Since management fees and carried interest rates vary by investor, each particular investor would likely have a different net performance return than those shown here, and investors who do not qualify for discounted management fees and carried interest rates based on, as applicable, their commitment size or timing of commitment would likely experience a greater spread between gross and net performance than presented here. The calculation in respect of any particular set of economic terms will be provided upon request.

10. **"Realized Proceeds"** represents any proceeds from disposition and distributions or other forms of current income and loss.

11. **"Realization Date"** reflects the date in which the investment was realized.

12. **"Unrealized Proceeds"** as of December 31, 2023 are used in determining performance results based on assumptions that management believes are fair and reasonable under the circumstances and held at cost for investments acquired during the reporting quarter, where cost of the investment is considered to be an appropriate estimate of the fair value. Where applicable, Unrealized Proceeds include unrealized gains or losses resulting from hedges against foreign currency exposure. The actual returns on unrealized gains or losses will depend on among other factors, future operating results, the value of the asset and market conditions at the time of dispositions, any related transactions costs and the time and manner of sale, all of which may differ from the assumptions on which the valuations contained herein are based. Accordingly, the actual realized gains or losses on these unrealized investments may differ materially from the returns shown herein. The material assumptions that were applied in determining the values and the material factors that could cause actual results to differ materially will be provided upon request. Please refer to Brookfield's Fund Valuation Policy (available upon request) for more information.

13. **"Replacement Costs"** are based on internal assumptions and estimates, and in some instances third party appraisals, where we develop an analysis to support what we believe the estimated costs to build the investment would be at the time of underwriting. The analysis takes into account our view of land value, based on market comparables, our view of construction costs, based on both third-party data and our own internal development capabilities. This metric is generally less relevant for development assets or investments where the business plan involves significant redevelopment. Our analysis is based on estimations and assumptions about events that have not occurred, any of which may prove to be incorrect, and data which is subject to change. In addition, industry experts may disagree with the assumptions and estimates used.

14. **"Net IRR"** and **"Net Investment Multiple"** for a **particular investment** reflects the Gross IRR and Gross Investment Multiple of the investment, adjusted for the "Gross-Net Discount Factor" applicable to the fund in which the investment was made. The Gross-Net Discount Factor used for calculating an investment's Net IRR is determined by dividing the fund's unlevered Net IRR by its unlevered Gross IRR, and the Gross-Net Discount Factor used for calculating an investment's Net Investment Multiple is determined by dividing the fund's unlevered Net Investment Multiple by its unlevered Gross Investment Multiple. For purposes of this calculation, "unlevered" returns refer to return metrics calculated by removing the effect that a subscription secured credit facility would otherwise have on fund-level returns. Since the Net IRR and Net Investment Multiple for a particular investment are derivative of the fund's overall Net IRR and Net Investment Multiple, they take into account the average management fees and carried interest (or similar fees) paid by investors in the fund, as more fully described in the notes to such figures.

15. Brookfield maintains a number of ESG-related certifications and memberships with ESG-focused organizations to monitor and align Brookfield and its portfolio companies with evolving standards and frameworks appropriate for their industry and jurisdiction. The logos have been included for illustrative purposes of existing memberships along with other associations. References to any particular entity should not be considered as a recommendation of or by Brookfield.

16. Based on the expected target fund size as set forth on page 34. There can be no assurance that diversification or asset allocations will be met or that the Fund will be able to implement its investment strategy or achieve its investment objectives.

17. The information provided herein, which may be subject to change, is presented as a summary of certain key terms of the Fund only and is qualified in its entirety by reference to the Fund's Private Placement Memorandum and governing documents. Please refer to, and review carefully, such documents prior to making an investment in the Fund.

18. Management fee may vary depending on timing, commitment size and historical investor profile. Brookfield is happy to provide full rate card upon request.

19. There can be no assurance that the Fund will offer any investors, including qualifying investors, significant (or any) co-investment opportunities. Please refer to the Fund's Private Placement Memorandum and governing documents for additional information regarding how the priority co-investment program will be offered with respect to investors with commitments to BSREP Europe.

20. **"Assets Under Management**" as of December 31, 2023. Totals may not add due to rounding. Assets under management ("AUM") refers to the total fair value of assets managed by Brookfield Corporation and/or Brookfield Asset Management Ltd. (collectively, "Brookfield"), calculated as follows: (a) investments that Brookfield either: consolidates for accounting purposes (generally, investments in respect of which Brookfield has a significant economic interest and unilaterally directs day-to-day operating, investing and financial activities of), or does not consolidate for accounting purposes but over which Brookfield has significant influence by virtue of one or more attributes (e.g., Brookfield being the largest investor in the investment, Brookfield having the largest representation on the investment's governance body, Brookfield being the primary manager and/or operator of the investment, and/or Brookfield having other significant influence attributes), are calculated at 100% of the total fair value of the investment taking into account its full capital structure – equity and debt – on a gross asset value basis, even if Brookfield does not own 100% of the investment, with the exception of investments held through Brookfield's perpetual funds, which are calculated at Brookfield's proportionate economic share of the investment's net asset value; and (b) all other Brookfield investments are calculated at Brookfield's proportionate economic share of the total fair value of the investment taking into account its full capital structure – equity and debt – on a gross asset value basis, with the exception of investments held through Brookfield's perpetual funds, which are calculated at Brookfield's proportionate economic share of the investment's net asset value. Brookfield's Real Estate Group AUM as presented here does not include AUM attributable to Oaktree Capital Management or Brookfield Public Securities Group, each of which are included when Brookfield's overall AUM is presented. United States AUM presented here includes $158 billion of AUM attributable to assets within the United States of America and $3 billion of AUM attributable to assets within other parts of North America (excluding Canada). Brookfield's methodology for determining AUM differs (and in some cases such difference could be significant) from the methodology that is employed by other alternative asset managers as well as the methodology for calculating regulatory AUM that is prescribed for certain regulatory filings (e.g., Form ADV and Form PF). There is no guarantee that the fund will achieve these results.

21. There is no guarantee that the fund will achieve these results.

22. There can be no assurance that the fund will be able to (i) implement its investment strategy, (ii) achieve its investment objectives, or (iii) successfully execute on any future deals, projects or exit strategy at all or on the terms or timeline set forth herein.

23. There is no guarantee that BSREP V will achieve its target size.

24. Net performance for BSREP I-IV realized investments is calculated by (1) applying an assumed management fee of 1.50% and carried interest of 20% (which figures represent the highest fees offered to prospective investors in BSREP V) to the entire group of investments made in the BSREP I, BSREP II, BSREP III, and BSREP IV funds to determine the composite unlevered net performance (2) dividing that composite unlevered net performance figure by the composite unlevered gross performance figure, resulting in a "Gross-Net Discount Factor"; and (3) applying that Gross-Net Discount Factor to the gross performance figures for each specific investment, resulting in the net sector specific performance figures shown here. Composite "Net IRR" and "Net MOC" for the BSREP I-IV realized investments are calculated by applying the highest fees offered to prospective investors in BSREP V and take into account the effects of leverage incurred at the fund level through the use of a subscription secured credit facility to temporarily fund investments and meet working capital needs. Composite "Net IRR" and "Net Investment Multiple" indicated under "Total Realized Investments" for the BSREP I-IV realized investments are calculated by applying the highest fees offered to prospective investors in BSREP V and do not take into account the effects of leverage incurred at the fund level through the use of a subscription secured credit facility to temporarily fund investments and meet working capital needs. "Net IRR" and "Net Investment Multiple" indicated under "Levered Net Realized Investments" take into account the effects of leverage incurred at the fund level through the use of a subscription secured credit facility to temporarily fund investments and meet working capital needs.

25. **"Operating Employees"** and **"Investment Professionals"** as of December 31, 2023. Totals are rounded. Investment professionals include Brookfield real estate personnel involved in the capital allocation process, including investment analysis and transaction execution, portfolio management and other personnel. Operating employees include personnel working at Brookfield's real estate related operating businesses and portfolio companies. Management fees earned by Brookfield are not generally used to compensate such operating employees but rather operating employee compensation is typically a company or fund expense.

26. Realized and Materially Realized Investments represent fully realized investments and investments with Realized Proceeds equal to or greater than 75% of Equity Invested.

Risk Factors

General Real Estate Risks. The Fund's investments will be subject to risks incidental to owning and operating real estate projects, including risks associated with the general economic climate, geographic or market concentration, the ability of Brookfield and the Fund to manage investments, government regulations and fluctuations in interest rates. Specific market conditions may result in reductions in the value of the Fund's portfolio companies.

Lack of Transferability of Interests; No Right of Withdrawal. Interests in the Fund have not been registered under applicable U.S. federal, U.S. state or other securities laws and cannot be resold unless they are subsequently registered or an exemption from registration is available. It is not contemplated that such registration of interests in the Fund will ever be effected. There is no public market for interests in the Fund and one is not expected to develop. The Fund's partnership agreement provides that an interest is not generally transferable without Brookfield's prior written consent, and voluntary withdrawal of an investor's interest is not allowed.

Illiquid and Long-Term Investments. Although the Fund's investments are expected to generate current income, such investments will be held for an indefinite period of time. While a Fund investment may be sold at any time, it is generally expected that the sale of a substantial portion of the Fund's investments will not occur for a number of years after such investments are made. There will not be a public market for Fund investments and such investments may require a substantial length of time to liquidate. The Fund generally will not be able to sell its investments publicly unless their sale is registered under applicable securities laws or an exemption from such registration requirements is available. Furthermore, real estate assets are subject to industry cyclicality, downturns in demand, market disruptions and lack of available capital for prospective purchasers and are therefore often difficult or time-consuming the liquidate.

General Economic Conditions. Changes in general global, regional and/or U.S. economic and geopolitical conditions, including interest rates, general levels of economic activity, the price of securities and participation by other investors in the financial markets may affect the market in which the Fund invests or the value and number of investments made or considered for investment by the Fund. Any economic downturn and/or market volatility could adversely affect the financial resources of the Fund's portfolio companies. The Fund's investments can be expected to be sensitive to performance of overall economy. Moreover, a serious pandemic, public health crisis, natural disaster, armed conflict, threats of terrorism, terrorist attacks and the impact of military or other action could severely disrupt global, national and/or regional economies, which could have an adverse effect on the performance of investments, as well as the Fund's returns and ability to make and/or dispose of investments.

Risks Associated with Certain Types of Real Estate. In addition to the general real estate risks described above, other factors that may adversely affect the value and successful operation of, and income generated from, certain types of real estate investments including: the physical attributes of a building used to generate income; location of the property; ability of management to provide adequate maintenance and insurance; the types of services or amenities that the property provides; the property's reputation; competition from other real estate investors; the level of mortgage interest rates; presence or construction of competing properties; the quality of tenants and tenant mix; and adverse local, regional or national economic conditions. Any of the foregoing could have a material adverse effect on the performance of an investment of the Fund.

Cybersecurity Risk. Brookfield and its service providers and other market participants increasingly depend on complex information technology and communications systems to conduct business, including to provide investors all reports and other communications in electronic form. These systems are subject to threats or risks that could adversely affect the Fund and its investors, including by causing Brookfield, the Fund, the Fund's investments or their service providers to incur regulatory penalties, reputational damage, additional compliance costs, liability, regulatory intervention or financial loss. Brookfield makes no assurances, representations or warranties in relation to these matters. In addition, Brookfield, the Fund's subsidiaries and their respective affiliates reserve the right to intercept, monitor and retain e-mail messages to and from its systems as permitted by applicable law.

Projections. The Fund may rely on projections developed by Brookfield or a Fund portfolio company concerning such portfolio company's future performance, outcome and cash flow. Projections are inherently subject to uncertainty and factors beyond Brookfield's and such portfolio company's control.

Portfolio Company Management Risks. Many portfolio companies rely on a limited number of key individuals, the loss of whom could significantly adversely affect their performance. Although Brookfield expects to monitor portfolio company management, portfolio company management will have day-to-day responsibility with respect such portfolio company.

Reliance on Management. The Fund's success depends on certain Brookfield investment professionals. There can be no assurance that these investment professionals will continue to be associated with Brookfield. While certain investment professionals will devote such time as they believe is reasonably required the Fund, the composition of the team dedicated to the Fund will change from time to time without notice to investors. The loss of key personnel could have a material adverse effect on the Fund, including its ability to realize its investment objectives.

Portfolio Concentration. The Fund's strategy, asset diversification, and targeted returns are premised on raising substantial capital over the Fund's life. There is no guarantee that the Fund will meet its capital raising goals or that there will not be significant redemptions. The Fund's portfolio may include a small number of investments, each with a significant portion of the Fund's aggregate commitments invested. An adverse change in one or more investments could have a material adverse effect on the Fund due to the concentrated nature of the Fund's portfolio.

An offering of interests in the Fund may be made only by means of the Fund's confidential private placement memorandum (as amended or supplemented, the "PPM") and only in those jurisdictions where permitted by law. Any decision to invest in the Fund must be based solely upon the information in the PPM. This document is qualified in its entirety by the PPM, which should be read in its entirety before a prospective investor considers making an investment in the Fund. Prospective investors should read the PPM and pay particular attention to the risk factors and conflicts contained therein.

Notice to Recipients

This document is being circulated to a limited number of sophisticated institutional investors on a confidential basis. This document has been prepared to provide recipients with the opportunity to determine their preliminary interest regarding an investment in Brookfield Strategic Real Estate Partners V ("BSREP V" or the "Fund") and may not be used or reproduced for any other purpose. Brookfield Asset Management Ltd. ("BAM" together with its affiliates, "Brookfield") is not making any offer, invitation or recommendation of any kind by communication of this document to the recipient and under no circumstances is it to be construed as a prospectus, product disclosure statement or an advertisement. Any such offer will be made only by means of the Fund's offering materials (collectively, the "Offering Materials") and is subject to the terms and conditions contained therein. Without limiting the generality of the foregoing, this document does not constitute an invitation or inducement of any sort to any person in any jurisdiction in which such an invitation or inducement is not permitted or where BAM is not qualified to make such invitation or inducement. In particular, this document is not intended to constitute, and should not be construed as, marketing of the Fund for any purposes of the Alternative Investment Fund Managers Directive. The information set forth herein is presented for discussion purposes only and does not purport to be complete, and the document does not purport and is not required to contain all of the information required to be included in a prospectus or product disclosure statement. The Offering Materials contain additional information about the investment objectives and terms and conditions of an investment in the Fund, certain tax information and conflicts of interest and risk disclosures that are important to any investment decision regarding the Fund. This document is qualified in its entirety by the Offering Materials, which should be read completely before a prospective investor considers making an investment in the Fund. This document is intended to be communicated only to such persons as BAM legally able to send it and who are legally able to receive it in their jurisdiction of residence. If you are not such a person, please return it to BAM immediately.

This document is confidential and is intended solely for the information of the person to whom it has been delivered. It may not be reproduced, made public or transmitted, in whole or in part, to third parties except as agreed in writing by Brookfield. In addition, if the recipient is subject to section 552(a) of title 5 of the United States Code (commonly known as the "Freedom of Information Act") or any other public disclosure law, rule or regulation of any governmental or non-governmental entity, it is acknowledged that the information contained herein is confidential, proprietary and a trade secret. Certain information contained herein may constitute material non-public information in respect of BAM or any of its publicly-traded affiliates and may not be used to trade in securities or other financial interests on the basis of any such information.

Brookfield Private Advisors LLC, a wholly owned subsidiary of Brookfield, is a registered broker dealer with the SEC and a FINRA Member. Certain employees of Brookfield's Private Funds Group may be registered with Brookfield Private Advisors LLC. Brookfield Private Capital (UK) Limited, a wholly owned subsidiary of Brookfield, is authorised and regulated by the United Kingdom's Financial Conduct Authority (authorisation number 730073). LFE European Asset Management S.à r.l. (trading as Brookfield Asset Management (Europe) S.à r.l.) is a joint venture entity that is 50% owned by Brookfield and is authorised and regulated by the Commission de Surveillance du Secteur Financier. None of Brookfield, its associates, directors, members, shareholders, partners, officers, employees, advisers, agents or affiliates (together, its "Related Persons") makes any express or implied representation, warranty or undertaking with respect to this document. Accordingly, and to the maximum extent permitted by law, none of Brookfield or its Related Persons shall be liable (except in the case of fraud) for any loss (whether direct, indirect or consequential) or damage suffered by any person as a result of relying on any statement in, or omission from, this document. This document has been prepared for institutional and qualified investors only. It has not been filed with FINRA and may not be reproduced, shown, quoted to, or used with members of the public.

An investment in the Fund is speculative and involves significant risks, including loss of the entire investment. There can be no guarantees that the Fund's investment objective will be achieved or that the investment will be successful. Interests in the Fund will be illiquid as there will be no secondary market for such interests and none is expected to develop. There will be restrictions on transferring interests in the Fund. The Fund's investments may be leveraged and its investment performance may be volatile. An investment in the Fund is suitable only for sophisticated investors and requires the financial ability and willingness to accept the risks and lack of liquidity that are characteristic of an investment in the Fund described herein. Any references to "committed capital" include all pledged commitments.

The Fund may not be able to achieve its investment objectives (including target returns) for various reasons, as set out in more detail elsewhere in this presentation and in the Fund's offering documents. Among other things, the novel coronavirus (COVID-19) outbreak throughout the world and related responses (e.g., closing of various market segments and businesses) has raised uncertainty in valuing (and making related estimates for) certain assets, including assets that the Fund holds or will seek to invest in. This uncertainty could remain for a significant period of time.
Except where otherwise indicated herein, the information provided herein is based on matters as they exist as of the date of preparation and not as of any future date, is subject to change, and will not be updated or otherwise revised to reflect information that subsequently becomes available or circumstances existing or changes occurring after the date hereof.

Certain information contained herein constitutes "forward-looking statements," which can be identified by the use of forward-looking terminology such as "may," "will," "should," "expect," "anticipate," "target," "project," "estimate," "intend," "continue," or "believe," or the negative thereof or other variations thereon or comparable terminology. Due to various risks and uncertainties, actual events or results or the actual performance of the Fund may differ materially from those reflected or contemplated in such forward-looking statements. Although Brookfield believes that the anticipated future results, performance or achievements for the Fund expressed or implied by the forward-looking statements and information are based upon reasonable assumptions and expectations in light of the information presently available, the reader should not place undue reliance on forward-looking statements and information because they involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Fund to differ materially from anticipated future results, performance or achievement expressed or implied by such forward-looking statements and information. Factors that could cause actual results to differ materially from those set forward in the forward-looking statements or information include but are not limited to: general economic conditions, changes in interest and exchange rates, availability of equity and debt financing and risks particular to underlying portfolio company investments.

Unless otherwise noted, any photographs appearing in this document are of investments owned or previously owned by funds or other investment vehicles managed by Brookfield. Any such photographs are intended for informational and historical purposes only. No assurance is made that the Fund will invest in similar investments.

In considering investment performance information contained herein, prospective investors should bear in mind that past performance is not necessarily indicative of future results and there can be no assurance that comparable results will be achieved, that an investment will be similar to the historic investments presented herein (because of economic conditions, the availability of investment opportunities or otherwise), that targeted returns, diversification or asset allocations will be met or that an investment strategy or investment objectives will be achieved. Any information regarding prior investment activities and returns contained herein has not been calculated using generally accepted accounting principles and has not been audited or verified by an auditor or any independent party. Unless otherwise indicated, internal rates of return (including targeted rates of return) are presented on a "gross" basis (i.e., they do not reflect management fees (or equivalent fees), carried interest (or incentive allocation), taxes, transaction costs and other expenses to be borne by investors, which in the aggregate are expected to be substantial and which would reduce the actual returns experienced by an investor). Unless otherwise indicated, returns presented on a "net" basis include costs and timing of any subscription facility, carried interest (or incentive allocation), management fees (or equivalent fees) and other fund expenses as applicable to the average investor, but do not reflect any potential tax burdens to an individual investor. Nothing contained herein should be deemed to be a prediction or projection of future performance.

This document includes Brookfield's estimates of the projected performance of certain unrealized investments currently held by other Brookfield-managed funds, including any predecessor funds, and investment programs managed by Brookfield. Although this information is forward-looking by its nature and actual results are likely to differ, perhaps materially, from these estimates, Brookfield believes that the estimates have a reasonable basis.

Any changes to assumptions could have a material impact on projections and actual returns. Actual returns on unrealized investments will depend on, among other factors, future operating results, the value of the assets and market conditions at the time of disposition, legal and contractual restrictions on transfer that may limit liquidity, any related transaction costs and the timing and manner of sale, all of which may differ from the assumptions and circumstances on which the valuations used in the prior performance data contained herein are based. Accordingly, the actual realized returns on unrealized investments may differ materially from the returns indicated herein. Brookfield will provide more detailed information on the material factors or assumptions that were applied in making the projections and the material factors that could cause actual results to differ materially from the projections to any investor on request.

Notice to Recipients

Certain of the information contained herein is based on or derived from information provided by independent third-party sources. While Brookfield believes that such information is accurate as of the date it was produced and that the sources from which such information has been obtained are reliable, Brookfield does not guarantee the accuracy or completeness of such information, and has not independently verified such information or the assumptions on which such information is based. This document is subject to the assumptions (if any) and notes contained herein.

The information in this document does not take into account your investment objectives, financial situation or particular needs and nothing contained herein should be construed as legal, business or tax advice. Each prospective investor should consult its own attorney, business adviser and tax advisor as to legal, business, tax and related matters concerning the information contained herein.

None of the information contained herein (or in any future communication (written or oral) regarding an investment) is intended to be investment advice with respect to a proposed investment. Brookfield's status as an ERISA fiduciary and the existence and nature of Brookfield's financial interest with respect to the proposed investment is set forth in the Fund's governing documents. Additionally, the information provided herein is being made available only to "independent fiduciaries with financial expertise" (within the meaning of the definition of the term "Fiduciary"; Conflict of Interest Rule – Retirement Investment Advice, 81 Fed. Reg. 20,946 (Apr. 8, 2017)). Any person who does not meet such requirements may not invest in the Fund and should promptly return these materials to Brookfield.

Neither this document nor the interests offered hereby have been approved by the United States Securities and Exchange Commission, the United Kingdom's Financial Conduct Authority, the Australian Securities and Investments Commission or by any regulatory or supervisory authority of any state or other jurisdiction, including Canada, nor has any such authority or commission passed on the accuracy or adequacy of this document. The information contained herein is subject to correction, completion, verification and amendment. Any representation to the contrary is a criminal offense.
This document is not intended to be made available to any person in Australia who is not a wholesale client (within the meaning of the Corporations Act 2001 (Cth) of Australia) and is provided to you on the basis that you are a person to whom an offer of interests in the Fund would not require disclosure under Part 7.9 of the Corporations Act 2001 (Cth) of Australia because of subsection 1012B(3)(b) (not a retail client). By receiving this document, you represent and warrant to Brookfield that you are not a retail client (within the meaning of the Corporations Act 2001 (Cth) of Australia). If you are a retail client, please do not consider the contents of this document and please return it. Any offer or invitation in Australia to invest in a fund, and any investment in a fund by a person in Australia, is limited to such wholesale clients. This document is not a disclosure document or product disclosure statement (within the meaning of the Corporations Act 2001 (Cth) of Australia).

Unless otherwise noted, all references to "$" or "Dollars" are to U.S. Dollars. All representations are made as of December 31, 2023 unless otherwise expressly indicated, and no duty to update said representations is assumed.
